Valid JN0-452 Vce Dumps | Test JN0-452 Guide Online

Perhaps you have had such an unpleasant experience about JN0-452 exam questions you brought in the internet was not suitable for you in actual use, to avoid this, our company has prepared JN0-452 free demo in this website for our customers, with which you can have your first-hand experience before making your final decision. The content of the free demo is part of the content in our real JN0-452 Study Guide. And you can see how excellent our JN0-452 training dumps are!

Juniper Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) Sample Questions (Q28-Q33):

NEW QUESTION # 28

Which two statements accurately describe the Juniper Mist cloud architecture? (Choose two.)

- A. It is built on a modern microservices cloud architecture.
- B. It provides 100% API-based programmability for automation and integration.
- C. It relies on a monolithic software architecture running on a central controller.
- D. All network traffic from APs is tunneled to the Mist cloud by default.

Answer: A,B

NEW QUESTION # 29

What is a key difference in RF propagation characteristics between the 2.4 GHz and 5 GHz bands?

- A. 2.4 GHz signals are more easily absorbed by common building materials like drywall and concrete.
- B. 2.4 GHz signals, having a longer wavelength, are better at penetrating physical obstacles.
- C. 5 GHz signals generally have a longer effective range in open-air environments.
- D. The 5 GHz band is more susceptible to interference from non-Wi-Fi devices like Bluetooth and microwave ovens.

Answer: B

NEW QUESTION # 30

The customer wants to broadcast a WLAN at a certain time and day of the week. Which statement is correct in this scenario?

- A. Third-party integration is required to achieve this requirement.
- B. Mist supports this function with an additional subscription.
- C. APs need to be upgraded for this feature.
- D. SSID scheduling should be configured.

Answer: D

Explanation:

If a customer wants to broadcast a WLAN at a certain time and day of the week, SSID scheduling should be configured. According to the SSID Scheduling - Mist document 1, SSID scheduling is a feature that allows you to customize your WLAN by choosing the exact days and times to broadcast the SSID. This feature can be useful for scenarios where you want to limit the availability of a WLAN to a certain time and day of the week.

NEW QUESTION # 31

Which type of 802.11 management frame is responsible for carrying information such as the SSID, supported data rates, and security capabilities, and is periodically broadcast by an access point so that clients can passively discover the network?

- A. Probe Request
- B. Association Request
- C. Beacon
- D. Authentication

Answer: C

NEW QUESTION # 32

Mist WLAN objects are configurable at which two levels? (Choose two.)

- A. site group

- B. access point
- C. organization
- D. site

Answer: A,D

Explanation:

According to the Mist documentation¹, WLANs are wireless networks that can be configured with different settings such as SSID, security, encryption, authentication, etc. WLANs can be created and managed at different levels of hierarchy in the Mist cloud.

The site group level allows you to create and apply WLANs to a group of sites that share common characteristics or requirements². This helps you to simplify and standardize your WLAN configuration across multiple sites.

The site level allows you to create and manage WLANs for a specific site that may have unique needs or preferences¹. This gives you more flexibility and granularity for your WLAN configuration at each site.

NEW QUESTION # 33

.....

Now you do not need to worry about the relevancy and top standard of 2Pass4sure Mist AI Wireless, Specialist (JNCIS-MistAI-Wireless) (JN0-452) exam questions. These Juniper JN0-452 dumps are designed and verified by qualified JN0-452 exam trainers.
