1Z0-1061-24 Reliable Test Labs, New 1Z0-1061-24 Test Pattern

The exam solutions has three formats and one of them is Oracle 1Z0-1061-24 practice exam software (desktop and web-based). These Oracle 1Z0-1061-24 practice exams are specially built for the students so that they can evaluate what they have studied. These 1Z0-1061-24 Practice Tests are customizable which means that users can adjust the time and questions according to their needs which will teach them how to overcome mistakes so they can pass 1Z0-1061-24 exam.

Oracle CX Sales 2024 Implementation Professional Sample Questions (Q300-Q305):

NEW QUESTION # 300

What is the difference between a standard and an enterprise instance in Oracle Profitability and Cost Management Cloud Service?

- A. An enterprise instance is hosted on-premises, while a standard instance is hosted in the cloud
- B. There is no difference between a standard and an enterprise instance
- C. A standard instance is designed for small to medium sized businesses, while an enterprise instance is designed for large corporations
- D. A standard instance includes fewer features and capabilities than an enterprise instance

Answer: D

Explanation:

Option 1: This option is incorrect because both standard and enterprise instances can be used by businesses of any size. Option 2: This option is correct because a standard instance is intended for basic P&L and cost analysis, while an enterprise instance includes additional features like driver-based planning, workflow management, and more advanced reporting

NEW QUESTION # 301

When importing data into Oracle Profitability and Cost Management Cloud Service from an external system, what is the recommended approach to ensure data consistency and reduce errors?

- A. Import the data directly into the final target application using the Data Integration feature
- B. Use the Excel-based Data Entry form to manually input the data
- C. Convert the data into a CSV file and use the Data Management Inbound interface to load the data
- D. Perform a test import first without committing, and analyze the results to identify potential issues

Answer: D

Explanation:

Option 1: This option is the correct answer. It is recommended to perform a test import first without committing, and analyze the results to identify potential issues. This approach will help ensure data consistency and reduce errors when importing data into Oracle Profitability and Cost Management Cloud Service from an external system. Option 2: This option is incorrect. It is not recommended to import the data directly into the final target application using the Data Integration feature, as this approach may result in inconsistent data and errors. Option 3: This option is incorrect. While the Excel-based Data Entry form can be used to manually input the data, this approach is not recommended for large datasets as it can be time-consuming and may result in errors. Option 4: This option is incorrect. While converting the data into a CSV file and using the Data Management Inbound interface to load the data is a valid approach, it is not the recommended approach for ensuring data consistency and reducing errors. This approach may result in inconsistent data and errors.

NEW QUESTION # 302

Which of the following steps is necessary when running an allocation in Oracle Profitability and Cost Management Cloud Service?

- A. Set the allocation method and options in the Job Definition
- B. Ensure that the destination cube is properly mapped to the source cube
- C. Create a calculation script to run the allocation
- D. Define allocation rules and methods in the Rules Library

Answer: A

Explanation:

Option 1: Incorrect. While it is important to ensure that the destination cube is properly mapped to the source cube, this step alone is not sufficient to run an allocation. Other steps are required. Option 2: Incorrect. While it is important to define allocation rules and methods in the Rules Library, this step alone is not sufficient to run an allocation. Other steps are required. Option 3: Incorrect. While it is important to create a calculation script to run the allocation, this step alone is not sufficient. Other steps are required. Option 4: Correct. When running an allocation in Oracle Profitability and Cost Management Cloud Service, it is necessary to set the allocation method and options in the Job Definition. This includes specifying the source and destination cubes, the rules to be applied, and other relevant settings.

NEW QUESTION # 303

Which option best describes the integration process between Oracle Profitability and Cost Management Cloud Service (PCMCS) and other applications?

- A. PCMCS can only integrate with other Oracle applications and requires coding and custom development to integrate with non-Oracle applications
- B. PCMCS provides limited integration capabilities and requires manual data uploads and downloads for integration with other applications.
- **C. PCMCS allows for seamless integration with both Oracle and non-Oracle applications through the use of pre-built connectors.**
- D. PCMCS supports out-of-the-box integration with other Oracle applications, but integration with non-Oracle applications requires the use of third-party integration tools.

Answer: C

Explanation:

Option 1: Correct. Oracle PCMCS provides pre-built connectors and seamless integration capabilities with both Oracle and non-Oracle applications. This allows for easy data exchange and integration without the need for custom development or coding. Option 2: Incorrect. PCMCS does not only integrate with Oracle applications. It also provides integration capabilities with non-Oracle applications using pre-built connectors. Option 3: Incorrect. PCMCS does not require manual data uploads and downloads for integration with other applications. It supports seamless integration with both Oracle and non-Oracle applications. Option 4: Incorrect. PCMCS does support out-of-the-box integration with other Oracle applications, but it also provides integration capabilities with non-Oracle applications through pre-built connectors. Third-party integration tools are not required.

NEW QUESTION # 304

What is the correct method to integrate data from external systems into Oracle Profitability and Cost Management Cloud Service?

- A. Using the Data Import Wizard
- **B. Using the External Data Source feature**
- C. Using the Data Integration Platform Cloud service
- D. Using the Smart Data Integration feature

Answer: B

Explanation:

Option 1: Correct. The Data Import Wizard is the recommended method to integrate data from external systems into Oracle Profitability and Cost Management Cloud Service. It allows you to easily import data in various formats such as CSV, Excel, and text. Option 2: Incorrect. The External Data Source feature in Oracle Profitability and Cost Management Cloud Service is used to define connections to external data sources, but it does not directly integrate data from those sources. Option 3: Incorrect. The Smart Data Integration feature in Oracle Profitability and Cost Management Cloud Service is used for real-time data integration and replication, not for initial data import from external systems. Option 4: Incorrect. The Data Integration Platform Cloud service is a separate service that provides comprehensive data integration capabilities, but it is not specifically designed for integrating data into Oracle Profitability and Cost Management Cloud Service.
