## SAP Certified Associate - Managing SAP S/4HANA Cloud Private Edition Projects Sample Questions (Q65-Q70):

### NEW QUESTION # 65

Which technologies should you use to integrate SAP S/4HANA Cloud Private Edition with an SAP public cloud solution? Note: There are 2 correct answers to this question.

- A. SAP Process Orchestration
- B. SAP Integration Suite
- C. SAP Connectivity service
- D. SAP HANA Cloud

**Answer: B,C**

Explanation:

Step 1 - Understanding the Question

The question asks which technologies are used to integrate SAP S/4HANA Cloud, Private Edition with SAP public cloud solutions (for example, SAP SuccessFactors, SAP Ariba, SAP Concur, or SAP Business Network).

SAP recommends cloud-native integration technologies that support secure, scalable, and managed connectivity between private and public cloud systems.

Step 2 - Evaluate Each Option

A). SAP Process Orchestration

\* SAP Process Orchestration (PO) is an on-premise middleware combining Process Integration (PI) and Business Process Management (BPM).

\* It is not part of SAP's recommended integration architecture for cloud-to-cloud scenarios.

\* SAP Integration Suite has replaced PO for modern cloud integrations.

Result: Incorrect - Legacy tool, not used for cloud integration.

B). SAP HANA Cloud

- \* SAP HANA Cloud is a database-as-a-service, not an integration platform.
- \* It stores and processes data but does not handle integration flows or connectivity between cloud solutions.

Result: Incorrect - Not used for system-to-system integration.

C). SAP Connectivity service

- \* The SAP Connectivity service is part of SAP Business Technology Platform (BTP).
- \* It enables secure communication between SAP BTP applications (including SAP Integration Suite) and on-premise or private systems like SAP S/4HANA Cloud, Private Edition.
- \* It provides the tunnel connection and secure channel required for data exchange between systems hosted in different environments.

Result: Correct - Used for secure connection between SAP BTP and Private Edition systems.

D). SAP Integration Suite

- \* SAP Integration Suite (part of BTP) is SAP's strategic cloud integration platform.
- \* It provides capabilities such as:
  - \* API management
  - \* Cloud integration (iFlows)
  - \* Event mesh for event-driven communication
  - \* Connectivity with public cloud and on-premise systems
- \* It is the primary tool for integrating SAP S/4HANA Cloud (Private or Public) with other SAP cloud solutions.

Result: Correct - Core integration technology for hybrid and cloud landscapes.

## NEW QUESTION # 66

How should an implementation consultant customize SAP Best Practices business processes?

- A. Make edits to the original process
- B. Use SAP Signavio Process Manager to edit the process
- C. Make a copy of the original process and edit the copy
- D. Use SAP Cloud ALM to edit the process

**Answer: C**

Explanation:

Step 1 - Understanding the question

This question asks how an implementation consultant should customize SAP Best Practices business processes in SAP S/4HANA Cloud, Private Edition.

SAP Best Practices are pre-delivered standard processes that provide ready-to-run configurations.

To maintain a clean core, SAP discourages editing the original process directly.

Step 2 - Evaluate each option

Option A: Make a copy of the original process and edit the copy

This is correct.

The correct approach is to copy the original Best Practice process into a customer workspace (for example, within SAP Signavio or SAP Solution Manager) and make necessary adjustments there.

This preserves the original SAP content and ensures that future updates or upgrades remain compatible.

Example 1:

A company copies the "Standard Order-to-Cash" process, modifies one approval step, and saves it as a new variant under its own namespace.

Example 2:

A finance consultant copies the "Journal Entry Posting" process to adjust document approval rules without touching the original Best Practice template.

Option B: Use SAP Cloud ALM to edit the process

This is incorrect.

SAP Cloud ALM is used to manage and monitor project tasks and test execution, not to directly edit Best Practice process content.

Option C: Use SAP Signavio Process Manager to edit the process

This is partially true in concept but not correct in this question's context.

While SAP Signavio can model and document processes, editing SAP Best Practice processes directly in Signavio is not the recommended or typical customization method for implementation consultants.

Option D: Make edits to the original process

This is incorrect.

Editing the original Best Practice process would violate clean-core principles and risk losing SAP-provided updates.

### NEW QUESTION # 67

What is the difference between the "New Implementation of SAP S/4HANA Cloud, public edition" and the "New Implementation of SAP S/4HANA, private edition" transition paths? Note: There are 2 correct answers to this question.
