PMI Agile Certified Practitioner (PMI-ACP)® Sample Questions (Q293-Q298):

NEW QUESTION # 293

During a retrospective the agile practitioner discovers that a team member's process improvement idea has worsened the outcome. What should the agile practitioner do?

- A. Privately speak with the team member to convey that their idea worsened the outcome
- B. Ask a manager to direct the team on fixing the process
- C. Encourage the team to continue executing the idea to see if it improves
- **D. Commend the team on trying the idea, then encourage discussion regarding alternatives.**

Answer: D

NEW QUESTION # 294

During the review session, the product owner discovers that the user interface has a response time of 10 seconds. The non-functional requirements state that it should respond in less than two seconds. The team complains that this requirement was not communicated to them.

What should have been done to avoid this?

- A. Non-functional requirements should have been added to the definition of done
- B. A team review of the scope of work should have been conducted
- C. A comprehensive user story with all non-functional requirements should have been created
- **D. Non-functional requirements should have been added to the acceptance criteria**

Answer: D

NEW QUESTION # 295

After performing three sprints, the product owner and sponsor request an accurate schedule indicating when all releases will be delivered. What should the agile practitioner do?

- A. Decompose the product backlog into user stories with tasks/acceptance criteria and estimate to commit to an accurate schedule.
- B. Calculate velocity based on completed sprints and triangulate the remaining work on the backlog to commit to an accurate schedule.
- C. Use analogous estimating techniques based on projects with a similar velocity.
- **D. Provide a delivery range based on the team's estimated velocity.**

Answer: D

NEW QUESTION # 296

What is one of the main benefits that Lean portfolio management provides to a business?

- A. Maximizing multitasking
- B. Quality and thoughtfulness
- C. Maximizing work-in-progress
- **D. Line of sight to business needs**

Answer: D

NEW QUESTION # 297

A product that recently went to market is receiving a great deal of attention from upper management who expresses interest by directly emailing and calling the developer team. The team expresses frustration during a standup.

What should the Scrum Master do?

- A. Ask the product owner to enter the requests into the product backlog as high priority.
- **B. Personally respond to upper management's phone calls and emails.**
- C. Direct the developer team to ignore the phone calls and emails.
- D. Ask the product owner how upper management's comments can be redirected.

Answer: B

NEW QUESTION # 298

.....
