Pass Guaranteed Quiz Salesforce - Plat-Admn-202 High Hit-Rate Latest Practice Questions

All contents of Plat-Admn-202 training prep are made by elites in this area rather than being fudged by laymen. Let along the reasonable prices of our Plat-Admn-202 exam materials which attracted tens of thousands of exam candidates mesmerized by their efficiency by proficient helpers of our company. Any difficult posers will be solved by our Plat-Admn-202 Quiz guide. And we have free demos of our Plat-Admn-202 study braindumps for you to try before purchase.

Salesforce Certified Platform App Builder Sample Questions (Q179-Q184):

NEW QUESTION # 179

DreamHouse Realty wants to display a weather map component on a Lightning record page when a house is scheduled for a showing.

How should the app builder meet the requirement?

- A. Sharing rules
- B. Field-level field
- **C. Component visibility**
- D. Field-level security

Answer: C

Explanation:

To display a weather map component on a Lightning record page conditionally:

A . Component visibility should be used. This feature in the Lightning App Builder allows components on a Lightning page to be displayed based on specific criteria, such as field values or user attributes. In this case, the app builder can set the visibility of the weather map component to only appear when a house is scheduled for a showing based on the relevant field values.

For more details on setting up conditional component visibility, review the guide on Dynamic Lightning Pages.

NEW QUESTION # 180

Manage at Universal Containers want a quick to create additional accounts to form a hierarchy from a parent account record. They want to auto-populate five fields based on the parent to make it easier for users to create the child accounts quickly.

- A. Custom link on Account
- B. Custom Global Quick Action
- **C. Custom action on Account**
- D. Custom Global Quick Account.

Answer: C

Explanation:

A custom action on Account can be used to create additional accounts from a parent account record. A custom action can have predefined values for certain fields based on the parent record. A custom global action can be used to create records that do not have any relationship with other objects. A custom link on Account can be used to execute JavaScript or link to an external URL.

NEW QUESTION # 181

Sales reps at Universal Containers create multiple quotes per opportunity.

What automation tool should an app builder recommend to delete rejected quotes?

- **A. Flow**
- B. Approval process
- C. Validation rule
- D. Workflow rule

Answer: A

Explanation:

A flow is a powerful automation tool that can perform complex logic and data manipulation. A flow can be used to delete rejected quotes by using a record-triggered flow that runs when a quote is updated, or by using a scheduled flow that runs at a specified time.

NEW QUESTION # 182

The case handling process at Universal Containers includes multiple steps Including approvals, notifications, and fields updates. To manage and evaluate all of these changes in a single save operation, an app builder wants to use Process Builder and the Advanced option to let the process evaluate a record multiple times has been selected.

Which two options should the app builder avoid to prevent recursion?

Choose 2 answers

- **A. The ISCHANGED function**
- B. Setting a criteria node to No criteria-just execute the procedure
- **C. Invocable processes**
- D. IF statements

Answer: A,C

Explanation:

The two options that the app builder should avoid to prevent recursion are setting a criteria node to No criteria-just execute the procedure and invocable processes. Setting a criteria node to No criteria-just execute the procedure means that the process will always execute the actions regardless of the record values, which can cause recursion if the process updates the same record that triggered it. Invocable processes are processes that can be invoked from another process or a flow, which can cause recursion if the invocable process updates the same record that triggered the parent process or flow. Option A is incorrect because IF statements are not an option in Process Builder, but rather a function that can be used in formulas or conditions. Option D is incorrect because the ISCHANGED function is not an option in Process Builder, but rather a function that can be used in formulas or conditions to check if a field value has changed.

NEW QUESTION # 183

Universal Containers uses a private sharing model for opportunities. This model CANNOT be changed due to a regional structure. A new sales operations team has been created. This team needs to perform analysis on Opportunity data, all should have read and write access to all Opportunities.

What are two recommended solutions for the app builder to give the users appropriate access? Choose 2 answers

- A. Add a manual share for all opportunities with each user on the sales operations team
- B. Create a criteria-based sharing rule to share all opportunities with the sales operations private group
- C. Create a criteria-based sharing rule to all opportunities with the sales operations public group.
- D. Add a permission set with 'View All' and 'Modify All' opportunity permissions enabled.

Answer: C,D

Explanation:

The two recommended solutions for the app builder to give the users appropriate access are creating a criteria based sharing rule to all opportunities with the sales operations public group and adding a permission set with 'View All' and 'Modify All' opportunity permissions enabled. A criteria based sharing rule can grant read and write access to all opportunities that meet certain criteria to a specified group of users. A permission set can grant additional object-level permissions to users without changing their profiles. Option B is incorrect because adding a manual share for all opportunities with each user on the sales operations team is not scalable or maintainable. Option D is incorrect because creating a criteria-based sharing rule to share all opportunities with the sales operations private group is redundant, as private groups are used to manually share records with individual users or other groups.

NEW QUESTION # 184

.....

If you want to pass Plat-Admn-202 exams easily and obtain certifications in shortest time, the best way is to purchase the best high-quality Plat-Admn-202 exam preparation materials. That's what we do. Our Plat-Admn-202 training materials are famous for the high pass rate in this field, if you choose our products we are sure that you will 100% clear Plat-Admn-202 Exams. If you are still headache about how to pass exam certainly, our Plat-Admn-202 practice test questions will be your best choice. Don't hesitate again and just choose us!
