Latest ANVE Exam Questions Vce, Test ANVE Questions

Just the same as the free demo, we have provided three kinds of versions of our ANVE preparation exam, among which the PDF version is the most popular one. It is understandable that many people give their priority to use paper-based materials rather than

learning on computers, and it is quite clear that the PDF version is convenient for our customers to read and print the contents in our ANVE Study Guide. After printing, you not only can bring the study materials with you wherever you go, but also can make notes on the paper at your liberty. Do not wait and hesitate any longer, your time is precious!

Axis Network Video Exam Sample Questions (Q238-Q243):

NEW QUESTION # 238

Which of the following actions can be taken using the AXIS T8414 Installation Display? (Choose two)

- A. Read user documentation for cameras
- **B. Make snapshots**
- C. Reset a camera to factory default values
- D. Access a camera's home page
- **E. Power up a PoE camera**

Answer: B,E

NEW QUESTION # 239

A camera's recording stream has a bitrate of 8 Mbit/s. How much storage is used per hour?

- **A. 3.6 GB**
- B. 28.8 GB
- C. 288 GB
- D. 36 GB

Answer: A

Explanation:

To calculate the storage used per hour by a camera's recording stream with a bitrate of 8 Mbit/s, you can use the following formula:

$$\text{Storage (GB/hour)} = \text{bitrate (Mbit/s)} \times \text{seconds per hour} \times 1024 \times \frac{1}{1024} \times \frac{1}{1024} \times \frac{1}{1024}$$
$$\text{Storage (GB/hour)} = 8 \times 3600 \times 1024 \times \frac{1}{1024} \times \frac{1}{1024} \times \frac{1}{1024} = 3.6 \text{ GB}$$

Since there are 3600 seconds in an hour:

$$\text{Storage (GB/hour)} = \frac{8 \times 3600}{1024} = 3.6 \text{ GB}$$

$$\text{Storage (GB/hour)} = \frac{8 \times 3600 \times 1024}{1024 \times 1024} = 3.6 \text{ GB}$$
 Thus, the camera uses 3.6 GB of storage per hour. Axis documentation on storage requirements for video streams provides similar calculations to estimate storage needs based on bitrate.

NEW QUESTION # 240

Who should be responsible for documenting a video surveillance installation?

- A. The customer's IT department
- **B. The integrator**
- C. The camera manufacturer
- D. The customer's security manager

Answer: B

NEW QUESTION # 241

Increased noise levels in a scene will increase the

- A. Light sensitivity.
- B. Brightness level.
- **C. Bandwidth usage.**
- D. Contrast level.

Answer: C

Explanation:

Increased noise levels in a scene typically result in higher bandwidth usage. Noise introduces additional variations in the video signal, which the compression algorithm must encode, leading to increased data rates.

This is particularly noticeable in low-light conditions where electronic noise can significantly impact the video stream. Axis Network Video documentation explains that noise reduction techniques and proper lighting can help manage and reduce the bandwidth impact caused by increased noise levels in surveillance video.

NEW QUESTION # 242

What is one of the main purposes of using AXIS Camera Application Platform?

- A. Loading of VAPIX applications directly on the camera
- B. Loading a Video Management Software (VMS) to be run directly on the camera
- **C. Loading of applications to be run directly on the camera**
- D. Loading of applications directly to the SD/SDHC card on the camera

Answer: C

Explanation:

The AXIS Camera Application Platform (ACAP) is a powerful tool that allows users to install and run third-party applications directly on Axis cameras. This capability transforms the cameras into intelligent devices that can perform a variety of tasks, such as video analytics, object recognition, and event detection, without the need for additional hardware. By running applications directly on the camera, ACAP enhances the flexibility and functionality of surveillance systems. Axis Network Video documentation explains how ACAP leverages the processing power of the cameras to deliver advanced features and capabilities.
