TDS-C01 Valid Test Forum, TDS-C01 Valid Test Answers

The goal of a Tableau TDS-C01 mock exam is to test exam readiness. Exam4PDF's online Tableau Desktop Specialist TDS-C01 practice test can be accessed online through all major browsers such as Chrome, Firefox, Safari, and Edge. You can also download and install the offline version of Tableau Desktop Specialist TDS-C01 Practice Exam software on Windows-based PCs only. You can prepare for the Tableau Desktop Specialist exam without an internet connection using the offline version of the mock exam.

Tableau Desktop Specialist Sample Questions (Q80-Q85):

NEW QUESTION # 80

Which of the following returns the Absolute Value of a given number?

- A. ZN(Number)
- B. ABS(Number)
- C. FLOOR(Number)
- D. CEILING(Number)

Answer: B

Explanation:
From the official Tableau website:

Function	Syntax	Description
ABS	ABS (number)	Returns the absolute value of the given number. Examples: <pre>ABS(-7) = 7</pre> <pre>ABS([Budget Variance])</pre> The second example returns the absolute value for all the numbers contained in the Budget Variance field.
CEILING	CEILING(number)	Rounds a number to the nearest integer of equal or greater value. Example: <pre>CEILING(3.1415) = 4</pre>
FLOOR	FLOOR(number)	Rounds a number to the nearest integer of equal or lesser value. Example: <pre>FLOOR(3.1415) = 3</pre>
ZN	ZN(expression)	Returns the expression if it is not null, otherwise returns zero. Use this function to use zero values instead of null values. Example: <pre>ZN([Profit]) = [Profit]</pre>

NEW QUESTION # 81

Tableau will automatically create a hierarchy for which two kinds of data? (Choose two.)

- A. String
- B. Date
- C. Geographic
- D. Date & Time

Answer: B,D

NEW QUESTION # 82

Which of the following are valid reasons to use a Tableau Data Extract (.tde) over Live Connections?

- A. To support additional functionality such as count distinct
- B. To have access to the freshest possible data at all times
- C. Fast to create
- D. Help improve performance

Answer: A,C,D

Explanation:

From the official documentation, the following are the major advantages of using Tableau Data Extracts:

Extracts are advantageous for several reasons:

- **Supports large data sets:** You can create extracts that contain billions of rows of data.
- **Fast to create:** If you're working with large data sets, creating and working with extracts can be faster than working with the original data.
- **Help improve performance:** When you interact with views that use extract data sources, you generally experience better performance than when interacting with views based on connections to the original data.
- **Support additional functionality:** Extracts allow you to take advantage of Tableau functionality that's not available or supported by the original data, such as the ability to compute Count Distinct.
- **Provide offline access to your data:** Extracts allow you to save and work with the data locally when the original data is not available. For example, when you are traveling.

From Tableau 2020.2 onwards, .hyper is the recommended way since it is faster than .tde!

NEW QUESTION # 83

What are two use cases for a story? (Choose two.)

- A. To allow for easier exporting to Power Point.
- B. Provide additional editing and interactive capabilities to your audience.
- C. Assemble a sequenced analysis to share with collaborators.
- D. Present a data narrative to lead your audience to your conclusions.

Answer: C,D

Explanation:

The general rule for a story is to present a narrative for the audiences to draw the required conclusion. The story in Tableau software is no different. Another way to present a story is to gather logical analysis that flow harmoniously and share it with those who are interested in it.

NEW QUESTION # 84

You can _____ your data to combine two or more tables by appending values (rows) from one table to another

- A. join
- B. union
- C. blend
- D. concatenate

Answer: B

Explanation:

Explanation

You can union your data to combine two or more tables by appending values (rows) from one table to another.

To union your data in Tableau data source, the tables must come from the same connection.

For example, suppose you have the following customer purchase information stored in three tables, separated by month. The table names are "May2016," "June2016," and "July2016."

May2016				June2016				July2016			
DAY	CUSTOMER	PURCHASES	TYPE	DAY	CUSTOMER	PURCHASES	TYPE	DAY	CUSTOMER	PURCHASES	TYPE
4	Lane	5	Credit	1	Lisa	3	Credit	2	Mario	2	Credit
10	Chris	6	Credit	28	Isaac	4	Cash	15	Wei	1	Cash
28	Juan	1	Credit	28	Sam	2	Credit	21	Jim	7	Cash

A union of these tables creates the following single table that contains all rows from all tables.

Union			
DAY	CUSTOMER	PURCHASES	TYPE
4	Lane	5	Credit
10	Chris	6	Credit
28	Juan	1	Credit
1	Lisa	3	Credit
28	Isaac	4	Cash
28	Sam	2	Credit
2	Mario	2	Credit
15	Wei	1	Cash
21	Jim	7	Cash

NEW QUESTION # 85

.....
