

ISO-IEC-27001-Foundation Authentic Exam Questions | Reliable APMG-International ISO-IEC-27001-Foundation: ISO/IEC 27001 (2022) Foundation Exam

2026 Latest TestPassed ISO-IEC-27001-Foundation PDF Dumps and ISO-IEC-27001-Foundation Exam Engine Free Share: https://drive.google.com/open?id=1LDTmB12Pj_WZ-z5ean14p3fd8wLSD29R

We develop many reliable customers with our high quality ISO-IEC-27001-Foundation prep guide. When they need the similar exam materials and they place the second even the third order because they are inclining to our ISO-IEC-27001-Foundation study braindumps in preference to almost any other. Compared with those uninformed exam candidates who do not have effective preparing guide like our ISO-IEC-27001-Foundation study braindumps, you have already won than them. Among wide array of choices, our products are absolutely perfect. Besides, from economic perspective, our ISO-IEC-27001-Foundation Real Questions are priced reasonably so we made a balance between delivering satisfaction to customers and doing our own jobs. So in this critical moment, our ISO-IEC-27001-Foundation prep guide will make you satisfied.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Cybersecurity: Cybersecurity, also known as IT security or computer security, involves safeguarding computer systems, networks, and data from unauthorized access, theft, damage, or disruption to ensure the integrity and availability of digital information.
Topic 2	<ul style="list-style-type: none"> Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 3	<ul style="list-style-type: none"> Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.
Topic 4	<ul style="list-style-type: none"> Self Confidence: Self-confidence is the belief in one's abilities, competence, and value, reflecting a sense of assurance and inner strength.

Latest ISO-IEC-27001-Foundation Dumps Sheet - Exam ISO-IEC-27001-Foundation Lab Questions

TestPassed has designed a APMG-International ISO-IEC-27001-Foundation pdf dumps format that is easy to use. Anyone can download ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation pdf questions file and use it from any location or at any time. APMG-International PDF Questions files can be used on laptops, tablets, and smartphones. Moreover, you will get actual ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation Exam Questions in this ISO/IEC 27001 (2022) Foundation Exam ISO-IEC-27001-Foundation pdf dumps file.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q22-Q27):

NEW QUESTION # 22

Which item is required to be defined when planning the organization's risk assessment process?

- A. The criteria for acceptable levels of risk
- B. The parts of the ISMS scope which are excluded from the risk assessment
- C. How the effectiveness of the method will be measured
- D. There are NO specific information requirements

Answer: A

Explanation:

Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.

Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.

Thus, the correct answer is C: The criteria for acceptable levels of risk.

NEW QUESTION # 23

Which statement describes Annex A of ISO/IEC 27001?

- A. Defines a mandatory list of controls that shall be implemented
- B. Defines the criteria for accepting risks
- C. Provides a reference list of information security controls and their requirements
- D. Provides measures to determine risk treatment effectiveness

Answer: C

Explanation:

Annex A of ISO/IEC 27001:2022 is titled:

"Reference control objectives and controls." It provides a reference list of information security controls, structured into 4 themes: organizational, people, physical, and technological.

The standard explicitly states in Clause 6.1.3: "Organizations can design controls as required or identify them from any source.

Annex A contains a list of possible information security controls." This means controls in Annex A are not mandatory (eliminating option C). Risk acceptance criteria (A) are defined in Clause 6.1.2, not Annex A. Annex A also does not provide measures for treatment effectiveness (D).

Thus, Annex A is best described as a reference list of information security controls. Correct answer: B.

NEW QUESTION # 24

Which attribute is NOT a required focus of continual ISMS improvement?

- A. Adequacy
- **B. Importance**
- C. Suitability
- D. Effectiveness

Answer: B

Explanation:

Clause 10.2 (Continual Improvement) specifies that the organization must "continually improve the suitability, adequacy and effectiveness of the information security management system." This makes it clear that three attributes are explicitly required to be addressed:

* Suitability: ensuring the ISMS continues to meet organizational needs in changing contexts.

* Adequacy: ensuring the ISMS covers the necessary scope and provides sufficient control coverage.

* Effectiveness: ensuring the ISMS achieves intended outcomes in protecting information security.

The word "importance" is not part of the continual improvement requirement. Importance is implicit in prioritization of risks and actions, but it is not a required continual improvement attribute in ISO/IEC 27001.

Therefore, option D: Importance is the correct choice as it is not specified.

This distinction reinforces that continual improvement is not about subjective importance, but about systematic enhancement of the ISMS's suitability, adequacy, and effectiveness.

NEW QUESTION # 25

Which output is a required result from risk analysis?

- A. Risk acceptance criteria
- B. Risk treatment control options
- C. Prioritized risks for treatment
- **D. Determined levels of risk**

Answer: D

Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

* "assess the potential consequences that would result if the risks identified... were to materialize;"

* "assess the realistic likelihood of the occurrence of the risks identified;"

* "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

NEW QUESTION # 26

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. None of the above
- B. ISO/IEC 27002
- **C. ISO/IEC 27013**
- D. ISO/IEC 20000-1

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but

integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.
Therefore, the correct verified answer is B: ISO/IEC 27013.

NEW QUESTION # 27

.....

TestPassed are supposed to help you pass the exam smoothly. Don't worry about channels to the best ISO-IEC-27001-Foundation study materials because we are the exactly best vendor in this field for more than ten years. And so many exam candidates admire our generosity of the ISO-IEC-27001-Foundation Practice Questions offering help for them. Up to now, no one has ever challenged our leading position of this area. With our ISO-IEC-27001-Foundation training guide, you will be doomed to pass the exam successfully.
