It demonstrates their expertise in designing and implementing Salesforce B2C Commerce solutions, which can lead to better job opportunities and higher salaries. Moreover, it enables professionals to gain recognition in the Salesforce community and enhances their credibility as a B2C commerce architect.

## Salesforce Certified B2C Commerce Architect Sample Questions (Q56-Q61):

### NEW QUESTION # 56

The Client plans to deploy a new payment provider and Order Management System on its existing B2C Commerce website. They have asked an Architect to advise which environment it should use to conduct load testing of its new integrations.

Which environment should be used as the ideal environment for this kind of load test?

- A. The Production instance of the existing Realm.
- B. The Development Instance of a rental Realm.
- C. The Development Instance of the existing Realm.
- **D. The Production Instance of a rental Realm.**

**Answer: D**

#### NEW QUESTION # 57

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by "total time" column. The following come as the top Ave items:

Which controller should the Architect focus on to further investigate the performance issue?

- A. Product-HitTile as it has the highest hits during the load test.
- B. Home-IncludeHeaderMenu as It has highest average time.
- **C. Product-Detail as It has the highest total time and highest maximum time.**
- D. Search Show as this Is one of the key controllers that the customer uses

**Answer: C**

Explanation:

Focusing on the 'Product-Detail' controller is prudent given that it has the highest total time and the highest maximum time (Answer C), suggesting that it significantly contributes to the overall load and potential slowdowns on the site. By analyzing and optimizing this controller, the architect can potentially achieve the most substantial improvement in performance. Efforts might include optimizing database queries, caching frequently requested data, or simplifying complex logic in the Product-Detail page's processing.

#### NEW QUESTION # 58

A merchant uploads an image using the Content Image Upload module of Business Manager.

Which three modules can the merchant or developer use to display the image on the Storefront? Choose 3 answers

- A. Payment types
- **B. Storefront catalogs**
- **C. Content assets**
- D. ISML templates
- **E. Content slots**

**Answer: B,C,E**

#### NEW QUESTION # 59

A Retailer has a single storefront site and a Product Management System (PIM). The Pim is Generating the master catalog and storefront categorization catalog every day and it uploading them to SFTP how should the Architect configure the import job flows following the best practices?

- A. 1st flow is global to download the files from SFTP. 2nd flow is global to import the master catalog. 3rd flow is global to Import the storefront catalog.
- B. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the master catalog. 3rd flow is global to Import the storefront catalog.
- **C. 1st flow is global to download the files from SFTP. 2nd flow is global to import the storefront catalog 3rd flow is global to Import the master catalog.**
- D. 1st flow is assigned to the site to download the files from SFTP. 2nd flow is assigned to the site to Import the storefront catalog 3rd flow is global to Import the master catalog.

**Answer: C**

Explanation:

For optimal job flow concerning data import from a PIM system, the sequence should begin with downloading files globally from an SFTP site, followed by importing data into the B2C Commerce platform:

First flow: Download files, ensuring all required files are available and ready for import.

Second flow: Import the storefront catalog which likely has dependencies on the master catalog but is generally smaller and can be

updated more rapidly.

Third flow: Import the master catalog, as it typically contains the foundational data needed for various site functionalities.

This sequence respects data dependency and integrity, ensuring that the storefront reflects the most current and accurate information after all relevant data is imported.

#### NEW QUESTION # 60

An integration cartridge implements communication between the B2C Commerce Storefront and a third-party service provider. The cartridge contains the localServiceRegistry code:

How does this code sample accomplish authentication to the service provider?

- A. By wrapping the authentication service call with Basic Auth.
- B. By performing a signed SOAP Auth request using a certificate.
- **C. By Issuing a Basic Auth request to the service provider.**
- D. By disabling Basic Auth and executing the service authentication call.

**Answer: C**

#### NEW QUESTION # 61
