

Prep FCSS_EFW_AD-7.6 Guide, FCSS_EFW_AD-7.6 Detailed Study Dumps

2026 Latest BraindumpsPrep FCSS_EFW_AD-7.6 PDF Dumps and FCSS_EFW_AD-7.6 Exam Engine Free Share:
<https://drive.google.com/open?id=1gucPd13R3RZt-ooSW6Io1K6V-ex4-vmf>

The web-based Fortinet FCSS_EFW_AD-7.6 practice test software can be used through browsers like Firefox, Safari, and Google Chrome. The customers don't need to download or install any excessive plugins or software in order to use the web-based Fortinet FCSS_EFW_AD-7.6 Practice Exam format. The web-based FCSS_EFW_AD-7.6 practice test software format is supported by different operating systems like Mac, iOS, Linux, Windows, and Android.

Fortinet FCSS_EFW_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Security Profiles: This section of the exam measures the skills of a Threat Prevention Specialist and covers the configuration and management of comprehensive security profiling systems. It includes implementing SSL SSH inspection, combining web filtering and application control mechanisms, integrating intrusion prevention systems, and utilizing the Internet Service Database to create layered security protections for organizational networks.

Topic 2	<ul style="list-style-type: none"> • System Configuration: This section of the exam measures the skills of a Network Security Architect and covers the implementation and integration of core Fortinet infrastructure components. It includes deploying the Security Fabric, enabling hardware acceleration, configuring high availability operational modes, and designing enterprise networks utilizing VLANs and VDOM technologies to meet specific organizational requirements.
Topic 3	<ul style="list-style-type: none"> • VPN: This section of the exam measures the skills of a VPN Solutions Engineer and covers the implementation of various virtual private network technologies. It includes configuring IPsec VPN using IKE version 2 protocols and implementing Automatic Discovery VPN solutions to establish on-demand secure tunnels between multiple sites within an enterprise network infrastructure.
Topic 4	<ul style="list-style-type: none"> • Central Management: This section of the exam measures the skills of a Security Operations Manager and covers the implementation of centralized management systems for coordinated control and oversight of distributed Fortinet security infrastructures across enterprise environments.
Topic 5	<ul style="list-style-type: none"> • Routing: This section of the exam measures the skills of a Network Infrastructure Engineer and covers the implementation of dynamic routing protocols for enterprise network traffic management. It includes configuring both OSPF and BGP routing protocols to ensure efficient and reliable data transmission across complex organizational networks.

FCSS_EFW_AD-7.6 Detailed Study Dumps & FCSS_EFW_AD-7.6 Latest Exam Questions

A lot of people have given up when they are preparing for the FCSS_EFW_AD-7.6 exam. However, we need to realize that the genius only means hard-working all one's life. It means that if you do not persist in preparing for the FCSS_EFW_AD-7.6 exam, you are doomed to failure. So it is of great importance for a lot of people who want to pass the exam and get the related certification to stick to studying and keep an optimistic mind. According to the survey from our company, the experts and professors from our company have designed and compiled the best FCSS_EFW_AD-7.6 cram guide in the global market.

Fortinet FCSS - Enterprise Firewall 7.6 Administrator Sample Questions (Q84-Q89):

NEW QUESTION # 84

What action can be taken on a FortiGate to block traffic using IPS protocol decoders, focusing on network transmission patterns and application signatures?

- A. Configure a web filter profile in flow mode.
- B. Use the DNS filter to block application signatures and protocol decoders.
- C. Enable application detection-based SD-WAN rules.
- **D. Use application control to limit non-URL-based software handling.**

Answer: D

Explanation:

FortiGate's IPS protocol decoders analyze network transmission patterns and application signatures to identify and block malicious traffic. Application Control is the feature that allows FortiGate to detect, classify, and block applications based on their behavior and signatures, even when they do not rely on traditional URLs.

Application Control works alongside IPS protocol decoders to inspect packet payloads and enforce security policies based on recognized application behaviors. It enables granular control over non-URL-based applications such as P2P traffic, VoIP, messaging apps, and other non- web-based protocols that IPS can identify through protocol decoders. IPS and Application Control together can detect evasive or encrypted applications that might bypass traditional firewall rules.

NEW QUESTION # 85

What happens when an SSO user logs into a downstream FortiGate?

- A. Denied
- B. No account
- C. Readonly admin
- D. Super admin

Answer: C

Explanation:

In a Fortinet Security Fabric where SAML SSO is enabled, the root FortiGate acts as the Identity Provider (IdP) for the fabric members. When an administrator logs into a downstream device (such as an ISFW or DCFW) using their Security Fabric credentials, their level of access is determined by the administration profile assigned during the setup. By default, for security reasons and to maintain the root's role as the primary management point, downstream fabric members often restrict these users to a readonly admin profile (specifically super_admin_readonly), which prevents them from having Login Read-Write options on those devices.

NEW QUESTION # 86

An administrator is configuring application control with FortiGate running in next-generation firewall (NGFW) policy-based mode. Which two actions must the administrator take? (Choose two.)

- A. Specify an SSL/SSH inspection profile on a consolidated policy.
- B. Create an application control profile and apply the profile to a firewall policy.
- C. Configure the action as quarantine, if an application requires feedback to prevent instability.
- D. Configure central source network address translation (SNAT), if NAT is required.

Answer: A,D

NEW QUESTION # 87

Which technology should you use to facilitate dynamic direct tunnels and automatic link optimization in a hub-and-spoke VPN topology?

- A. Use ADVPN 2.0
- B. Use IP-in-IP tunneling
- C. Use GRE over IPsec
- D. Use static IPsec tunnels

Answer: A

Explanation:

In FortiOS 7.6, Auto-Discovery VPN (ADVPN) 2.0 is the technology specifically designed to facilitate dynamic direct tunnels (spoke-to-spoke shortcuts) while providing automatic link optimization in hub-and-spoke topologies. While classic ADVPN (1.0) established on-demand tunnels between spokes to reduce latency and hub resource consumption, ADVPN 2.0 introduces advanced capabilities for monitoring and optimizing these links automatically.

Specifically, the Enterprise Firewall 7.6 materials highlight the following:

- * Dynamic Direct Tunnels: ADVPN allows spokes to establish secure tunnels directly between themselves without routing all data through the hub, which is critical for reducing latency and preventing the hub from becoming a bottleneck.
- * Automatic Link Optimization: ADVPN 2.0 integrates more deeply with SD-WAN and performance-based steering, allowing the network to automatically choose the best available path and optimize performance across those dynamic tunnels.
- * Efficiency: This technology is ideal for large-scale enterprise deployments where static tunnels (Option A) would be administratively impossible to manage and GRE (Option C) or IP-in-IP (Option D) would lack the dynamic optimization and security features required for modern hub-and-spoke architectures.

NEW QUESTION # 88

You want to know which content processor (CP) model FortiGate contains. Which command should you enter?

- A. get hardware cp

- B. get hardware status
- C. diagnose hardware lspci | grep 4e36
- D. diagnose hardware deviceinfo

Answer: B

NEW QUESTION # 89

.....

The last format is desktop FCSS_EFW_AD-7.6 practice test software that can be accessed easily just by installing the software on the Windows Pc or Laptop. The desktop software format can be accessed offline without any internet so the students who don't have internet won't struggle in the preparation for FCSS_EFW_AD-7.6 Exam. These three forms are specially made for the students to access them according to their comfort zone and FCSS_EFW_AD-7.6 exam prepare for the best.
