

Web-Based CheckPoint 156-536 Practice Test - Compatible with All Major Browsers

BONUS!!! Download part of TopExamCollection 156-536 dumps for free: https://drive.google.com/open?id=1Rr2JCjNDB6MWXOK7vDNaJAWTu_JQHdiD

You can find features of this CheckPoint 156-536 prep material below. All smart devices are suitable to use CheckPoint 156-536 pdf dumps of TopExamCollection. Therefore, you can open this CheckPoint 156-536 real dumps document and study for the CheckPoint 156-536 test at any time from your comfort zone. These 156-536 Dumps are updated, and TopExamCollection regularly amends the content as per new changes in the 156-536 real certification test.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshooting: In this final section, CheckPoint Security Administrators will demonstrate their troubleshooting skills related to Harmony Endpoint. This involves identifying and resolving issues that may arise during deployment or operation of the endpoint security solution.
Topic 2	• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.
Topic 3	• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 4	• Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.
Topic 5	• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.
Topic 6	• Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.

Perfect 156-536 Exam Braindumps by TopExamCollection

There is no doubt they are clear-cut and easy to understand to fulfill your any confusion about the exam. Our Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) exam question is applicable to all kinds of exam candidates who eager to pass the exam. Last but not the least, they help our company develop brand image as well as help a great deal of exam candidates pass the exam with passing rate over 98 percent of our 156-536 real exam materials. Considering many exam candidates are in a state of anguished mood to prepare for the Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) exam, our company made three versions of 156-536 Real Exam materials to offer help. All these variants due to our customer-oriented tenets. As a responsible company over ten years, we are trustworthy. In the competitive economy, this company cannot remain in the business for long.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q54-Q59):

NEW QUESTION # 54

What does FDE software combine to authorize access to data on desktop computers and laptops?

- A. Decryption
- **B. OS boot protection with pre-boot authentication and encryption**
- C. Post-logon authentication and encryption
- D. OS boot protection and post-boot authentication

Answer: B

NEW QUESTION # 55

Which command in a CLI session is used to check installed licenses on the Harmony Endpoint Management Server?

- A. show licenses all
- **B. cplic print -x**
- C. cplic print +x</license>
- D. cplic add <license filename="">

Answer: B

NEW QUESTION # 56

One of the ways to install Endpoint Security clients is 'Automatic Deployment'. Which of this is true for automatic deployment of Endpoint Security clients?

- A. For automatic deployment to work, the client system must have SVN Foundation enabled in Windows 10 or downloaded and installed on other operating systems
- **B. Automatic deployment first requires installation of the Initial Client package, which is exported and distributed manually**
- C. Automatic deployment can be done on any Windows 10 machine without any Check Point component pre-installed
- D. Automatic deployment can be done on any Windows machine with Check Point SmartConsole first installed

Answer: B

NEW QUESTION # 57

The CISO office evaluates Check Point Harmony Endpoint and needs to know what kind of post-infection capabilities exist. Which post-infection capabilities does the Harmony Endpoint Suite include?

- **A. Automated Attack Analysis (Forensics), Remediation and Response, and Quarantine**
- B. IPS Attack Analysis (Forensics), Deploy and Destroy, and Isolation
- C. FW Attack Analysis (Forensics), Detect and Prevent, and Isolation

- D. IPS Attack Analysis (Forensics), Detect and Prevent, and Isolation

Answer: A

NEW QUESTION # 58

Where are the Endpoint Policy Servers located?

- A. Between the Endpoint clients and the SMS
- B. Between the Endpoint clients and the EPS
- C. Between the Endpoint clients and the NMS
- **D. Between the Endpoint clients and the EMS**

Answer: D

Explanation:

Endpoint Policy Servers (EPS) are integral to the Harmony Endpoint architecture, designed to optimize communication between Endpoint clients and the Endpoint Security Management Server (EMS). The CP_R81.

20_Harmony_Endpoint_Server_AdminGuide.pdf explicitly defines their placement.

On page 25, under "Optional Endpoint Security Elements," the documentation states:

"Endpoint Policy Servers improve performance in large environments by managing most communication with the Endpoint Security clients. Managing the Endpoint Security client communication decreases the load on the Endpoint Security Management Server, and reduces the bandwidth required between sites." This confirms that EPS are positioned between the Endpoint clients and the EMS, handling tasks like policy downloads, heartbeats, and updates to offload the EMS. Option B accurately reflects this architecture.

Evaluating the other options:

* Option A: "Between the Endpoint clients and the EPS" is nonsensical, as EPS (Endpoint Policy Servers) cannot be between themselves and clients—it's a self-referential error.

* Option C: "Between the Endpoint clients and the NMS" introduces "NMS," likely a typo for Network Management System, which isn't part of Harmony Endpoint's architecture per the document.

* Option D: "Between the Endpoint clients and the SMS" refers to the Security Management Server (SMS), which manages gateways in Check Point's broader ecosystem, not the EMS specific to Harmony Endpoint (see page 23 for EMS definition). Thus, Option B is directly supported by the documentation as the correct placement of EPS.
