They are the versions of the PDF, Software and APP online. You can choose the one which is your best suit of our AZ-140 Study Materials according to your study habits.

The AZ-140 Exam is intended for IT professionals who are responsible for configuring and operating Microsoft Azure Virtual Desktop. Configuring and Operating Microsoft Azure Virtual Desktop certification exam measures a candidate's knowledge and skills in the areas of AVD architecture, planning, deployment, migration, security, and management. It is an advanced-level exam and requires a good understanding of Azure technologies and services.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q10-Q15):

NEW QUESTION # 10

You have an Azure Virtual Desktop host pool named Pool1 and an Azure Storage account named storage1.

Pool1 and storage1 are in the same Azure region.

The current network utilization of the session hosts during peak hours is 95%.

You plan to use FSLogix profile containers stored in storage1 for users that connect to Pool1.

You need to configure the session hosts and storage1 to minimize network latency when loading and updating profiles.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Graphical user interface, text, application, chat or text message Description automatically generated

NEW QUESTION # 11

You plan to deploy Windows Virtual Desktop to meet the department requirements shown in the following table.

You plan to use Windows Virtual Desktop host pools with load balancing and autoscaling.

You need to recommend a host pool design that meets the requirements. The solution must minimize costs.

What is the minimum number of host pools you should recommend?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-host-pools-azure-marketplace>

3 Host Pools - The RemoteApp can be joined inside the IT Multi-Session desktop or the Engineering.

<https://docs.microsoft.com/en-us/azure/virtual-desktop/manage-app-groups> The default app group created for a new Azure Virtual Desktop host pool also publishes the full desktop. In addition, you can create one or more RemoteApp application groups for the host pool.

NEW QUESTION # 12

You have an Azure Virtual Desktop deployment that uses Azure Active Directory Domain Services (Azure AD DS). You have the following host pool:

* Name: Pool1

* Type: Personal

* Number of session hosts: 5

You plan to deploy two new session hosts to Pool1. What should you do before you deploy the session hosts?

- A. Create a scaling plan.
- B. Create a registration key.
- C. Precreate a computer account in Azure AD DS.
- D. Increase the maximum session limit.

Answer: C

Explanation:

Explanation

This is done by using the Add-AzDomainComputer cmdlet in PowerShell. After the computer accounts have been created, the new session hosts can be deployed. For more information, please refer to the following Microsoft documentation: <https://docs.microsoft.com/en-us/azure/virtual-desktop/create-session-host-pools#precreate-comp>

NEW QUESTION # 13

You have an Azure Virtual Desktop deployment that contains two Azure regions.

You plan to implement a disaster recovery solution for user profiles. The solution must meet the following requirements:

- Users must retain their user profiles if a single region fails.
- Administrative effort must be minimized.

What should you include in the recommendation?

- A. Azure Storage accounts that use zone-redundant storage (ZRS)
- B. FSLogix with VHDLocations
- C. Azure Site Recovery
- **D. FSLogix Cloud Cache**
- E. Azure Backup

Answer: D

NEW QUESTION # 14

You have an Azure Virtual Desktop deployment that contains the resources shown in the following table.

You need to enable just-in-time (JIT) VM access for all the session hosts.

What should you do first?

- **A. Assign network security groups (NSGs) to the network interfaces of the five session hosts.**
- B. Assign a network security group (NSG) to Subnet1.
- C. Configure Access control (IAM) for HostPool1.
- D. Deploy Azure Bastion to VNET1.

Answer: A

NEW QUESTION # 15

.....
