

HPE7-A06 Valid Real Test, HPE7-A06 Valid Brindumps Ppt

P.S. Free & New HPE7-A06 dumps are available on Google Drive shared by TopExamCollection: <https://drive.google.com/open?id=1xKeLPRVdKuZfUrYY4T7EmlHkEddejb-O>

We consider the actual situation of the test-takers and provide them with high-quality learning materials at a reasonable price. Choose the HPE7-A06 study materials absolutely excellent quality and reasonable price, because the more times the user buys the HPE7-A06 study materials, the more discount he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the HPE7-A06 Study Materials, our staff will help solve them as soon as possible.

Every HP aspirant wants to pass the HP HPE7-A06 exam to achieve high-paying jobs and promotions. The biggest issue HPE7-A06 exam applicants face is that they don't find credible platforms to buy real HPE7-A06 exam dumps. When candidates don't locate actual HPE Campus Access Switching Expert Written Exam (HPE7-A06) exam questions they prepare from outdated material and ultimately lose resources. If you are also facing the same problem then you are at the trusted spot.

>> HPE7-A06 Valid Real Test <<

HPE7-A06 Valid Real Test 100% Pass | Trustable HP HPE Campus Access Switching Expert Written Exam Valid Brindumps Ppt Pass for sure

“There is no royal road to learning.” Learning in the eyes of most people is a difficult thing. People are often not motivated and but have a fear of learning. However, the arrival of HPE7-A06 study materials will make you no longer afraid of learning. HPE7-A06 study material provides you with a brand-new learning method that lets you get rid of heavy schoolbags, lose boring textbooks, and let you master all the important knowledge in the process of making a question. Please believe that with HPE7-A06 Study Materials, you will fall in love with learning.

HPE Campus Access Switching Expert Written Exam Sample Questions (Q51-Q56):

NEW QUESTION # 51

Which minimal configurations must be completed for MSTP to work correctly? (Choose two.)

- A. revision number
- B. creating MSTP instances
- C. MSTP enabled interfaces
- D. bridge priority number
- E. MSTP region

Answer: A,E

Explanation:

For MSTP (Multiple Spanning Tree Protocol) to work correctly across switches, the following must match on all participating devices:

MSTP region name

□ MSTP revision number

□ VLAN-to-instance mapping (implied within the region definition)

□ These parameters define the MSTP region. Bridge priority and enabling interfaces are optional tuning steps, while instances themselves can be created after the region is defined.

NEW QUESTION # 52

A customer tasked you with creating a new design for the IDF's in a large office building. A junior member of your staff took all of the technical requirements and produced a design to meet those requirements. You were asked to review the portion of the design below:

CUSTOMER REQUIREMENTS:

preference for stackable switches

□ Each closet should contain a single virtual switch.

□ dual 10Gbps fiber uplinks from each closet

□ capacity for 500 edge ports in each closet; no additional capacity required

□ lowest-cost AOS-CX switch that meets all requirements

PROPOSED DESIGN:

nine (9) AOS-CX 6200M (R8Q69A: Class4 PoE 4SFP+ switch (R8Q68A) HPE Aruba

□ Networking 6200M 46G 4SFP+ switch) in each closet

□ switches configured in a VSF (Virtual Switching Framework) stack, with auto-stacking enabled

□ uplinks configured on the first and last members of the stack

□ Does the proposed solution meet the technical requirements?

- A. No. The proposed design does not meet the requirements for uplink connectivity.
- B. No. The proposed design is not the lowest-cost AOS-CX switch for this project.
- C. Yes. The proposed design meets the customer's requirements.
- D. No. The proposed design does not meet the capacity requirements.

Answer: D

Explanation:

Nine CX 6200M access switches provide at most $9 \times 48 = 432$ edge ports (even fewer if it's the 46G variant), which is below the 500-port capacity requirement. All other requirements (stackable single virtual switch via VSF, dual 10G uplinks, and lowest-cost stackable CX platform) are met.

NEW QUESTION # 53

Refer to the exhibit.

Based on the screenshot, what is required to bring the secondary switch MCLAO interfaces online?"

- A. Use the same CX OS version as on the primary.
- B. Use the same ServiceOS version as on the primary.
- C. Use vsx-software-upgrade on the secondary.
- D. Update the MAE agents on the secondary.

Answer: A

Explanation:

The exhibit shows the output of show vsx status on sw-agg1. Key information includes:

- * Config Sync Status : sw_image_version_mismatch_error
- * NAE : sw_image_version_mismatch_error
- * HTTPS Server : sw_image_version_mismatch_error
- * Primary Software Version: GL.10.09.0010
- * Secondary Software Version: GL.10.11.1021

These errors clearly indicate that the primary and secondary VSX switches are running different AOS-CX software versions. For VSX to operate correctly, including configuration synchronization and enabling features like MC-LAG interfaces, both switches in the pair must run the exact same software version.

* Analysis of Options:

- * A: vsx-software-upgrade is used for upgrades but doesn't resolve the current mismatch requirement.
- * B: NAE errors are a symptom of the underlying version mismatch.
- * C: Using the same CX OS version on both primary and secondary switches is the fundamental requirement to clear the mismatch errors and achieve a stable VSX operational state.
- * D: While ServiceOS is part of the system, the primary requirement and error message relate to the main AOS-CX software version.

References: AOS-CX VSX Guide (Chapter on VSX Requirements, Troubleshooting, Software Updates). This relates to "Network Resiliency and virtualization" (8%) and "Troubleshooting" (10%) objectives.

NEW QUESTION # 54

Which set of commands will apply the device profile 'AP' to the device shown in the LLDP neighbor output below?

- A.
- B.
- C.
- D.

Answer: C

Explanation:

The goal is to configure the switch to automatically apply a specific device profile (named AP-PROFILE in the options) to ports where an Aruba AP Model 635 connects, using LLDP information for detection.

* LLDP Information: The LLDP neighbor output shows:

* Neighbor Chassis-Description: ArubaOS (MODEL: 635), Version Aruba AP

* Neighbor Chassis-Name: AP-42

* Device Profile Mechanism: This involves creating an LLDP group that matches specific attributes of the desired device, creating a device profile containing the desired port configurations (VLAN, PoE, QoS, Role, etc.), associating the profile with the LLDP group, and enabling the feature globally.

* Analyzing Configuration Options: All options configure an LLDP group AP-LLDP-GROUP and a device profile AP-PROFILE. The key is the matching condition within the LLDP group and the completeness of the profile configuration.

* Matching Condition:

* Options A, C, D use seq 10 match sys-desc 635. This condition checks if the LLDP System Description contains the string "635". Based on the output (...MODEL: 635...), this condition will match the target AP.

* Option B uses seq 10 match sys-name 635. This checks if the LLDP System Name contains "635". The output shows Neighbor Chassis-Name: AP-42. This condition will not match.

NEW QUESTION # 55

A client is unable to connect to the network. In the HPE Aruba Networking ClearPass access tracker, we can see an EAP timeout. What is a possible cause of this message?

- A. The radius server can see that the client certificate is expired.
- **B. The client does not trust the radius server certificate.**
- C. The radius server does not trust the client certificate.
- D. The client can see that the radius server certificate is expired.

Answer: B

Explanation:

An EAP timeout commonly occurs when the client does not trust the RADIUS server certificate, causing the authentication process to stall until it times out. This is a typical issue in 802.1X/EAP deployments if the server certificate is not trusted by the client.

NEW QUESTION # 56

.....

Up to now, we have business connection with tens of thousands of exam candidates who adore the quality of them. Besides, we try to keep our services brief, specific and courteous with reasonable prices of HPE7-A06 practice materials. All your questions will be treated and answered fully and promptly. We guarantee that you can pass the exam at one time even within one week based on practicing our HPE7-A06 studying materials regularly. 98 to 100 percent of former exam candidates have achieved their success by them.
