

# 1Z0-771 Torrent Anleitung - 1Z0-771 Studienführer & 1Z0-771 wirkliche Prüfung

Laden Sie die neuesten DeutschPrüfung 1Z0-771 PDF-Versionen von Prüfungsfragen kostenlos von Google Drive herunter:  
[https://drive.google.com/open?id=14kqsUWTGD-ygOZgB\\_5nptAF-QKUFDIVJ](https://drive.google.com/open?id=14kqsUWTGD-ygOZgB_5nptAF-QKUFDIVJ)

Wenn Sie finden, dass unsere 1Z0-771 Prüfungsmaterialien Qualitätsproblem hat oder wenn Sie die Prüfung nicht bestanden haben, zahlen wir Ihnen bedingungslos die gesamte Summe zurück. Die Fragen und Antworten zur Oracle 1Z0-771 Zertifizierungsprüfung von DeutschPrüfung umfassen fast alle Wissensgebiete der Oracle 1Z0-771 Zertifizierungsprüfung.

## Oracle 1Z0-771 Prüfungsplan:

| Thema   | Einzelheiten                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thema 1 | <ul style="list-style-type: none"><li>• Creating and Using Dynamic Actions and Plug-ins: This section tests the expertise of Developers in implementing dynamic actions. It covers configuring event-driven behaviors and integrating plug-ins to create responsive and interactive application features.</li></ul>                                                                                                      |
| Thema 2 | <ul style="list-style-type: none"><li>• Adding Additional Pages to Your Application: This section assesses the skills of Application Developers in expanding application functionalities. It involves creating Oracle JET charts, calendars, trees, and maps to enhance data visualization and user interaction.</li></ul>                                                                                               |
| Thema 3 | <ul style="list-style-type: none"><li>• Getting Started with Oracle APEX on the Oracle Autonomous Database: This section of the exam measures the skills of APEX Developers in understanding Oracle APEX and its core components. It covers the creation and management of workspaces, providing an overview of how APEX integrates with the Oracle Autonomous Database to streamline application development.</li></ul> |
| Thema 4 | <ul style="list-style-type: none"><li>• Managing Workflows and Tasks: This section evaluates the proficiency of Process Automation Specialists in workflow management. It covers customizing workflows, using approval processes, and handling unified task lists to streamline business processes within applications.</li></ul>                                                                                        |

|          |                                                                                                                                                                                                                                                                                                                                                                                                |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thema 5  | <ul style="list-style-type: none"> <li>Using Themes and Theme Styles: This section tests the abilities of UI Designers in applying visual themes to applications. It involves selecting and customizing themes, using Theme Roller for design adjustments, and creating template components for consistent branding.</li> </ul>                                                                |
| Thema 6  | <ul style="list-style-type: none"> <li>Creating Application Page Controls: This section tests the abilities of Frontend Developers in implementing interactive page elements. It includes creating page-level items, buttons, and controls that enhance navigation and user interaction within APEX applications.</li> </ul>                                                                   |
| Thema 7  | <ul style="list-style-type: none"> <li>Managing Application Data: This section evaluates the expertise of Data Engineers in handling application data. It covers using collections, managing REST-enabled SQL references, integrating REST Data Sources, and synchronizing data across different environments.</li> </ul>                                                                      |
| Thema 8  | <ul style="list-style-type: none"> <li>Migrating Application Development Between Environments: This section measures the abilities of DevOps Engineers in managing application deployments. It includes exporting and importing application artifacts, performing remote deployments, and maintaining working copies to ensure smooth transitions between development environments.</li> </ul> |
| Thema 9  | <ul style="list-style-type: none"> <li>Adding Computations, Processes, Validations, and Branches: This section measures the knowledge of Backend Developers in implementing application logic. It focuses on configuring computations, processes, validations, and page branches to automate workflows and ensure data integrity.</li> </ul>                                                   |
| Thema 10 | <ul style="list-style-type: none"> <li>Implementing Security in Your Application: This section evaluates the knowledge of Security Specialists in securing APEX applications. It covers authentication schemes, authorization controls, and session state protection to ensure application security and user access management.</li> </ul>                                                     |
| Thema 11 | <ul style="list-style-type: none"> <li>Creating Progressive Web Apps: This section assesses the skills of Web Developers in building Progressive Web Applications (PWAs). It includes enhancing application accessibility, implementing push notifications, and optimizing applications for seamless cross-device experiences.</li> </ul>                                                      |
| Thema 12 | <ul style="list-style-type: none"> <li>Managing Pages and Regions: This section measures the knowledge of UI Designers in structuring application layouts. It covers creating different types of pages and regions, managing page components within Page Designer, and ensuring an optimized user interface for applications.</li> </ul>                                                       |
| Thema 13 | <ul style="list-style-type: none"> <li>Developing Reports: This section assesses the skills of Report Developers in creating interactive reports and dashboards. It involves customizing reports, working with faceted search pages, integrating smart filters, and designing visually appealing data presentations using Oracle APEX.</li> </ul>                                              |
| Thema 14 | <ul style="list-style-type: none"> <li>Using SQL Workshop: This section evaluates the expertise of Database Developers in managing database objects using SQL Workshop. It includes creating and modifying database structures, running SQL commands and scripts, and efficiently loading and unloading data through the Data Workshop utility to simplify database interactions.</li> </ul>   |
| Thema 15 | <ul style="list-style-type: none"> <li>Extending Application Capabilities: This section measures the skills of APEX Developers in enhancing application functionality. It includes sending automated emails, implementing plug-ins, and utilizing automation features to improve efficiency and extend capabilities.</li> </ul>                                                                |
| Thema 16 | <ul style="list-style-type: none"> <li>Creating an APEX Application: This section tests the abilities of Application Developers in building APEX applications. It focuses on creating applications from existing tables and external files, providing a fundamental understanding of the App Builder tool and its role in application development.</li> </ul>                                  |

>> 1Z0-771 Probesfragen <<

## Echte und neueste 1Z0-771 Fragen und Antworten der Oracle 1Z0-771 Zertifizierungsprüfung

Nun ist eine Gesellschaft, die mit den fähigen Leuten überschwemmt. Aber viele Fachleute fehlen trotzdem doch. Beispielsweise

fehlen in der IT-Branche Techniker. Und die Oracle 1Z0-771 Zertifizierungsprüfung ist eine Prüfung, die IT-Technik testet. DeutschPrüfung ist eine Website, die Ihnen Kenntnisse zur Oracle 1Z0-771 Zertifizierungsprüfung liefert.

## Oracle APEX Cloud Developer Professional 1Z0-771 Prüfungsfragen mit Lösungen (Q46-Q51):

### 46. Frage

You have an Interactive Grid component and you are enabling the Save Report functionality. As what can end users save the report type?

- A. As Primary
- B. As Private and Primary only
- **C. As Private and Public only**

**Antwort: C**

Begründung:

In an Interactive Grid, the "Save Report" functionality allows end users to save customizations (e.g., filters, column order). The available options are:

Private: Saved for the individual user only, visible only to them.

Public: Saved and shared with all users of the application, if permitted by the developer.

Primary: This is a developer-defined default report, not an end-user save option. End users cannot overwrite the Primary report; they can only save as Private or Public (if enabled via the "Allow Public Reports" attribute).

This flexibility empowers users to personalize grids while allowing shared configurations, enhancing collaboration and usability.

### 47. Frage

Which two Plugin types can be created in Oracle APEX?

- **A. Process**
- B. Validation
- **C. Region**
- D. Email Template

**Antwort: A,C**

Begründung:

Plugins extend APEX's functionality beyond built-in components:

C . Process: A Process plugin executes custom server-side logic (e.g., PL/SQL) during page processing or AJAX calls. Example: A plugin to sync data with an external API after form submission. It's defined with execution points and parameters.

D . Region: A Region plugin creates custom UI areas (e.g., a dynamic chart or carousel). Example: A plugin rendering a custom dashboard. It supports attributes, templates, and refresh events.

A . Validation: While validations are customizable, they're not a plugin type; they're declarative or PL/SQL-based within APEX.

B . Email Template: Email formatting is handled via APEX\_MAIL or templates in Shared Components, not as plugins.

Technical Insight: Plugins are created in Shared Components > Plug-ins, requiring PL/SQL for logic, JavaScript/CSS for UI, and a render function. For instance, a Region plugin might use `apex_plugin.t_region` to define its output.

Use Case: A Process plugin to log audit trails or a Region plugin for a unique data visualization.

Pitfall: Developing plugins requires advanced skills; test thoroughly to avoid runtime errors.

### 48. Frage

Which API can be used to send Push Notifications immediately in Oracle APEX?

- A. APEX\_PWA.PURGE\_QUEUE
- **B. APEX\_PWA.PUSH\_QUEUE**
- C. APEX\_PWA.HAS\_PUSH\_SUBSCRIPTION

**Antwort: B**

Begründung:

The APEX\_PWA package manages Push Notifications:

B . APEX\_PWA.PUSH\_QUEUE: This procedure forces immediate processing of the Push Notification queue, sending queued messages (added via APEX\_PWA.SEND) to subscribed devices without waiting for the default scheduler (e.g., every 5 minutes). Example: APEX\_PWA.PUSH\_QUEUE; ensures a "Meeting now!" alert goes out instantly.

A . APEX\_PWA.HAS\_PUSH\_SUBSCRIPTION: Checks if a user has an active subscription (returns BOOLEAN), not for sending.

C . APEX\_PWA.PURGE\_QUEUE: Clears the queue, discarding unsent messages, not sending them.

Technical Insight: PUSH\_QUEUE triggers a job to contact the push service (e.g., Firebase), using VAPID keys from the PWA configuration.

Use Case: Urgent alerts (e.g., system outage) need immediate delivery, bypassing delays.

Pitfall: Overuse can strain the server; use judiciously for time-sensitive messages.

#### 49. Frage

Which three statements are true about Data Workshops in Oracle APEX?

- A. You can load or unload a single table at a time.
- B. You can load or unload multiple tables at a time.
- C. You can unload data from a new or existing table.
- D. You can load data into a new or existing table.

Antwort: A,C,D

Begründung:

Data Workshop in SQL Workshop is a powerful tool for importing/exporting table data:

B . You can load or unload a single table at a time: The wizard focuses on one table per operation. For loading, you upload a file (e.g., CSV) and map it to a single table; for unloading, you select one table to export (e.g., EMP to CSV). This granularity ensures precision and simplicity.

C . You can unload data from a new or existing table: Unloading (exporting) works on any table in the schema, whether newly created (e.g., via Quick SQL) or pre-existing (e.g., DEPT). The "Unload" option generates a file (e.g., CSV, JSON) from the table's data.

D . You can load data into a new or existing table: Loading supports creating a new table from the uploaded file (e.g., CSV defines NEW\_EMP) or appending/overwriting an existing one (e.g., EMP). The wizard prompts for table creation or selection.

A . You can load or unload multiple tables at a time: False; Data Workshop processes one table per wizard run. Multiple tables require separate operations or custom SQL scripts.

Technical Insight: Loading uses APEX\_DATA\_LOADING internally, parsing files into rows, while unloading leverages APEX\_DATA\_EXPORT. For example, uploading emp.csv with "Create New Table" generates a table with inferred columns.

Use Case: Migrating EMP data from a legacy system (CSV) into APEX, then exporting it later for analysis.

Pitfall: Multi-table operations need SQL Scripts or external tools like SQL Developer.

#### 50. Frage

Which two statements are true about the APEX\_MAIL API?

- A. The APEX\_MAIL package supports sending emails only to Oracle database users.
- B. You can send emails using the APEX\_MAIL package from an Oracle APEX application.
- C. You can add files as attachments to your emails using the APEX\_MAIL package.
- D. You can receive emails using the APEX\_MAIL package in an Oracle APEX application.

Antwort: B,C

Begründung:

The APEX\_MAIL API facilitates email functionality:

A . You can add files as attachments: Using APEX\_MAIL.ADD\_ATTACHMENT (e.g.,

APEX\_MAIL.ADD\_ATTACHMENT(p\_mail\_id, p\_attachment, p\_filename)), you can attach BLOBs (e.g., PDFs) to emails.

C . You can send emails: APEX\_MAIL.SEND (e.g., APEX\_MAIL.SEND(p\_to => 'user@example.com', p\_body => 'Hello')) sends emails from APEX, leveraging the configured mail server.

B . You can receive emails: False; APEX\_MAIL is send-only; receiving requires custom integration (e.g., IMAP).

D . Only to Oracle database users: False; emails can go to any valid address, not just database users.

Pitfall: Ensure the mail queue is processed (APEX\_MAIL.PUSH\_QUEUE) for timely delivery.

## 51. Frage

.....

Um Ihnen bei der Vorbereitung der Oracle 1Z0-771 Zertifizierungsprüfung zu helfen, haben wir umfassende Kenntnisse und Erfahrungen. Die von uns bearbeiteten Fragenkataloge werden Ihnen helfen, das Zertifikat leicht zu erhalten. Die Schulungsunterlagen von DeutschPrüfung umfassen die freie Tests, Fragen und Antworten, Übungen sowie Lerntipps zur Oracle 1Z0-771 Zertifizierungsprüfung.
