Free PDF Real JN0-481 Question & Leader in Qualification Exams & Efficient JN0-481 Latest Dumps Ebook
On Prep4King website you can free download part of the exam questions and answers about Juniper Certification JN0-481 Exam to quiz our reliability. Prep4King's products can 100% put you onto a success away, then the pinnacle of IT is a step closer to you.

Prep4King offers authentic and actual JN0-481 dumps that every candidate can rely on for good preparation. Our top priority is to give you the most reliable prep material that helps you pass the JN0-481 Exam on the first attempt. In addition, we offer up to three months of free Data Center, Specialist (JNCIS-DC) questions updates.

>> Real JN0-481 Question <<

JN0-481 Actual Real Questions: Data Center, Specialist (JNCIS-DC) & JN0-481 Practice Questions

In this Desktop-based Juniper JN0-481 practice exam software, you will enjoy the opportunity to self-exam your preparation. The chance to customize the Juniper JN0-481 practice exams according to the time and types of Data Center, Specialist (JNCIS-DC) (JN0-481) practice test questions will contribute to your ease. This format operates only on Windows-based devices. But what is helpful is that it functions without an active internet connection. It copies the exact pattern and style of the real Data Center, Specialist (JNCIS-DC) (JN0-481) exam to make your preparation productive and relevant.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q23-Q28):

NEW QUESTION # 23
What does EVPN use lo identity which remote leaf device advertised the EVPN route?

- A. a community tag

- B. a route distinguisher value
- C. a VRF target value
- D. a route target value

Answer: B

Explanation:
EVPN uses a route distinguisher (RD) value to identify which remote leaf device advertised the EVPN route. An RD is a 64-bit value that is prepended to the EVPN NLRI to create a unique VPNv4 or VPNv6 prefix. The RD value is usually derived from the IP address of the PE that originates the EVPN route. By comparing the RD values of different EVPN routes, a PE can determine which remote PE advertised the route and which VRF the route belongs to.

NEW QUESTION # 24
Which two protocols can be used to advertise EVPN routes? (Choose two.)

- A. MP-EBGP
- B. MP-IBGP
- C. IS-IS
- D. OSPF

Answer: A,B

NEW QUESTION # 25
You are working with a three-stage IP fabric using EBGP for peering. In this scenario, which two actions are required to implement ECMP? (Choose two.)

- A. Use a load balancing policy applied to BGP as an export policy.
- B. Use a load balancing policy applied to the forwarding table as an export policy.
- C. Use a load balancing policy applied lo BGP as an import policy.
- D. Use the multipath multiple-as BGP parameter.

Answer: A,D

Explanation:
To implement ECMP in IP fabric using EBGP, you need to enable BGP to install multiple equal- cost paths in the routing table and to advertise them to the peers.

NEW QUESTION # 26
You have a virtual network that needs controlled access to other virtual networks in the same routing zone. Using the Juniper Apstra Ul. which feature would be used to accomplish this task?

- A. security policy
- B. routing policy
- C. anti-affinity policy
- D. interface policy

Answer: A

Explanation:
A security policy is the feature that would be used to accomplish the task of controlling access to other virtual networks in the same routing zone using the Juniper Apstra UI. A security policy allows you to define rules that specify which traffic is allowed or denied between different virtual networks, IP endpoints, or routing zones. A security policy can be applied to one or more virtual networks in the same routing zone, and it can use various criteria to match the traffic, such as source and destination IP addresses, protocols, ports, or tags. A security policy can also support DHCP relay, which enables the forwarding of DHCP requests from one virtual network to another.

NEW QUESTION # 27

In Juniper Apstra, which statement is correct?

- A. VMware anomaly detection requires a vCenter server configured under External Systems
- B. VMware anomaly detection requires an Apstra server running on VMware.
- C. VMware anomaly detection is on by default.
- D. VMware anomaly detection requires a VMware hypervisor with exports enabled.

Answer: A

Explanation:
VMware anomaly detection is a feature of Apstra that provides visibility and validation of the virtual network settings and the physical network settings in a VMware vSphere environment. To enable this feature, Apstra requires a connection to a vCenter server that manages the ESX/ESXi hosts and the VMs connected to the Apstra-managed leaf switches. The vCenter server must be configured under External Systems in the Apstra web interface, and the vCenter integration must be staged and committed in the blueprint. This allows Apstra to collect information about VMs, ESX/ESXi hosts, port groups, and VDS, and to flag any inconsistencies or mismatches that might affect VM connectivity.

NEW QUESTION # 28

......

We are living in a good society; everything is changing so fast with the development of technology. So an ambitious person must be able to realize his dreams if he is willing to make efforts. Winners always know the harder they work the luckier they are. Our JN0-481 practice materials are prepared for the diligent people craving for success. Almost all people pursuit a promising career, the reality is not everyone acts quickly and persistently. That is the reason why success belongs to few people.

JN0-481 Latest Dumps Ebook: https://www.prep4king.com/JN0-481-exam-prep-material.html

After your purchase of our JN0-481 exam braindumps, the after sales services are considerate as well, Our JN0-481 exam preparation will protect the interests of every user, So high-quality contents and flexible choices of JN0-481 learning mode will bring about the excellent learning experience for you, Obviously, their performance is wonderful with the help of our outstanding JN0-481 learning materials.

Each idea is on a separate line, created by pressing Enter/Return, JN0-481 To choose the best libraries that support required application features at the minimum hardware cost is essential.
