Due to our professional team, the passing rate of CDCS-001 test of our ExamsTorrent is the highest in the CDCS-001 exam training. So, choosing ExamsTorrent, choosing success.

GAQM Certified Data Centre Specialist (CDCS) Sample Questions (Q36-Q41):

NEW QUESTION # 36

For which one of these processes is Direct Current essential, and will not work with alternating current?

- A. Electrolysis
- B. Turning a motor
- C. Lighting
- D. Heating

Answer: A

Explanation:

Direct Current (DC) is essential for the process of electrolysis. Electrolysis is the process of breaking down a compound using an electric current. The electric current causes ions to move, which results in a chemical reaction that breaks down the compound. In order for electrolysis to work, a direct current is required, as the ions must flow in one direction. Alternating Current (AC) changes direction and would not provide a consistent flow of ions.

Heating, lighting, and turning a motor can be done by either DC or AC. Heating can be done by passing an electric current through a heating element, which can be powered by either DC or AC. Lighting can be done by passing an electric current through a light bulb, which can be powered by either DC or AC. A motor can be powered by either DC or AC, but the type of motor and the application will determine which type of current is more suitable.

NEW QUESTION # 37

Which one of the following is an advantage of Air Cooled Self-Contained System?

- A. It has more heat removal capacity per unit
- B. It doesn't require ductwork and/or dropped ceiling
- C. Lowest installation cost
- D. All components contain more than one unit

Answer: B

Explanation:

Air cooled self-contained systems are highly efficient and do not require ductwork and/or dropped ceiling for installation. This makes them a great choice for locations where installation costs are a major factor, such as in residential applications, or in places with limited space. Additionally, air cooled self-contained systems have more heat removal capacity per unit compared to water cooled systems, making them more cost-effective in the long run.

NEW QUESTION # 38

Which one of the following measures the real power drawn by the load equipment?

- A. Amperes
- B. Volts
- C. Watts
- D. Amps

Answer: C

Explanation:

Explanation

Watts measures the real power drawn by the load equipment and is determined by multiplying the volts and amps of the load

NEW QUESTION # 39

_____ security means keeping unauthorized or ill-intentioned people out of places that they do not belong.

- A. Network
- **B. Physical**
- C. Logical
- D. Topological

Answer: B

Explanation:

Physical security means keeping unauthorized or ill-intentioned people out of places that they do not belong.

This can involve a variety of measures, such as locks, alarms, access control systems, cameras, and guards.

Physical security is an important part of any security system, as it helps to protect valuable assets and personnel from theft, vandalism, and other malicious activities.

NEW QUESTION # 40

What are the two main applications for ac (alternate current)?

- A. direct, pulsating
- B. static, dynamic
- **C. power, information**
- D. electric, magnetic

Answer: C

Explanation:

Explanation

The two main applications for AC (alternate current) are power and information. AC is used to generate and transfer power to electrical devices, and is also used to carry information signals in telecommunications.

NEW QUESTION # 41

.....

The Certified Data Centre Specialist (CDCS) (CDCS-001) certification exam is one of the top-rated and career-oriented certificates that are designed to validate an GAQM professional's skills and knowledge level.
