DP-900 Reliable Study Questions & DP-900 Reliable Dumps Book

Only if you download our software and practice no more than 30 hours will you attend your test confidently. Because our DP-900 exam torrent can simulate limited-timed examination and online error correcting, it just takes less time and energy for you to prepare the DP-900 exam than other study materials. As is known to us, maybe you are a worker who is busy in your career. Therefore, purchasing the DP-900 Guide Torrent is the best and wisest choice for you to prepare your test. If you buy our DP-900 questions torrent, the day of regretting will not come anymore.

The DP-900 Certification Exam is an excellent starting point for individuals who are looking to build a strong foundation in data analytics and data management. Microsoft Azure Data Fundamentals certification covers a wide range of topics, including data storage options, data processing technologies, data security, and data analytics. DP-900 exam is designed to test the candidate's understanding of these concepts and their ability to work with various Azure data services. Microsoft Azure Data Fundamentals certification exam is also a great way for professionals to enhance their skills in the field of data management and data analytics, which can help them advance their careers in the industry.

Microsoft Azure Data Fundamentals Sample Questions (Q107-Q112):

NEW QUESTION # 107

Match the Azure services to the appropriate requirements.

To answer, drag the appropriate service from the column on the left to its requirement on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

□

Answer:

Explanation:

Explanation

Box 1: Azure Data Factory

Box 2: Azure Data Lake Storage

Azure Data Lake Storage (ADLA) now natively supports Parquet files. ADLA adds a public preview of the native extractor and outputter for the popular Parquet file format Box 3: Azure Synapse Analytics Use Azure Synapse Analytics Workspaces.

NEW QUESTION # 108

You need to create an Azure Storage account.

Data in the account must replica outside the Azure region automatically.

Which two types of replica can you us for the storage account? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one pint.

- A. read-access geo-redundant storage (RA_GRS)
- B. geo-redundant storage (GRS)
- C. zone-redundant storage (ZRS)
- D. locally-redundant storage (LRS)

Answer: A,B

Explanation:

Explanation

Azure Storage offers two options for copying your data to a secondary region:

Geo-redundant storage (GRS)

Geo-zone-redundant storage (GZRS)

With GRS or GZRS, the data in the secondary region isn't available for read or write access unless there is a failover to the secondary region. For read access to the secondary region, configure your storage account to use read-access geo-redundant storage (RA-GRS) or read-access geo-zone-redundant storage (RA-GZRS).

NEW QUESTION # 109

Match the datastore services to the appropriate descriptions.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE:Each correct match is worth one point.

Answer:

Explanation:

Explanation

Box 1: Azure Cosmos DB

In Azure Cosmos DB's SQL (Core) API, items are stored as JSON. The type system and expressions are restricted to deal only with JSON types.

Box 2: Azure Files

Azure Files offers native cloud file sharing services based on the SMB protocol.

NEW QUESTION # 110

Select the answer that correctly completes the sentence.

Answer:

Explanation:

NEW QUESTION # 111
