Each format of the Oracle Certification Exams not only offers updated exam questions but also additional benefits. A free trial of the Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) exam dumps prep material before purchasing, up to 1 year of free updates, and a money-back guarantee according to terms and conditions are benefits of buying Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) real questions today. A support team is also available 24/7 to answer any queries related to the Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional (1Z0-1055-25) exam dumps.

Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.
Topic 2	<ul style="list-style-type: none">Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.

Topic 3	<ul style="list-style-type: none"> Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.
Topic 4	<ul style="list-style-type: none"> Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.
Topic 5	<ul style="list-style-type: none"> Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.

1Z0-1055-25 VCE Exam Simulator | Valid Braindumps 1Z0-1055-25 Questions

Our 1Z0-1055-25 practice guide is cited for the outstanding service. In fact, we have invested many efforts to train our workers. All workers will take part in regular training to learn our 1Z0-1055-25 study materials. So their service spirits are excellent. We have specific workers to be responsible for answering customers' consultation about the 1Z0-1055-25 Learning Materials. All our efforts are aimed to give the best quality of 1Z0-1055-25 exam questions and best service to our customers.

Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q19-Q24):

NEW QUESTION # 19

You implemented the service provider model for Payables payments, where your United Kingdom (UK) headquarters works solely as an outsourced payment processing unit on behalf of your other UK business units. What is this type of payment service provider model known as?

- A. Procurement
- B. Dedicated
- C. Self-Service
- D. Dedicated and Self-Service

Answer: B

NEW QUESTION # 20

You are a consultant for a mid-sized company. They have asked you to identify Cash Management reports that can be used to gain a better understanding of the company's cash position. You found four key reports. Which option correctly matches each report with its description?

Answer:

Explanation:

NEW QUESTION # 21

You have been asked by the cloud customer to create some user-defined account derivation rules for Payables invoices that were imported from lease accounting.

Which two lease accounting source attributes are predefined and can be used in rule creation?

- **A. DFF values on the Asset tab**
- B. DFF values on the Schedule tab
- **C. ROU Flag value**
- D. Lease location
- E. Lease preparer

Answer: A,C

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Lease Accounting, integration with Oracle Payables allows for the seamless import of lease-related invoices. To ensure accurate financial reporting, it's essential to configure account derivation rules that map specific lease attributes to the appropriate general ledger accounts. Oracle provides a set of predefined source attributes that can be utilized in creating these rules.

Key Predefined Lease Accounting Source Attributes:

DFF Values on the Asset Tab (Option A):

Descriptive Flexfields (DFFs) on the Asset tab capture additional, user-defined information related to leased assets. These fields can store bespoke data pertinent to an organization's reporting requirements. When configuring account derivation rules, these DFFs can be referenced to derive specific accounting treatments based on the custom attributes recorded.

Reference:

ROU Flag Value (Option D):

The Right-of-Use (ROU) flag indicates whether an asset is recognized as a right-of-use asset under lease accounting standards. This distinction is crucial for determining the appropriate accounting treatment for lease-related transactions. In account derivation rules, the ROU flag can be used to route transactions to the correct accounts, ensuring compliance with accounting standards.

Other Options Analysis:

DFF Values on the Schedule Tab (Option B):

While Descriptive Flexfields on the Schedule tab may capture additional information related to payment schedules, they are not explicitly listed among the predefined source attributes available for account derivation rule creation in Oracle Lease Accounting.

Lease Preparer (Option C):

The individual who prepares the lease (Lease Preparer) is not a predefined source attribute available for configuring account derivation rules. Accounting rules typically rely on attributes directly impacting financial transactions rather than user-specific data.

NEW QUESTION # 22

You learn that you can create action links to drill down from an Oracle Transactional Business Intelligence (OTBI) report to a specific transaction. You decide to test it out when running the payables to ledger reconciliation" Report When you click a specific balance, it directs you to Oracle Payables application where you can view the transactional details about the balance.

What information can you view when using the action link in the "Payables to ledger reconciliation" Report.

- **A. Differences**
- B. Period activity
- C. Beginning balances
- D. Ending balances

Answer: A

NEW QUESTION # 23

A Payables user creates a manual invoice, and a Withholding Tax Classification Code defaults on the invoice line when the invoice is saved. Where does this Withholding Tax Classification Code default from?

- A. From the Party Tax Profile of the Third Party Site
- **B. From the Site Assignments of the Supplier Site**
- C. From the Ship-to Location selected on the invoice

Answer: B

Explanation:

A). From the Site Assignments of the Supplier Site (Correct Answer)

The Withholding Tax Classification Code can be assigned at the supplier site level in Oracle Financials Cloud.

When a supplier site has a predefined withholding tax classification, this automatically defaults onto the invoice line when an invoice is created for that supplier site.

This setup ensures that consistent withholding tax is applied to transactions related to that supplier.

According to Oracle documentation:

"For supplier sites that use withholding tax, the withholding tax classification that you define at the supplier site assignment level is used to populate the default tax classification on the invoice." (Oracle Financials Cloud Payables Guide) B). From the Party Tax Profile of the Third Party Site (Incorrect Answer) The Party Tax Profile contains tax-related settings for a supplier or third-party entity, including tax registration details.

However, it does not directly default the Withholding Tax Classification Code onto invoice lines.

Instead, the Party Tax Profile provides high-level tax configurations that may influence tax calculations but does not assign the default withholding tax classification.

C). From the Ship-to Location selected on the invoice (Incorrect Answer) The Ship-to Location on an invoice is used for logistics and sales tax calculations based on where goods are delivered.

It does not impact withholding tax, which is typically linked to the supplier or supplier site.

Therefore, the Withholding Tax Classification Code does not default from the Ship-to Location.

Final Conclusion:

The correct source of the default Withholding Tax Classification Code on an invoice line is the Supplier Site Assignment.

This ensures that withholding tax is consistently applied to transactions involving that supplier, reducing errors in tax calculations.

Reference:

Oracle Financials Cloud Documentation - Withholding Tax Classifications in Payables (Oracle Documentation Link) Explanation: Comprehensive and Detailed In-Depth

In Oracle Financials Cloud, when a Payables user creates a manual invoice, the Withholding Tax Classification Code can default onto the invoice line from various sources depending on the system configurations. The correct source for defaulting this code is from the Site Assignments of the Supplier Site.

Explanation of Each Option:

NEW QUESTION # 24

.....

It is known to us that our 1Z0-1055-25 learning dumps have been keeping a high pass rate all the time. There is no doubt that it must be due to the high quality of our study materials. It is a matter of common sense that pass rate is the most important standard to testify the 1Z0-1055-25 training files. The high pass rate of our study materials means that our products are very effective and useful for all people to pass their exam and get the related certification. So if you buy the 1Z0-1055-25 study questions from our company, you will get the certification in a shorter time.
