## Three Formats of PracticeVCE Microsoft AZ-120 Practice Questions

If you are one of such frustrated candidates, don't get panic. PracticeVCE declares its services in providing the real AZ-120 PDF Questions. It ensures that you would qualify for the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) certification exam on the maiden strive with brilliant grades. PracticeVCE has formulated the Planning and Administering Microsoft Azure for SAP Workloads (AZ-120) product in three versions. You will find their specifications below to understand them better.

## Microsoft Planning and Administering Microsoft Azure for SAP Workloads Sample Questions (Q297-Q302):

### NEW QUESTION # 297

You plan to deploy multiple SAP HANA virtual machines to Azure by using an Azure Resource Manager template. How should you configure Accelerated Networking and Write Accelerator in the template? To answer, drag the appropriate values to the correct targets. Each value may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

**Answer:**

Explanation:

Explanation

Box 1: true

enableAcceleratedNetworking: If the network interface is accelerated networking enabled.

To further reduce network latency between Azure VMs, we [Micorosoft] recommend that you choose Azure Accelerated Networking. Use it when you deploy Azure VMs for an SAP workload, especially for the SAP application layer and the SAP DBMS layer.

Box 2: true

Write Accelerator should be used for the volumes that contain the transaction log or redo logs of a DBMS. It is not recommended to use Write Accelerator for the data volumes of a DBMS as the feature has been optimized to be used against log disks.

**NEW QUESTION # 298**

You have an SAP development landscape on Azure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 299**

You plan to migrate an SAP ERP Central Component (SAP ECC) production system to Azure.

You are reviewing the SAP EarlyWatch Alert report for the system.

You need to recommend sizes for the Azure virtual machines that will host the system.

Which two sections of the report should you review? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Hardware Configuration under Landscape
- B. Database and ABAP Load Optimization
- C. Data Volume Management
- D. Patch Levels under SAP Software Configuration
- E. Hardware Capacity

**Answer: A,E**

Explanation:

<https://wiki.scn.sap.com/wiki/display/SM/Hardware+Capacity+Checks+in+EWA>

**NEW QUESTION # 300**

Your on-premises network contains the following:

\* A 1-Gbps internet connection

\* An SAP HANA 1.0 instance that has a 4-TB database

\* An SAP landscape that uses SUSE Linux Enterprise (SLES) 12

You have an Azure subscription that contains a virtual machine. The virtual machine is of the M64s SKU and runs SLES 15 and HANA 2.0.

You need to migrate the database to the virtual machine and upgrade the database to HANA 2.0. The solution must meet the following requirements:

\* The migration must be performed during a weekend.

\* The database can be offline during the migration.

Which migration method should you use?

- A. Azure Migrate

- B. HANA database export and import
- C. HANA database backup and log shipping
- D. Azure Data Box

**Answer: B**

### NEW QUESTION # 301

You are planning replication of the SAP HANA database for the disaster recovery environment in Azure.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: No

SAP HANA Replication consists of one primary node and at least one secondary node. Changes to the data on the primary node are replicated to the secondary node synchronously or asynchronously.

Box 2: No

Since SPS11 SAP HANA system replication can be run in two different operation modes:

delta\_datashipping

logreplay

Box 3: Yes

Topic 2, Litware, inc Case Study

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all question include on this exam in the time provided.

To answer the question included in a case study, you will need to reference information that is provided in the case study. Case studies might contain and other resources that provide information about the scenario that is describe in the case study. Each question is independent of the other question in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To Start the case study

To display the first question in this case study, click the Next button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such the content requirements, existing environment, and problem statements, if the case study has an All Information tab, note that the information displayed its identical to the information displayed on the subsequence tabs. When you are ready to answer a question click the Question button to return to the question.

Overview

Litware, inc. is an international manufacturing company that has 3,000 employees.

Litware has two main offices. The offices are located in Miami, FL, and Madrid Spain.

Existing Environment

Infrastructure

Litware currently uses a third-party provider to host a datacenter in Miami and a disaster recovery datacenter in Chicago, it.

The network contains an Active Directory domain named litware.com. Litware has two third-party applications hosted in Azure.

Litware already implemented a site-to-site VPN connection between the on-premises network and Azure.

SAP Environment

Litware currently runs the following SAP products:

- \* Enhancement Pack 6 for SAP ERP Central Component 6.0 (SAP ECC 6.0)
- \* SAP Extended Warehouse Management (SAP EWM)
- \* SAP Business Warehouse (SAP BW)
- \* SAP NetWeaver Process Integration (PI)
- \* SAP Solution Manager

All users run on the Windows Server platform. All databases use Microsoft SQL Server. Currently, you have

20 production servers.

You have 30 non-production servers including five testing servers, five development servers, five quality assurance (QA) servers, and

15 pre-production servers.

Currently, all SAP applications are in the litware.com domain.

#### Problem Statements

The current version of SAP ECC has a transaction that, when run in batches overnight, takes eight hours to complete. You confirm that upgrading to SAP Business Suite on HANA will improve performance because of code changes and the SAP HANA database platform.

Litware is dissatisfied with the performance of its current hosted infrastructure vendor. Litware experienced several hardware failures and the vendor struggled to adequately support its 24/7 business operation.

#### Business Goals

Litware identifies the following business goals:

- \* Increase the performance of SAP ECC application by moving to SAP HANA. All other databases will remain on SQL Server.
- \* Move away from the current infrastructure vendor to increase the stability and availability of the SAP services.
- \* Use the new Environment, Health and Safety (EH&S) in Recipe Management function.
- \* Ensure that any migration activities can be completed within a 48-hour period during a weekend.

#### Planned Changes

Litware identifies the following planned changes:

- \* Migrate SAP to Azure.
- \* Upgrade and migrate SAP ECC to SAP Business Suite on HANA Enhancement Pack 8.

#### Technical requirements

Litware identifies the following technical requirements:

- \* Implement automated backups.
- \* Support load testing during the migration.
- \* Identify opportunities to reduce costs during the migration.
- \* Continue to use the Litware.com domain for all SAP landscapes.
- \* Ensure that all SAP applications and databases are highly available.
- \* Remove all SAP components from the on-premises network once the migration is complete.
- \* Minimize the purchase of additional SAP licenses. SAP HANA license were already purchased.
- \* Ensure that SAP can provide technical support for all the SAP landscapes deployed to Azure.

## NEW QUESTION # 302

.....

If you are finding a study material in order to get away from your exam, you can spend little time to know about our AZ-120 test torrent, it must suit for you. Therefore, for your convenience, more choices are provided for you, we are pleased to suggest you to choose our Planning and Administering Microsoft Azure for SAP Workloads guide torrent for your exam. If you choose our product and take it seriously consideration, we can make sure it will be very suitable for you to help you pass your exam and get the AZ-120 Certification successfully. You will find Our AZ-120 guide torrent is the best choice for you
