## Reliable CBCI Test Camp - Test CBCI Lab Questions

With the development of economic globalization, your competitors have expanded to a global scale. Obtaining an international CBCI certification should be your basic configuration. What I want to tell you is that for CBCI Preparation materials, this is a very simple

matter. And as we can claim that as long as you study with our CBCI learning guide for 20 to 30 hours, then you will pass the exam as easy as pie.

## BCI Certificate of the Business Continuity Institute (CBCI) Sample Questions (Q45-Q50):

### NEW QUESTION # 45

When establishing a Business Continuity Management System (BCMS), engagement with stakeholders is important. Which of the following is NOT a reason for engaging with internal stakeholders?

- A. Early collaboration with colleagues will engage them in the process and secure support for the ongoing development and implementation of the BCMS
- B. Existing policies and procedures may be relevant to the BCMS so early identification will reduce the risk for duplication of work
- C. Engagement of stakeholders will reduce the potential for conflict at later stages of the programme
- D. Involving stakeholders will reduce the workload and responsibilities of the Business Continuity Professional as administrative activities can be delegated to other staff

**Answer: D**

Explanation:

While stakeholder engagement facilitates collaboration, reduces conflict, and helps identify relevant policies, it does not primarily serve to lessen the workload of the Business Continuity Professional by delegating administrative tasks. The CBCI 7.0 course clarifies that stakeholder involvement is about gaining support, expertise, and ownership rather than shifting administrative burdens. The Business Continuity Professional retains core responsibility for managing the BCMS, though collaboration supports efficient and effective program delivery.

Reference: CBCI 7.0 Study Guide, Module 1: Stakeholder Engagement, pages 19-22.

### NEW QUESTION # 46

Which of the following is a step that would be taken by the Business Continuity professional to support the process to advance an organization from embedding to embracing Business Continuity?

- A. Including funding in the Business Continuity budget to hire a consulting firm to run Business Continuity as a project
- B. Assigning Business Continuity roles and responsibilities across the organization's hierarchy
- C. Development and adoption of a Business Continuity policy to protect the organization from disruptions
- D. Gaining an understanding of the organization's culture

**Answer: D**

Explanation:

The CBCI 7.0 course identifies gaining an understanding of the organization's culture as a foundational step in moving from merely embedding Business Continuity practices to fully embracing them. Cultural insights enable targeted interventions that align Business Continuity with existing values, beliefs, and behaviours, enhancing engagement and ownership. Policies and role assignments are important but less effective without cultural alignment. Outsourcing continuity as a project risks detachment from organizational realities. Understanding culture guides effective communication, training, and leadership strategies that foster a pervasive continuity mindset.

Reference: CBCI 7.0 Study Guide, Module 4: Culture and Engagement, pages 66-69.

### NEW QUESTION # 47

When considering solutions for supplier strategies, the Business Continuity professional should ensure that:

- A. Suppliers can deliver high-quality products and services during business as usual situations
- B. Suppliers have capability that aligns with the organization's Recovery Time Objectives (RTOs) that rely on them
- C. Priority should be given to existing suppliers
- D. The solutions are reviewed by procurement prior to approval

**Answer: B**

Explanation:

Aligning supplier capabilities with the organization's RTOs is essential to maintain continuity of critical supply chain functions. The CBCI 7.0 course specifies that suppliers must be able to recover and deliver their products or services within timeframes that meet the organization's recovery requirements to avoid operational disruption. While quality in business as usual and procurement review are important, they do not guarantee supplier resilience. Prioritizing existing suppliers solely on relationship basis without evaluating continuity capability risks supply failures. Ensuring RTO alignment is a critical criterion in supplier strategy development. Reference: CBCI 7.0 Study Guide, Module 5: Supplier and Resource Strategies, pages 97-100.

#### NEW QUESTION # 48

Which of the following is an indicator that top management is embracing Business Continuity?

- A. The organization maintains full compliance with legal and regulatory requirements
- B. The organization's health and safety risk assessments are recorded as required
- C. Business Continuity is part of the organization's strategic planning and is reviewed regularly
- D. The organization's Business Continuity operational plans are kept up to date

**Answer: C**

Explanation:

The CBCI 7.0 course identifies the integration of Business Continuity into the organization's strategic planning with regular reviews as a clear sign of top management's commitment. Strategic incorporation ensures Business Continuity is prioritized, resourced, and aligned with long-term objectives, reflecting leadership's recognition of its importance. Regular review cycles demonstrate ongoing engagement and responsiveness to changing risks. While legal compliance, health and safety management, and operational plan maintenance are important, they may occur without active leadership endorsement. True embracement requires embedding Business Continuity in strategic decision-making and organizational culture.

Reference: CBCI 7.0 Study Guide, Module 1: Leadership and Commitment, pages 23-26.

#### NEW QUESTION # 49

Which of the following is NOT an outcome that will result from an organization embracing Business Continuity?

- A. Business Continuity tasks being given greater priority and completed on time
- B. A reduction in the need to carry out maintenance activities and regular plan reviews and updates
- C. A Business Continuity programme that is fit for purpose and adequately sized for the organization
- D. Recognition by interested parties of areas where Business Continuity adds value to their operation

**Answer: B**

Explanation:

Embracing Business Continuity increases commitment to ongoing maintenance, including regular plan reviews and updates, to ensure plans remain effective and relevant. The CBCI 7.0 course highlights that a strong Business Continuity culture does not reduce maintenance needs; rather, it ensures such activities are prioritized and valued. Reduction in maintenance requirements would signal neglect, risking preparedness.

Other outcomes include prioritization of tasks and external recognition of Business Continuity's value.

Reference: CBCI 7.0 Study Guide, Module 4: Developing a Business Continuity Culture, pages 67-70.

#### NEW QUESTION # 50

.....

Many clients may worry that if they buy our product they will fail in the exam but we guarantee to you that our CBCI study questions are of high quality and can help you pass the exam easily and successfully. Our product boasts 99% passing rate and high hit rate so you needn't worry that you can't pass the exam.
