## Pass CMMC-CCP Guide | Reliable CMMC-CCP Practice Materials

Our CMMC-CCP test question with other product of different thing is we have the most core expert team to update our CMMC-CCP study materials, learning platform to changes with the change of the exam outline. If not timely updating CMMC-CCP training materials will let users reduce the learning efficiency of even lags behind that of other competitors, the consequence is that users and we don't want to see the phenomenon of the worst, so in order to prevent the occurrence of this kind of risk, the CMMC-CCP Practice Test materials give supervision and update the progress every day, it emphasized the key selling point of the product.

## Cyber AB Certified CMMC Professional (CCP) Exam Sample Questions (Q150-Q155):

### NEW QUESTION # 150

Which document is the BEST source for descriptions of each practice or process contained within the various CMMC domains?

- A. CMMC Glossary
- B. CMMC Assessment Process
- C. CMMC Appendices
- D. CMMC Assessment Guide Levels 1 and 2

**Answer: D**

Explanation:

Understanding the Best Source for CMMC Practice Descriptions

The CMMC Assessment Guide (Levels 1 and 2) is the primary and most authoritative document for detailed descriptions of each

practice and process within the various CMMC domains.

Step-by-Step Breakdown:

#1. What is the CMMC Assessment Guide?

The CMMC Assessment Guide provides detailed explanations of:

Each CMMC practice within its respective domain.

The assessment objectives for verifying implementation.

Examples of evidence required to demonstrate compliance.

CMMC 2.0 includes two levels:

Level 1: 17 basic cybersecurity practices.

Level 2: 110 practices aligned with NIST SP 800-171.

The Assessment Guide defines how assessors evaluate compliance.

#2. Why the Other Answer Choices Are Incorrect:

(A) CMMC Glossary#

The Glossary provides definitions of terms used in CMMC but does not describe specific practices in detail.

(B) CMMC Appendices#

Appendices include supplementary information like references and scoping guidance, but they do not provide full descriptions of practices.

(C) CMMC Assessment Process#

The Assessment Process Guide explains how assessments are conducted, but it does not describe each practice in detail.

Final Validation from CMMC Documentation:

The CMMC Assessment Guide (Levels 1 and 2) is the official source for descriptions of each CMMC practice and process, making it the best reference for understanding compliance requirements.

## NEW QUESTION # 151

An assessment is being completed at a client site that is not far from the Lead Assessor's home office. The client provides a laptop for the duration of the engagement. During a meeting with the network engineers, the Lead Assessor requests information about the network. They respond that they have a significant number of drawings they can provide via their secure cloud storage service. The Lead Assessor returns to their home office and decides to review the documents. What is the BEST way to retrieve the documents?

- A. Log into the client VPN from the assessor's laptop and retrieve the documents from the secure cloud storage service.
- **B. Log into the client VPN from the client laptop and retrieve the documents from the secure cloud storage service.**
- C. Use their home office workstation to retrieve the documents from the secure cloud storage service and save them to a USB stick.
- D. Log into the secure cloud storage service to save copies of the documents on both the work and client laptops.

**Answer: B**

Explanation:

Best Practices for Handling Sensitive Assessment Information CMMC assessments involve handling sensitive and potentially CUI-related documents. Assessors must follow strict security policies to avoid unauthorized access, data leaks, or non-compliance with CMMC 2.0 and NIST SP 800-171 requirements.

Why Logging into the Client VPN on the Client Laptop is the Best Approach:

Ensures Data Protection: The client laptop is likely configured to meet security controls required for handling assessment-related materials.

Prevents Data Spillage: Keeping all assessment-related activities within the client's secured environment reduces the risk of data leakage or unauthorized storage.

Maintains Compliance with CMMC/NIST Guidelines: Using a properly configured client laptop and secured connection ensures compliance with NIST SP 800-171 controls on secure remote access (Requirement 3.13.12).

A). "Log into the secure cloud storage service to save copies of the documents on both the work and client laptops."

Incorrect# Sensitive data should not be duplicated across multiple systems, especially a non-client-approved laptop. Storing it on an unauthorized system violates data handling best practices.

C). "Log into the client VPN from the assessor's laptop and retrieve the documents from the secure cloud storage service."

Incorrect# The assessor's laptop may not be authorized or secured to handle client data. CMMC guidelines emphasize using approved, secured systems for assessment-related information.

D). "Use their home office workstation to retrieve the documents from the secure cloud storage service and save them to a USB stick." Incorrect# Transferring sensitive documents via USB introduces security risks, including unauthorized data storage and potential malware contamination.

Home office workstations are unlikely to be authorized for handling CMMC-sensitive data.

#Final Answer B. Log into the client VPN from the client laptop and retrieve the documents from the secure cloud storage service.

### NEW QUESTION # 152

Which term describes the prevention of damage to, protection of, and restoration of computers and electronic communications systems/services, including information contained therein, to ensure its availability, integrity, authentication, confidentiality, and nonrepudiation?

- A. Cybersecurity
- B. Network security
- C. Data security
- D. Information security

**Answer: A**

Explanation:

The term that describes "the prevention of damage to, protection of, and restoration of computers and electronic communication systems/services, including information contained therein, to ensure its availability, integrity, authentication, confidentiality, and non-repudiation" is Cybersecurity.

Step-by-Step Breakdown#1. Cybersecurity Defined

\* Cybersecurity focuses on protecting networks, systems, and data from cyber threats.

\* It includes measures to ensure:

\* Availability (data is accessible when needed).

\* Integrity (data is accurate and unaltered).

\* Authentication (verifying users' identities).

\* Confidentiality (ensuring only authorized access).

\* Non-repudiation (preventing denial of actions).

\* The definition in the question aligns directly with cybersecurity principles, making it the best answer.

#2. Why the Other Answer Choices Are Incorrect:

\* (B) Data Security#

\* Data security focuses specifically on protecting stored information (e.g., encryption, access controls), but cybersecurity is broader—it includes networks, systems, and communication services.

\* (C) Network Security#

\* Network security is a subset of cybersecurity that focuses on protecting network infrastructure (e.g., firewalls, intrusion detection systems).

\* The definition in the question includes more than just networks, so cybersecurity is the better choice.

\* (D) Information Security#

\* Information security (InfoSec) is related but broader than cybersecurity.

\* InfoSec covers physical and organizational security (e.g., policies, procedures) in addition to digital protections.

\* CMMC and NIST SP 800-171 define cybersecurity as the protection of systems, networks, and data from cyber threats.

\* DoD Cybersecurity Definitions (aligned with NIST) confirm that cybersecurity is the term that best fits the definition in the question.

Final Validation from CMMC Documentation:

### NEW QUESTION # 153

Which statement BEST describes an assessor's evidence gathering activities?

- A. Use interviews for assessing a Level 2 practice.
- B. Use examinations, interviews, and tests to gather sufficient evidence.
- C. Test all practices or objectives for a Level 2 practice
- D. Test certain assessment objectives to determine findings.

**Answer: B**

Explanation:

Under the CMMC Assessment Process (CAP) and CMMC 2.0 guidelines, assessors must gather objective evidence to validate that an organization meets the required security practices and processes. This evidence collection is performed through three primary assessment methods:

Examination - Reviewing documents, records, system configurations, and other artifacts.

Interviews - Speaking with personnel to verify processes, responsibilities, and understanding of security controls.

Testing - Observing system behavior, performing technical validation, and executing controls in real-time to verify effectiveness.

### Why Option D is Correct

The CMMC Assessment Process (CAP) states that an assessor must use a combination of evidence-gathering methods (examinations, interviews, and tests) to determine compliance.

CMMC 2.0 Level 2 (Aligned with NIST SP 800-171) requires assessors to verify not only that policies and procedures exist but also that they are implemented and effective.

Solely relying on one method (like interviews in Option A) is insufficient.

Testing all practices or objectives (Option B) is unnecessary, as assessors follow scoping guidance to determine which objectives need deeper examination.

Testing only "certain" objectives (Option C) does not fully align with the requirement of gathering sufficient evidence from multiple methods.

### CMMC 2.0 and Official Documentation References

CMMC Assessment Process (CAP) Guide, Section 3.5 - Assessment Methods explicitly defines the use of examinations, interviews, and tests as the foundation of an effective assessment.

CMMC 2.0 Level 2 Practices and NIST SP 800-171 require assessors to validate the presence, implementation, and effectiveness of security controls.

CMMC Appendix E: Assessment Procedures states that an assessor should use multiple sources of evidence to determine compliance.

### Final Verification

To ensure compliance with CMMC 2.0 guidelines and official documentation, an assessor must use examinations, interviews, and tests to gather evidence effectively, making Option D the correct answer.

## NEW QUESTION # 154

What type of criteria is used to answer the question "Does the Assessment Team have the right evidence?"

- A. Objectivity criteria
- B. Sufficiency criteria
- C. Subjectivity criteria
- D. Adequacy criteria

### Answer: D

#### Explanation:

In the context of CMMC 2.0 assessments, the sufficiency criteria are used to determine whether the assessment team has gathered enough evidence to support their conclusions about compliance with a given requirement.

#### Definition of Sufficiency Criteria:

Sufficiency refers to the quantity and completeness of the evidence collected during an assessment.

This ensures that the evidence collected is enough to support an objective and valid determination of compliance.

#### Why Sufficiency Matters in CMMC 2.0:

Assessors must ensure that the amount of evidence collected is adequate to substantiate findings without doubt or gaps.

This prevents situations where an organization might claim compliance but lacks the necessary documentation, technical evidence, or procedural validation to prove it.

#### Official CMMC 2.0 References:

The CMMC Assessment Process (CAP) Guide defines sufficiency as a key factor in validating assessment findings.

According to CMMC 2.0 Level 2 Scoping Guidance, assessors must apply sufficiency criteria when reviewing artifacts, documentation, interviews, and system configurations.

The DoD CMMC Assessment Guide (aligned with NIST SP 800-171A) emphasizes that compliance decisions must be supported by a sufficient amount of verifiable evidence.

#### Comparison with Other Criteria:

Adequacy Criteria# Focuses on quality of the evidence, not the quantity.

Objectivity Criteria# Ensures evidence is unbiased and impartial, not necessarily complete.

Subjectivity Criteria# Not applicable in CMMC since assessments must be objective and based on factual evidence.

Step-by-Step Breakdown: Conclusion: To verify compliance in CMMC 2.0 assessments, the assessment team must ensure sufficient evidence is available to support a determination. This makes "Sufficiency Criteria" (Option C) the correct answer.
