## Valid Dumps SCP-NPM Pdf, Certification SCP-NPM Dump

SolarWinds certification is one of the best golden-content certifications in IT expert field all over the world, and it is also the necessary condition of choosing talents standard in large enterprises. SCP-NPM exam questions answers is useful for candidates who are eager to go through the examination. There are thousands of companies recognized and valued the certification in the world. SCP-NPM Exam Questions Answers will make you pass exam easily.

## SolarWinds Network Performance Monitor (NPM) Exam Sample Questions (Q33-Q38):

### NEW QUESTION # 33

You run ten reports on three assorted weekly schedules and send the results to the network operations distribution list. The email address for the distribution list changed, and you must update the new email address to send the reports. How do you implement this update?

- A. Use the Action Manager to edit each action on each report schedule, and change the email address

- B. Make a copy of each report, edit the action to change the email address
- **C. Edit each action on each report schedule, and change the email address**
- D. Use the Schedule Manager to edit each action on each report schedule, and change the email address

**Answer: C**

#### NEW QUESTION # 34

What is the most time-efficient way to create a report in NPM that shows the top 50 interfaces by percent utilization?

- A. Create a new advanced SQL query report
- B. Run the default top 25 interfaces by percent utilization report for different timeframes
- C. Edit the default top 25 interfaces by percent utilization report and update to the top 50
- **D. Create an interface report and use a filter to restrict to the top 50**

**Answer: D**

#### NEW QUESTION # 35

How can you extend NPM's monitoring to non-standard devices?

- A. Polling with non-standard protocols
- **B. Using OIDs organized in MIBs**
- C. Deploying Orion agents
- D. Combining licenses from different products

**Answer: B**

#### NEW QUESTION # 36

How can you extend NPM's monitoring to non-standard devices?

- A. Polling with non-standard protocols
- **B. Using OIDs organized in MIBs**
- C. Deploying Orion agents
- D. Combining licenses from different products

**Answer: B**

Explanation:

NPM can monitor a wide range of network devices and infrastructure, including routers, switches, firewalls, servers, and virtual machines. However, some devices may not support standard protocols such as SNMP or WMI, or may have specific metrics that are not monitored out-of-the box by NPM. In such cases, you can extend NPM's monitoring to non-standard devices by using object identifiers (OIDs) organized in management information bases (MIBs). OIDs are numeric strings that uniquely identify a variable in a MIB.

MIBs are hierarchical databases that define the properties and values of the variables that can be monitored on a device. By importing device-specific MIBs into the SolarWinds MIB Database, and creating custom pollers based on OIDs from the MIBs, you can monitor any metric that is available on the device. You can also display the polled data in the web console using dedicated or existing resources<sup>12</sup>. References:
