## New Exam 3V0-32.23 Materials - 3V0-32.23 Valid Mock Test

LatestCram has rich resources and 3V0-32.23 test questions. It equips with 3V0-32.23 exam simulations and test dumps. You can try to download questions and answers. Moreover, LatestCram answers real questions. Equipping with online VMware 3V0-32.23 Study Guide, 100% guarantee to Pass Your 3V0-32.23 Exam.

VMware 3V0-32.23 exam is recognized globally and is an industry-standard certification that validates the candidate's expertise in designing and implementing complex cloud management and automation solutions using VMware technologies. Cloud Management and Automation Advanced Design certification is designed for professionals who want to advance their careers in cloud management and automation and want to demonstrate their expertise to their employers and clients.

VMware 3V0-32.23 Certification Exam is intended for professionals who have experience in working with VMware's vRealize Suite and are looking to validate their skills and knowledge in designing and implementing cloud management and automation solutions. Cloud Management and Automation Advanced Design certification exam is also suitable for professionals who are looking

to advance their careers in the field of cloud management and automation.

# VMware Cloud Management and Automation Advanced Design Sample Questions (Q144-Q149):

**NEW QUESTION # 144**
Consider the following requirements to be used in determining a vRealize Operations licensing model:
- Authentication provided by Single Sign On
- Performance monitoring and analytics for 12 Hosts and 1 vCenter
- vSphere security and compliance monitoring for PCI and HIPAA
- Guided remediation for discovered issues
- Customizable dashboards, reports and views
Using the requirements, what is the minimum license that can be used for this deployment of vRealize Operations?

- A. Advanced
- B. vRealize Cloud Universal Enterprise
- C. Enterprise
- D. Standard

**Answer: A**

**NEW QUESTION # 145**
A customer is looking at embarking on their cloud journey and automating their infrastructure deployment using the VMware Cloud Management solution.
The CIO's goal is to optimize expenditures by making sure that the resources are right-sized, reclaimed, and retired.
Which VMware Cloud Management component will help the customer achieve this?

- A. Aria Operations
- B. Aria Operations for Logs
- C. Aria Operations for Applications
- D. Aria Automation

**Answer: A**

Explanation:
Aria Operations provides intelligent resource optimization, including right-sizing, reclamation, and retirement of infrastructure resources, directly supporting the CIO's expenditure optimization goals.

**NEW QUESTION # 146**
An architect is completing the physical design for a VMware Aria Operations solution. The customer has only provided the following information for their existing environment:
500 Virtual Machines
Two VMware vCenter Servers
10 VMware vSphere Hosts
20 Datastores
Live data should be stored within the VMware Aria Operations solution for six months The RTO for all existing management components is four hours The RPO for all existing management components is one hour Which assumption could the architect make when designing the solution?

- A. The solution will deploy Extra Large VMware Aria Operations nodes
- B. The RTO and RPO of the solution will be the same as the existing management components
- C. The resource profile of a virtual machine will be, on average, 1 vCPU and 2 GB RAM
- D. The Availability Service Level Agreement of the service will be 99.5% measured monthly

**Answer: B**

Explanation:
Given that only the RTO and RPO for existing management components are specified, it is reasonable for the architect to assume the VMware Aria Operations solution must align with these business continuity targets.

**NEW QUESTION # 147**
What role does VMware Aria Operations play within a Cloud Management logical design?

- A. Managing human resources
- B. Creating marketing campaigns
- C. Monitoring and maintaining IT infrastructure
- D. Analyzing financial data

**Answer: C**

**NEW QUESTION # 148**
A security team has requested a review of regulatory compliance across their private cloud infrastructure from its company's cloud architect.
Which Cloud Management product should the architect recommend to accomplish this?

- A. VMware Aria Operations
- B. VMware Aria Operations for Applications
- C. VMware Aria Operations for Logs
- D. VMware Aria Operations for Networks

**Answer: A**

Explanation:
VMware Aria Operations provides regulatory compliance assessment and reporting for private cloud infrastructure by evaluating configurations, policies, and system health against compliance standards, making it the appropriate tool for this requirement.

**NEW QUESTION # 149**
