Practice MSSC CLT-4.0 Tests & Latest CLT-4.0 Test Prep

We provide the best privacy protection to the client and all the information of our client to buy our CLT-4.0 test prep is strictly kept secret. All our client come from the whole world and the people in some countries attach high importance to the privacy protection. Even some people worry about that we will sell their information to the third side and cause unknown or serious consequences. The aim of our service is to provide the CLT-4.0 Exam Torrent to the client and help them pass the exam and not to disclose their privacy to others and seek illegal interests. So please rest assured that our Certified Logistics Technician (CLT) 4.0 prep torrent is safe and won't do harm to you.

MSSC Certified Logistics Technician (CLT) 4.0 Sample Questions (Q80-Q85):

NEW QUESTION # 80

Which of the following is true of load weight limits?

- A. The only reason for weighing shipments is to determine transport fees.
- B. Overweight shipments do not require permits.
- C. Shipments are weighed, and the information is recorded on the Bill of Lading.
- **D. Shipments must not exceed legal weight limits for the transport vehicle.**

Answer: D

Explanation:

According to CLT 4.0, all shipments must comply with federal, state, and local load weight limits for safety and infrastructure protection. Exceeding legal limits without appropriate permits can result in fines, damage to vehicles and roadways, and safety hazards. The Bill of Lading or manifest typically records verified shipment weights, which carriers must check before dispatch. While weighing also helps calculate freight charges and load balancing, the primary legal requirement is to ensure that loads do not exceed

the vehicle's gross weight or axle limits. Compliance helps maintain equipment longevity, reduce accident risk, and adhere to DOT enforcement standards.

NEW QUESTION # 81

Pick-to-light systems provide a fast and accurate way to do which of the following?

- A. interface information to truck drivers
- B. select house lighting schemes
- C. calculate lighting brightness
- D. automatically verify a correct pick

Answer: D

Explanation:

A Pick-to-Light (PTL) system is a semi-automated order fulfillment technology that uses light displays to guide workers to the correct picking locations. According to CLT's "Order Processing" materials, PTL increases speed and accuracy by illuminating the bin or slot containing the required item, while digital displays show quantity and confirmation buttons verify completion. This eliminates paper pick lists and reduces errors associated with manual documentation. Unlike systems that rely on visual searches or scanning after the fact, PTL enables real-time verification at the point of pick. The CLT curriculum emphasizes that these systems improve worker productivity and throughput while reducing training time. PTL technology integrates with the Warehouse Management System (WMS) to automatically update inventory balances and order status once confirmed.

NEW QUESTION # 82

A substance or material that is capable of posing an unreasonable risk to health, safety, and property when transported in commerce is

- A. PHMSA
- B. HAZMAT
- C. HAZCOM
- D. dangerous goods

Answer: B

NEW QUESTION # 83

Hazardous material must be shipped in ____ containers with proper labeling.

- A. FMCSA-approved
- B. PHMSA-approved
- C. HAZCOM-approved
- D. USDOT-approved

Answer: D

Explanation:

CLT teaches that hazmat packaging/containers must comply with U.S. DOT hazardous materials regulations (administered by PHMSA). In practice, training materials commonly reference "USDOT-approved" packaging that meets performance standards (e.g., UN specification packaging), correct closure instructions, and required markings/labels. FMCSA governs motor carrier operations, HAZCOM is a communication standard, and PHMSA is the DOT agency-but the compliance umbrella is USDOT hazmat rules.

NEW QUESTION # 84

In a logistics operation, receiving includes

- A. filling customer orders
- B. disbursing materials to storage
- C. shipping materials to customers

- **D. verifying and documenting damage to materials**

Answer: D

Explanation:

"Receive products" in the CLT framework encompasses checking shipments against documentation, inspecting condition, and documenting any damages or discrepancies before acceptance and putaway. While materials may subsequently move to storage, the essential receiving responsibility is to identify and record damage immediately to support claims, prevent defective stock from entering inventory, and protect downstream fulfillment. Filling customer orders and shipping are separate CLT activity areas ("Process product orders" and "Prepare packages for shipment and ship products"). Accurate damage documentation at receiving is a key control point that feeds inventory accuracy and quality, enabling reliable order processing.

NEW QUESTION # 85

.....

Experts hired by CLT-4.0 exam questions not only conducted in-depth research on the prediction of test questions, but also made great breakthroughs in learning methods. With CLT-4.0 training materials, you can easily memorize all important points of knowledge without rigid endorsements. With CLT-4.0 exam torrent, you no longer need to spend money to hire a dedicated tutor to explain it to you, even if you are a rookie of the industry, you can understand everything in the materials without any obstacles. With CLT-4.0 Exam Questions, your teacher is no longer one person, but a large team of experts who can help you solve all the problems you have encountered in the learning process.
