

# Latest 1Z0-1163-1 Braindumps Free, 1Z0-1163-1 Test Guide

DOWNLOAD the newest DumpsMaterials 1Z0-1163-1 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1qkN47INQMSMnDVJ1wuASH2QC1kz44-FI>

So we can say that the Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) practice test questions are real, valid, and updated and these will greatly help you in 1Z0-1163-1 exam preparation. The availability of Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam questions in three different formats, free demo download facility, affordable price, free three months updated 1Z0-1163-1 Exam Questions download facility, and verified and real Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 (1Z0-1163-1) exam questions are the top features of DumpsMaterials 1Z0-1163-1 exam questions.

## Oracle 1Z0-1163-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>Oracle Cloud Success Navigator &amp; Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>OMBPs for Supply Chain Planning: This section assesses the knowledge of Supply Chain Planners in managing planning modules within Oracle SCM. It explains process flows, integration points, and how different planning modules work together. Candidates will learn about best practices for designing efficient planning workflows and key metrics used to measure supply chain responsiveness and effectiveness.</li></ul>

Topic 6	<ul style="list-style-type: none"> <li>• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.</li> </ul>

The site of DumpsMaterials is well-known on a global scale. Because the training materials it provides to the IT industry have no-limited applicability. This is the achievement made by IT experts in DumpsMaterials after a long period of time. They used their knowledge and experience as well as the ever-changing IT industry to produce the material. The effect of DumpsMaterials's Oracle 1Z0-1163-1 Exam Training materials is reflected particularly good by the use of the many candidates. If you participate in the IT exam, you should not hesitate to choose DumpsMaterials's Oracle 1Z0-1163-1 exam training materials. After you use, you will know that it is really good.

## Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q34-Q39):

### NEW QUESTION # 34

What is the purpose of the Back-to-Back Order Fulfillment process in Oracle Fusion Cloud SCM?

- A. It links customer orders to supplier purchase orders for direct fulfillment.
- B. It delays order fulfillment until inventory is replenished.
- C. It eliminates the need for supplier collaboration.
- D. It prioritizes warehouse stock over supplier sourcing.

**Answer: A**

Explanation:

The Back-to-Back Order Fulfillment process (D) links customer orders directly to supplier purchase orders, enabling direct fulfillment without relying solely on existing inventory. For example, a customer orders 50 custom widgets; the system generates a PO to the supplier, who ships directly or via the warehouse, reducing stock holding. Option A is incorrect-it favors supplier sourcing when stock is unavailable. Option B is false-it accelerates, not delays, fulfillment. Option C is wrong-supplier collaboration is essential. This process cuts inventory costs, speeds delivery, and supports make-to-order models efficiently.

### NEW QUESTION # 35

What is the primary purpose of the Demand to Management OMBP in Oracle Fusion Cloud SCM?

- A. It focuses only on local inventory availability.
- B. It ensures accurate demand forecasting and planning.
- C. It eliminates the need for supplier collaboration.
- D. It guarantees same-day delivery for all orders.

**Answer: B**

Explanation:

The Demand to Management OMBP (C) in Oracle Fusion Cloud SCM ensures accurate demand forecasting and planning,

translating market signals into actionable supply strategies. It uses tools like machine learning and collaborative forecasting to predict demand-e.g., forecasting 1,000 units for a holiday season-and aligns inventory and production accordingly. Option A is incorrect-it addresses enterprise-wide demand, not just local stock. Option B is false-no process guarantees same-day delivery; it focuses on planning. Option D is wrong-supplier collaboration is integral to fulfilling demand. This OMBP minimizes overstocking or shortages, optimizing resources and enhancing customer service through precise planning.

#### NEW QUESTION # 36

Which feature in Oracle Fusion Cloud SCM assesses and approves suppliers based on compliance and performance criteria?

- **A. Supplier Qualification Management.**
- B. Manufacturing Execution.
- C. Supplier Portal.
- D. Cost Accounting.

**Answer: A**

Explanation:

Supplier Qualification Management (D) assesses and approves suppliers based on compliance (e.g., regulatory standards) and performance criteria (e.g., delivery reliability). For example, it might evaluate a supplier's 95% on-time delivery rate and ISO certification before approval. Option A (Cost Accounting) tracks costs, not supplier quality. Option B (Supplier Portal) facilitates communication, not qualification. Option C (Manufacturing Execution) manages production, not supplier vetting. This feature ensures reliable, high-quality suppliers, reducing supply chain risks and enhancing procurement outcomes.

Reference:

Below is the batch of questions formatted as requested, with comprehensive and detailed explanations verified against Oracle Fusion Cloud Applications SCM and Procurement documentation. Each explanation is extensive, covering the reasoning behind the correct answer, why other options are incorrect, practical examples, and the broader implications within the SCM or Procurement framework. All questions have four options, so the format includes A, B, C, and D. Note that Question 11 was included in this batch as it aligns with the pattern of your request.

#### NEW QUESTION # 37

What is a primary function of Cost Accounting in Oracle Fusion Cloud SCM?

- **A. It tracks and analyzes manufacturing costs to support financial reporting and decision-making.**
- B. It records only customer payments, excluding supplier invoices.
- C. It prevents any fluctuations in material costs.

**Answer: A**

Explanation:

Cost Accounting in Oracle Fusion Cloud SCM is designed to track and analyze costs associated with manufacturing processes, including material, labor, and overhead expenses. This function supports financial reporting by providing detailed cost data and aids decision-making by offering insights into cost drivers and profitability. Option A is incorrect because cost accounting does not prevent fluctuations-it records and manages them. Option B is wrong as it encompasses supplier-related costs, not just customer payments. By maintaining accurate cost records, this module ensures compliance with accounting standards and enables strategic cost management.

#### NEW QUESTION # 38

Which key metric measures the effectiveness of the Demand to Management OMBP in Oracle Fusion Cloud SCM?

- A. Inventory Turnover, which tracks the speed of inventory movement.
- B. Supplier Lead Time, which measures supplier response efficiency.
- **C. Forecast Accuracy, evaluates the precision of demand predictions against actual market demand.**

**Answer: C**

Explanation:

For the Demand to Management OMBP, Forecast Accuracy is the primary metric, as it evaluates how precisely demand predictions match actual market demand, a foundational step in effective supply chain planning. Calculated as a percentage (e.g., actual demand
