

AIGP시험패스가능한인증덤프, AIGP적중율높은인증 시험덤프

BONUS!!! Itcertkr AIGP 시험 문제집 전체 버전을 무료로 다운로드하세요: https://drive.google.com/open?id=1YVq83K1uc_1n3fTnZAtf6UN7FKIMFuT

우리 Itcertkr에서는 여러분을 위하여 정확하고 우수한 서비스를 제공하였습니다. 여러분의 고민도 덜어드릴 수 있습니다. 빨리 성공하고 빨리IAPP AIGP인증시험을 패스하고 싶으시다면 우리 Itcertkr를 장바구니에 넣으시죠. Itcertkr는 여러분의 아주 좋은 합습가이드가 될것입니다. Itcertkr로 여러분은 같고 싶은 인증서를 빠른시일내에 얻게될것입니다.

Itcertkr에서는 IT인증시험에 대비한 퍼펙트한IAPP 인증AIGP덤프를 제공해드립니다. 시험공부할 시간이 충족하지 않은 분들은Itcertkr에서 제공해드리는IAPP 인증AIGP덤프로 시험준비를 하시면 자격증 취득이 쉬워집니다. 덤프를 구매하시면 일년무료 업데이트서비스도 받을수 있습니다.

>> AIGP시험패스 가능한 인증덤프 <<

시험패스에 유효한 최신버전 AIGP시험패스 가능한 인증덤프 최신 덤프 모음집

Itcertkr에서는 시장에서 가장 최신버전이자 적중율이 가장 높은 IAPP인증 AIGP덤프를 제공해드립니다. IAPP인증 AIGP덤프는 IT업종에 몇십년간 종사한 IT전문가가 실제 시험문제를 연구하여 제작한 고품질 공부자료로서 시험

패스율이 장난 아닙니다. 덤프를 구매하여 시험에서 불합격성적표를 받으시면 덤프비용 전액을 환불해드립니다.

IAPP AIGP 시험요강:

주제	소개
주제 1	Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
주제 2	Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
주제 3	Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
주제 4	Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

최신 Artificial Intelligence Governance AIGP 무료샘플문제 (Q177-Q182):

질문 # 177

You are part of your organization's ML engineering team and notice that the accuracy of a model that was recently deployed into production is deteriorating. What is the best first step to address this?

- A. Run red-teaming exercises.
- B. Replace the model with a previous version.
- C. Perform an audit of the model.
- D. Conduct champion/challenger testing.

정답: D

설명:

Champion/challenger testing allows comparison between the current model and alternatives to identify if a replacement or adjustment is necessary, addressing accuracy deterioration systematically.

질문 # 178

You are the chief privacy officer of a medical research company that would like to collect and use sensitive data about cancer

patients, such as their names, addresses, race and ethnic origin, medical histories, insurance claims, pharmaceutical prescriptions, eating and drinking habits and physical activity.

The company will use this sensitive data to build an AI algorithm that will spot common attributes that will help predict if seemingly healthy people are more likely to get cancer. However, the company is unable to obtain consent from enough patients to sufficiently collect the minimum data to train its model.

Which of the following solutions would most efficiently balance privacy concerns with the lack of available data during the testing phase?

- **A. Utilize synthetic data to offset the lack of patient data.**
- B. Extend the model to multi-modal ingestion with text and images.
- C. Refocus the algorithm to patients without cancer.
- D. Deploy the current model and recalibrate it over time with more data.

정답: A

설명:

Utilizing synthetic data to offset the lack of patient data is an efficient solution that balances privacy concerns with the need for sufficient data to train the model. Synthetic data can be generated to simulate real patient data while avoiding the privacy issues associated with using actual patient data. This approach allows for the development and testing of the AI algorithm without compromising patient privacy, and it can be refined with real data as it becomes available. Reference: AIGP Body of Knowledge on Data Privacy and AI Model Training.

질문 # 179

CASE STUDY

Please use the following to answer the next question:

A mid-size US healthcare network has decided to develop an AI solution to detect a type of cancer that is most likely to arise in adults. Specifically, the healthcare network intends to create a recognition algorithm that will perform an initial review of all imaging and then route records to a radiologist for secondary review pursuant to agreed-upon criteria (e.g., a confidence score below a threshold).

To date, the healthcare network has:

- Defined its AI ethical principles.
- Conducted discovery to identify the intended uses and success criteria for the system.
- Established an AI risk committee.
- Assembled a cross-functional team with clear roles and responsibilities.
- Created policies and procedures to document standards, workflows, timelines and risk thresholds during the project.

The healthcare network intends to retain a cloud provider to host the solution. It also intends to retain a large consulting firm to supplement its small data science team and help develop the algorithm using the healthcare network's existing data and de-identified data that is licensed from a large US clinical research partner.

In the design phase, what is the most important step for the healthcare network to take when mapping its existing data to the clinical research partner data?

- A. Ensure the data is labeled and formatted.
- **B. Identify fits and gaps in the combined data.**
- C. Evaluate the country of origin of the data.
- D. Apply privacy-enhancing technologies to the data.

정답: B

설명:

Identifying fits and gaps in the combined data helps the healthcare network understand the compatibility and completeness of datasets for effective AI model development.

질문 # 180

CASE STUDY

Please use the following to answer the next question:

A mid-size US healthcare network has decided to develop an AI solution to detect a type of cancer that is most likely to arise in

adults. Specifically, the healthcare network intends to create a recognition algorithm that will perform an initial review of all imaging and then route records to a radiologist for secondary review pursuant to agreed-upon criteria (e.g., a confidence score below a threshold).

To date, the healthcare network has:

- Defined its AI ethical principles.
- Conducted discovery to identify the intended uses and success criteria for the system.
- Established an AI risk committee.
- Assembled a cross-functional team with clear roles and responsibilities.
- Created policies and procedures to document standards, workflows, timelines and risk thresholds during the project.

The healthcare network intends to retain a cloud provider to host the solution. It also intends to retain a large consulting firm to supplement its small data science team and help develop the algorithm using the healthcare network's existing data and de-identified data that is licensed from a large US clinical research partner.

Which stakeholder group is most important in selecting the specific type of algorithm?

- A. The consulting firm.
- B. The healthcare network's risk committee.
- C. The cloud provider.
- **D. The healthcare network's data science team.**

정답: D

설명:

The healthcare network's data science team is most important in selecting the specific algorithm type, as they possess the technical expertise and understanding of the data and clinical context required for this decision.

질문 # 181

Which of the following considerations is the most important in mitigating the potential of bias in training and testing data?

- A. Receiving explicit consent to use the data.
- B. Using privacy-enhancing tools to protect the data.
- **C. Validating that the data is representative.**
- D. Assessing the sufficiency of the third-party data.

정답: C

설명:

Ensuring that training and testing data is representative of the real-world population is critical to mitigating bias in AI models.
