PSPO-I 認證在全球組織中受到高度重視和認可。它展示了產品負責人有效管理產品並為客戶提供價值的能力。它還開拓了新的職業機會並增強了產品負責人的專業信譽。

最新的 Professional Scrum Product Owner PSPO-I 免費考試真題 (Q24-Q29):

問題 #24

In the Daily Scrum, the Developers plans the work for the next 24 hours.

- A. True
- B. False

答案: A

問題 #25

The Product Owner is the person who will be held accountable if a product does not achieve its goals or deliver value. Does this mean that the Product Owner has the final say over the Definition of Done?
(choose the best answer)

- A. No, the Scrum Team decides the Definition of Done, if it is not a standard of the organization. The Product Owner is just one member of the Scrum Team
- B. Yes, the Product Owner decides the Definition of Done. The Developers may be consulted.

答案: A

解題說明:

* The Definition of Done is a formal description of the state of the Increment when it meets the quality measures required for the product. The Definition of Done is used to assess when work is complete on the product Increment.

* The Definition of Done is defined by the Scrum Team, not by the Product Owner alone. The Scrum Team consists of one Product Owner, one Scrum Master, and Developers. They are all accountable for creating a valuable, useful, and potentially releasable product Increment each Sprint.

* The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. The Product Owner is responsible for managing and refining the Product Backlog, collaborating with the stakeholders and the Developers, and ordering the items in a way that best achieves goals and missions. The Product Owner represents the interests of everyone with a stake in the product and ensures that the Scrum Team works on the right things at the right time.

* The Developers are accountable for creating a "Done" Increment that meets the Definition of Done each Sprint. The Developers are responsible for planning and executing the Sprint Backlog, designing and building the product functionality, testing and improving the product quality, and delivering a potentially releasable Increment. The Developers work closely with the Product Owner to understand and clarify the Product Backlog items, provide feedback and estimates, and suggest improvements and innovations.

* The Scrum Master is accountable for establishing Scrum as defined in the Scrum Guide. The Scrum Master is responsible for promoting and supporting Scrum as defined in the Scrum Guide. The Scrum Master does this by helping everyone understand Scrum theory and practice, both within the Scrum Team and the organization.

* The Definition of Done may vary from one Scrum Team to another, depending on the context and domain of work. However, it must be consistent within one team. If there are multiple Scrum Teams working on one product, they must share a common Definition of Done. If there is an organizational standard for a Definition of Done, all Scrum Teams must follow it as a minimum.

問題 #26

The length of a Sprint should be:

- A. All answers are correct.
- B. Fixed (one month or less) to create consistency.
- C. Short enough to have many learning cycles and limit risk of cost and effort.
- D. Short enough that the Sprint Goal not becomes invalid.

答案: A

問題 #27

When is the Sprint Backlog created?
(choose the best answer)

- A. During refinement.
- B. During the Sprint Retrospective.
- **C. During Sprint Planning.**
- D. Prior to Sprint Planning.

答案： C

解題說明：

Explanation

The Sprint Backlog is created during Sprint Planning, where the Developers select the Product Backlog items that they can deliver in the Sprint and create a plan for how to do the work. The Scrum Guide states that "The Sprint Backlog is composed of the Sprint Goal (why), the set of Product Backlog items selected for the Sprint (what), as well as an actionable plan for delivering the Increment (how)."¹ The Sprint Backlog is owned and managed by the Developers, who can update it throughout the Sprint as more is learned.

問題 #28

Which metrics will help a Product Owner determine if a product is delivering value?
(choose the best two answers)

- A. Percentage of scope implemented.
- B. Productivity.
- **C. Time to market.**
- **D. Customer satisfaction.**
- E. Velocity.

答案： C,D
