Reliable C_SIGDA_2403 Real Test - Test C_SIGDA_2403 Guide

We PDFBraindumps are built in years of 2010. Recent years we are offering reliable certification C_SIGDA_2403 exam torrent materials and gain new & old customers' praise based on our high pass rate. We put much emphasis on our C_SIGDA_2403 exam questios quality and we are trying to provide the best after-sale customer service on C_SIGDA_2403 training guide for buyers. If you are looking for professional & high-quality C_SIGDA_2403 preparation materials, you can trust us and choose our C_SIGDA_2403 study materials. Our C_SIGDA_2403 exam guide is able to help you clear exams at the first attempt.

SAP Certified Associate - Process Data Analyst - SAP Signavio Sample Questions (Q41-Q46):

NEW QUESTION # 41

What are some of the capabilities of Correction Recommendations? Note: There are 2 correct answers to this question.

- A. Step-by-step instructions on how to improve the identified inefficiency
- B. Impact on process performance when applying a given recommendation
- C. Determination of how common a certain correction is with others in your industry
- D. Relevance rating of a recommendation based on the usage of transactions or reports

Answer: A,B

Explanation:
Correction Recommendations in SAP Signavio Process Intelligence provide actionable suggestions to address process inefficiencies identified during analysis. The documentation details their capabilities:
* Exact Extract:"Correction Recommendations offer:
* Step-by-step instructions to guide users in implementing improvements for identified process inefficiencies, such as reducing bottlenecks.
* Analysis of the potential impact on process performance, such as reduced cycle time or cost, when applying a recommendation."
(SAP Signavio Process Intelligence User Guide, section on
"Correction Recommendations").
* Explanation:
* Option A (Step-by-step instructions on how to improve the identified inefficiency):
Correction Recommendations include detailed guidance, such as modifying a process step or adjusting resource allocation, to resolve issues like delays or non-compliance.
* Option C (Impact on process performance when applying a given recommendation):
Recommendations provide estimates of performance improvements, such as reduced processing time or lower error rates, helping users prioritize actions.
* Option B (Determination of how common a certain correction is with others in your industry)is incorrect as Correction Recommendations are based on internal process data, not industry-wide comparisons, which are part of benchmarking features.
* Option D (Relevance rating of a recommendation based on the usage of transactions or reports)is incorrect because relevance is determined by process data analysis, not transaction or report usage.
Reference:SAP Signavio Process Intelligence User Guide, section on "Correction Recommendations"; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 4: Improvement Recommendations.

NEW QUESTION # 42

How can KPIs be visualized in the SAP Signavio Process Collaboration Hub? Note: There are 3 correct answers to this question.

- A. By adding live KPIs into the process
- B. By workflow mining
- C. By monitoring Widgets
- D. By case exporting
- E. By adding live KPIs into the Customer Journey Map

Answer: A,C,E

Explanation:
The SAP Signavio Process Collaboration Hub is designed to share and visualize process-related information, including Key Performance Indicators (KPIs), to stakeholders. According to the official SAP Signavio documentation, KPIs can be visualized in the Collaboration Hub in multiple ways to enhance process transparency and monitoring. Specifically:
* Option A (By adding live KPIs into the Customer Journey Map):The Collaboration Hub allows integration of live KPIs into Customer Journey Maps to provide real-time insights into customer interactions and process performance. This is a standard feature for visualizing KPIs in context.
* Option C (By monitoring Widgets):Widgets in the Collaboration Hub, such as the Value Widget or Process Performance Widgets, are used to display KPIs dynamically. These widgets can be configured to show metrics like process efficiency or cycle times, making them a key tool for KPI visualization.
* Option D (By adding live KPIs into the process):KPIs can be embedded directly into process models within the Collaboration Hub, allowing users to monitor performance metrics alongside process diagrams in real time.
* Option B (By case exporting)is incorrect because case exporting refers to extracting data for external analysis, not visualizing KPIs within the Hub.
Reference:SAP Signavio Process Collaboration Hub documentation, section on KPI visualizationand widget configuration; SAP Certified Associate - Process Data Analyst Study Guide, Chapter 3: Collaboration Hub Features.

NEW QUESTION # 43

Which components are included to configure ETL data pipelines in SAP Signavio Process Intelligence? Note: There are 3 correct answe rs to this questio n.

- A. Data Integration Management
- B. Data Model Management
- C. Data Object Management
- D. Data Source Management
- E. Data Relation Management

Answer: A,B,D

NEW QUESTION # 44

What are some benefits of using metrics and the Metric Library in SAP Signavio Process Intelligence? Note: There are 3 correct answe rs to this questio n.

- A. You can create reusable Widgets like a case table
- B. You can create custom metrics using and variables
- C. You can add prebuilt metrics from the metric library
- D. You can share metrics between workspaces
- E. You can install accelerators

Answer: B,C,D

NEW QUESTION # 45

What most accurately describes the availability of the guided analysis?

- A. All process flows have a guided analysis.
- B. Only Innovation recommendations have a guided analysis.
- C. Some process flows have a guided analysis.
- D. Only correction recommendations have a guided analysis.

Answer: C

NEW QUESTION # 46

......
