## APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample

## Questions (Q24-Q29):

### NEW QUESTION # 24

Which output is a required result from risk analysis?

- A. Risk acceptance criteria
- **B. Determined levels of risk**
- C. Prioritized risks for treatment
- D. Risk treatment control options

**Answer: B**

Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

\* "assess the potential consequences that would result if the risks identified... were to materialize;"

\* "assess the realistic likelihood of the occurrence of the risks identified;"

\* "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the verified correct output is B: Determined levels of risk.

### NEW QUESTION # 25

Identify the missing word(s) in the following sentence.

When planning the ISMS, the organization is specifically required to plan actions to address risks and opportunities and how to [ ? ] these actions.

- A. communicate
- B. apply competent resources to
- C. improve the effectiveness of
- **D. evaluate the effectiveness of**

**Answer: D**

Explanation:

Clause 6.1.1 (Planning) states:

"The organization shall plan:

d) actions to address these risks and opportunities; and

e) how to:

\* integrate and implement the actions into its ISMS processes; and

\* evaluate the effectiveness of these actions."

This confirms the missing words are "evaluate the effectiveness of". Communication (A), applying resources (B), and improving effectiveness (C) are important concepts elsewhere but not the direct requirement stated in this clause.

### NEW QUESTION # 26

Which statement describes the control for the Compliance with policies, rules and standards for information security within Annex A of ISO/IEC 27001?

- A. Regular review of contractual compliance
- B. Return assets to their legal owners
- **C. Regular review of compliance**
- D. Maintain contact with legal authorities

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.36 (Compliance with policies, rules and standards for information security) requires:

"Compliance with the organization's information security policies, rules and standards for information security should be regularly reviewed." This directly matches option A. Option B refers to contractual compliance, which is part of supplier management controls

(Annex A.5.19). Option C relates to Annex A.5.7 (Contact with authorities). Option D refers to asset return controls (Annex A.5.9).

Thus, the correct answer is A.

#### NEW QUESTION # 27

Which of the following statements about the relationship between ISO/IEC 27001 and ISO/IEC 27002 is true?

\* ISO/IEC 27002 provides implementation advice on the controls selected during the ISO/IEC 27001 information security risk management process

\* ISO/IEC 27002 provides a process for information security risk management which implements the requirements of ISO/IEC 27001

- A. Only 1 is true
- B. Neither 1 or 2 is true
- C. Both 1 and 2 are true
- D. Only 2 is true

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27001 & 27002:2022 standards:

ISO/IEC 27001 Annex A lists reference controls. ISO/IEC 27002 provides detailed guidance on the implementation of those controls, including purpose, guidance, and examples. Clause 6.1.3 of ISO/IEC

27001 makes the link explicit: controls from Annex A are referenced, but ISO/IEC 27002 explains how to implement them.

However, ISO/IEC 27002 does not provide a process for risk management—that is covered by ISO/IEC

27005. Risk management requirements are in ISO/IEC 27001 (Clauses 6.1.2 and 6.1.3).

Therefore, statement 1 is true, but statement 2 is false. Correct answer: A.

#### NEW QUESTION # 28

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security controls are tailored to suit the organization's specific circumstances
- B. Information security risks are assessed and the probability and/or impact reduced
- C. Information security compliance will increase stakeholder trust in the organization
- D. Information security staff will be qualified to ISO/IEC 27001 Foundation level

**Answer: D**

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed."

Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management.

However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.
