Answer: C

NEW QUESTION # 200
Match the user types on the left to the descriptions on the right by dragging the responses to the correct target areas. Responses may be used once, more than once, or not at all.

Answer Area

Options		Answer Area
Group		A special account with which anyone with physical access to a Mac can log in
Guest		An account with which you can share files with someone on a different computer, but not log in to a Mac
Standard		A user account that can perform tasks that require greater privileges than an administrator user account
Sharing Only		A user account that can add and manage other users, install apps, and change settings that affect all users on a Mac
Administrator		A user account that has full control over its own home folder and can install apps in it and has read access to most items, preferences, and apps
System Administrator (root)		

Answer:

Explanation:

Options list:
- Group
- Guest
- Standard
- Sharing Only
- Administrator
- System Administrator (root)

Answer Area

Selected	Description
Guest	A special account with which anyone with physical access to a Mac can log in
Sharing Only	An account with which you can share files with someone on a different computer, but not log in to a Mac
System Administrator (root)	A user account that can perform tasks that require greater privileges than an administrator user account
Administrator	A user account that can add and manage other users, install apps, and change settings that affect all users on a Mac
Standard	A user account that has full control over its own home folder and can install apps in it and has read access to most items, preferences, and apps

Options list:
- Group
- Guest
- Standard
- Sharing Only
- Administrator
- System Administrator (root)

Answer Area

Selected	Description
Guest	A special account with which anyone with physical access to a Mac can log in
Sharing Only	An account with which you can share files with someone on a different computer, but not log in to a Mac
System Administrator (root)	A user account that can perform tasks that require greater privileges than an administrator user account

Standard	A user account that has full control over its own home folder and can install apps in it and has read access to most items, preferences, and apps

NEW QUESTION # 201

What does Find My use to locate lost or missing devices?

- A. Wi-Fi
- B. Bluetooth
- C. Cellular Data
- D. Built in trackers

Answer: B

NEW QUESTION # 202

How can you control who can discover your iPhone or iPad when it's within AirDrop range?

- A. Turn off AirDrop in Privacy settings.
- B. Require a verification code from the other device in Password & Security settings.
- C. Set AirDrop to Contacts Only.

Answer: C

Explanation:
According to the Apple Device Support Reference Materials, you can control who can discover your iPhone or iPad when it's within AirDrop range by setting AirDrop to Contacts Only1. This means that only people in your Contacts app can see your device and send you content via AirDrop. You can also set AirDrop to Receiving Off, which means that no one can see your device or send you content via AirDrop1. The other two options, B and C, are not correct because they are not related to AirDrop settings. Requiring a verification code from the other device in Password & Security settings is a feature that helps you sign in to your Apple ID account on a new device2. Turning off AirDrop in Privacy settings is not possible, as AirDrop is not listed under Privacy settings3. References: 1: How to use AirDrop on your iPhone or iPad - Apple Support, Section "How to adjust AirDrop settings". 2: Sign in with your Apple ID - Apple Support, Section "Use a verification code with two-factor authentication". 3: Privacy settings on iPhone - Apple Support
