- B. To capture a static label on the screen that should be checked during test execution
- C. To capture text in a message screen that can be used for data binding later
- D. To capture a value in a text field that should be stored as a variable

Answer: B,D

Explanation:

Comprehensive and Detailed in Depth Explanation:

In SAP S/4HANA Cloud's Test Automation Tool (available via SAP Cloud ALM), the "Read" button is used during test script

Option A (To capture a static label on the screen that should be checked during test execution): Correct. Static labels (e.g., field names or titles) are often captured to verify UI consistency or screen navigation during test runs. This ensures the test validates expected screen content.

Option C (To capture an error message on the screen that can be used later): Incorrect. While error messages can be validated, the "Read" button is not typically used for this; instead, assertions or specific error-handling steps are recorded separately.
