Are you racking your brains for a method how to pass NVIDIA NCP-AII exam? NVIDIA NCP-AII certification test is one of the valuable certification in modern IT certification. Within the last few decades, IT got a lot of publicity and it has been a necessary and desirable part of modern life. NVIDIA certification has been well recognized by international community. So, most IT people want to improve their knowledge and their skills by NVIDIA certification exam. NCP-AII test is one of the most important exams and the certificate will bring you benefits.

With our NCP-AII test prep, you don't have to worry about the complexity and tediousness of the operation. As long as you enter the learning interface of our soft test engine of NCP-AII quiz guide and start practicing on our Windows software, you will find that there are many small buttons that are designed to better assist you in your learning. When you want to correct the answer after you finish learning, the correct answer for our NCP-AII test prep is below each question, and you can correct it based on the answer. In addition, we design small buttons, which can also show or hide the NCP-AII Exam Torrent, and you can flexibly and freely choose these two modes according to your habit. In short, you will find the convenience and practicality of our NCP-AII quiz guide in the process of learning. We will also continue to innovate and improve functions to provide you with better services.

**2026 NCP-AII Exam Study Guide 100% Pass | Reliable NCP-AII: NVIDIA AI Infrastructure 100% Pass**

Passing NVIDIA actual test will make you stand out from other people and you will have access to the big companies. But it is not an easy thing for you to prepare NCP-AII practice test. The best way for you is choosing a training tool to practice NCP-AII Study Materials. If you have no idea about the training tools, PassExamDumps will be your best partner in the way of passing the IT certification.

## NVIDIA AI Infrastructure Sample Questions (Q287-Q292):

### NEW QUESTION # 287

You are tasked with replacing a redundant power supply unit (PSU) in a GPU server. The server has two 2000W PSUs. One PSU has failed, but the server is still running. Which of the following actions is the safest and most efficient way to replace the faulty PSU?

- A. Replace the faulty PSU, then reboot the server to ensure the new PSU is working.
- B. Hot-swap the faulty PSU with a new one while the server is running.
- C. Wait for a scheduled maintenance window to power down the server and replace the PSU.
- D. Immediately power down the server and replace the faulty PSU.
- E. Document the failure and wait until the remaining PSU fails before taking action.

**Answer: B**

Explanation:

Hot-swapping is the designed method for replacing redundant PSUs in many server systems. This allows the server to remain operational while the faulty PSU is replaced, minimizing downtime. Powering down the server immediately is unnecessary and causes downtime. Waiting for a maintenance window or until the remaining PSU fails increases the risk of a complete server outage.

### NEW QUESTION # 288

You have a server with two NVIDIA GPUs connected via NVLink. You want to verify that NVLink is functioning correctly. Which command(s) or tool(s) can you use to check the NVLink status and bandwidth?

- A. 'nvidia-smi nvlink -status'
- B. nvcc -version'
- C. 'nvidia-settings' (GUI tool)
- D. 'nvidia-smi topo -m'
- E. Ispci'

**Answer: A,D**

Explanation:

'nvidia-smi nvlink -status' provides a direct overview of the NVLink status, including link speed and errors. 'nvidia-smi topo' shows the topology of the GPUs and how they are connected, including NVLink connections. 'Ispci' lists PCI devices but doesn't provide NVLink-specific information. 'nvcc -version' checks the CUDA compiler version. 'nvidia-settings' is a GUI tool that can display some information, but it's less precise than 'nvidia-smi' for NVLink status.

### NEW QUESTION # 289

You are designing an AI server infrastructure using NVIDIA HGX A100 modules. The server's power supply units (PSUs) are configured in a redundant (N+1) setup. The individual PSUs are rated for 3000W each, and the server contains three PSUs. If the expected peak power consumption of the HGX A100 modules and other components is 5500W, what is the safety margin (in Watts) in the power budget?

- A. 9000W
- B. 5000W
- C. 3500W
- D. 500W
- E. 0W

**Answer: D**

Explanation:

With N+1 redundancy and three 3000W PSUs, the total available power is  $3 \times 3000W = 9000W$  (N+1 means the system can tolerate one PSU failure). The safety margin is  $9000W - 5500W = 3500W$ .

### NEW QUESTION # 290

When installing multiple NVIDIA GPUs, which of the following factors are MOST important to consider regarding PCIe slot configuration?

(Choose two)

- A. Ensure each GPU is installed in a slot with sufficient PCIe lanes (e.g., x16).
- B. Ensure all GPUs have the same PCIe generation (e.g. Gen4).
- C. Ensure all GPUs are installed in slots of the same color.
- D. Install the GPUs in the lowest numbered slots first.
- E. Ensure the PCIe slots are directly connected to the CPU for optimal bandwidth.

**Answer: A,E**

Explanation:

The number of PCIe lanes directly impacts bandwidth. Direct CPU connection minimizes latency. Slot color and numbering are usually irrelevant. Same PCIe Gen isn't critical as long as minimum requirements are met.

### NEW QUESTION # 291

You are deploying a new NVLink Switch based cluster. The GPUs are installed in different servers, but need to be configured to utilize NVLink interconnect. Which of the following should be performed during the installation phase to confirm correct configuration?

- A. Verify that GPUDirect RDMA is enabled and functioning correctly.
- B. Run NCCL tests to verify the GPU-to-GPU bandwidth and latency between servers.
- C. Check that the 'nvidia-smi' command shows the correct NVLink topology.
- D. Run standard TCP/IP network bandwidth tests to check inter-server communication.
- E. All the GPU's are in the same IP subnet

**Answer: A,B,C**

Explanation:

NCCL tests are specifically designed to test GPU-to-GPU communication. Ensuring GPUDirect RDMA is functioning is essential for low-latency communication. 'nvidia-smi' should display the NVLink topology. TCP/IP tests do not test the NVLink connection. It does not matter if GPUs on different servers are in the same IP subnet as NVLink communication occur directly between the GPUs using RDMA mechanism. Subnetting affects traditional networking layer communication, but not low-level device communication.

### NEW QUESTION # 292

.....

With vast experience in this field, PassExamDumps always comes forward to provide its valued customers with authentic, actual, and genuine NCP-AII exam dumps at an affordable cost. All the NVIDIA AI Infrastructure (NCP-AII) questions given in the product are based on actual examination topics. PassExamDumps provides three months of free updates if you purchase the NVIDIA NCP-AII Questions and the content of the examination changes after that.

**NCP-AII Study Material:** <https://www.passexamdump.com/NCP-AII-valid-exam-dumps.html>

Therefore, for your convenience, more choices are provided for you, we are pleased to suggest you to choose our NCP-AII exam question for your exam. Besides, you can enjoy our 50% discount about NCP-AII PDF study guide after one year, which is because we always insist on principles of customers' needs go first. Yes, the passing rate of NCP-AII pass-sure materials is 99%.

Our NCP-AII study materials provide a promising help for your NCP-AII exam preparation whether newbie or experienced exam candidates are eager to have them.

A border is a component of the box model, so NCP-AII Study Material giving an element a border adds to the dimensions of the element. Therefore, for your convenience, more choices are provided for you, we are pleased to suggest you to choose our NCP-AII Exam Question for your exam.

# Professional NCP-AII Exam Study Guide & Trusted NCP-AII Study Material & New Premium NCP-AII Files

Besides, you can enjoy our 50% discount about NCP-AII PDF study guide after one year, which is because we always insist on principles of customers' needs go first.

Yes, the passing rate of NCP-AII pass-sure materials is 99%. With the development of scientific and technological progress, being qualified by some certifications plays an increasingly important role in our life.

Within one year of your purchase, NCP-AII enjoy free upgrades examination questions service.
