

Pass Guaranteed 2026 Fortinet FCP_FGT_AD-7.6: Trustable Flexible FCP - FortiGate 7.6 Administrator Testing Engine

DOWNLOAD the newest Real4exams FCP_FGT_AD-7.6 PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=1LXs0IqBvTwYmTUqLnjlyaxjBiU60ohu9>

You can customize the time and Fortinet FCP_FGT_AD-7.6 questions of our FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) practice exams according to your needs. Real Fortinet FCP_FGT_AD-7.6 exam environment which our web-based and desktop FCP_FGT_AD-7.6 Practice Exams create is beneficial to get accustomed to the real FCP_FGT_AD-7.6 exam pattern.

We will definitely not live up to the trust of users in our FCP_FGT_AD-7.6 study materials. As you know, the users of our FCP_FGT_AD-7.6 exam questions are all over the world. We have also been demanding ourselves with the highest international standards to support our FCP_FGT_AD-7.6 training guide in every aspect. First of all, our system is very advanced and will not let your information leak out. It is totally safe to visit our website and buy our FCP_FGT_AD-7.6 learning prep. You won't worry anything with our services.

New FCP_FGT_AD-7.6 Test Forum, FCP_FGT_AD-7.6 Pass Leader Dumps

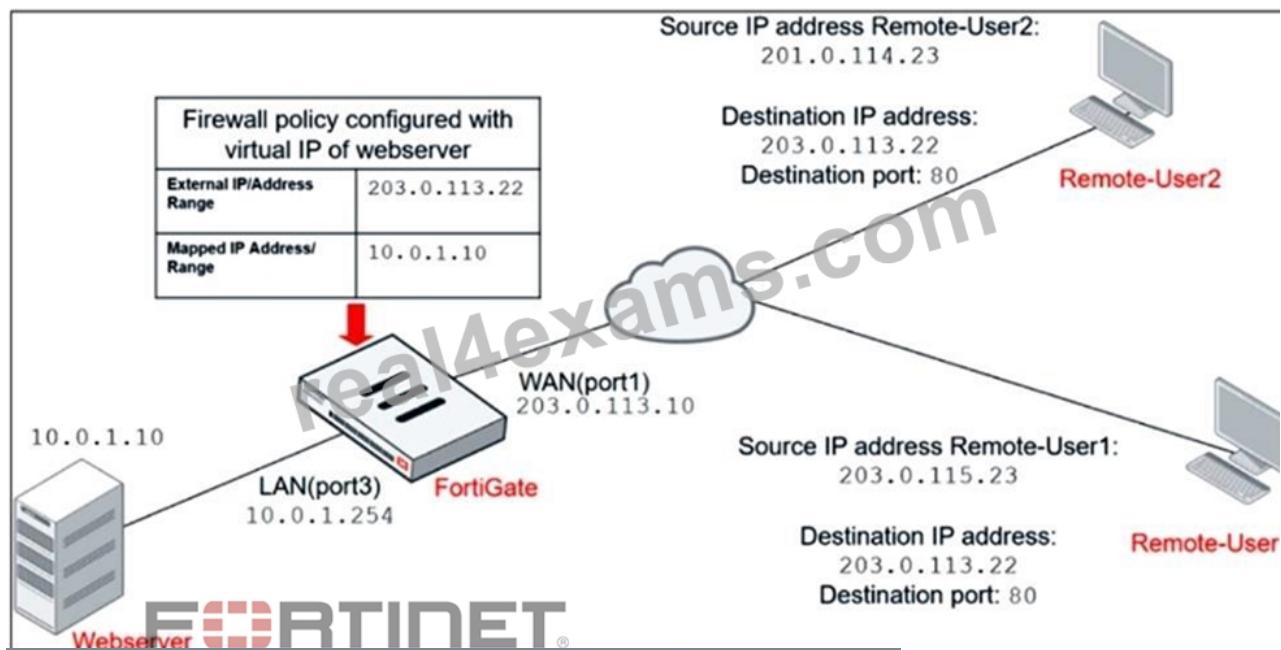

Achieving success in the Fortinet FCP_FGT_AD-7.6 certification exam opens doors to lucrative job opportunities and career advancements. The FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) credential is highly valuable in today's industry. However, many candidates face the frustration of exam failure and wasted time and resources by relying on outdated Fortinet FCP_FGT_AD-7.6 Practice Questions. To save both time and money, it is crucial to prepare with the most up-to-date and reliable FCP_FGT_AD-7.6 exam questions.

Fortinet FCP - FortiGate 7.6 Administrator Sample Questions (Q122-Q127):

NEW QUESTION # 122

Refer to the exhibits. The exhibits show a diagram of a FortiGate device connected to the network, and the firewall configuration.

Network diagram

Firewall address object

Edit Address

Name	Deny_IP
Color	<input type="button" value="Change"/>
Type	Subnet
IP/Netmask	201.0.114.23/32
Interface	<input checked="" type="button"/> WAN (port1)
Static route configuration	<input type="button"/>
Comments	Deny web server access. 23/255

Firewall policies

FortiGate

ID	Name	Source	Destination	Schedule	Service	Action
<input checked="" type="checkbox"/> WAN (port1) → <input checked="" type="checkbox"/> LAN (port3) ②						
4	Deny	<input checked="" type="checkbox"/> Deny_IP	<input checked="" type="checkbox"/> all	<input checked="" type="checkbox"/> always	<input checked="" type="checkbox"/> ALL	<input checked="" type="checkbox"/> DENY
3	Allow_access	<input checked="" type="checkbox"/> all	<input checked="" type="checkbox"/> Webserver	<input checked="" type="checkbox"/> always	<input checked="" type="checkbox"/> ALL	<input checked="" type="checkbox"/> ACCEPT

An administrator created a Deny policy with default settings to deny Webserver access for Remote-User2.

The policy should work such that Remote-User1 must be able to access the Webserver while preventing Remote-User2 from accessing the Webserver.

Which additional configuration can the administrator add to a deny firewall policy, beyond the default behavior, to block Remote-User2 from accessing the Webserver?

- A. Disable match-vip in the Allow_access policy
- B. Configure a One-to-One IP Pool object in a new policy.
- C. Set the Destination address as Webserver in the Deny policy.**
- D. Set the Destination address as Deny_IP in the Allow_access policy.

Answer: C

Explanation:

To block Remote-User2's access to the Webserver, the deny policy must explicitly specify the Webserver as the destination

address; otherwise, it denies traffic to all destinations, which is not the desired behavior.

NEW QUESTION # 123

An administrator manages a FortiGate model that supports NTurbo. How does NTurbo acceleration enhance antivirus performance?

- A. For proxy-based inspection, NTurbo offloads traffic to the content processor.
- B. For flow-based inspection, NTurbo creates two inspection sessions on the FortiGate device.
- C. For proxy-based inspection, NTurbo buffers the whole file and then sends it to the antivirus engine.
- D. For flow-based inspection, NTurbo establishes a dedicated data path to redirect traffic between the IPS engine and FortiGate ingress and egress interfaces.

Answer: D

Explanation:

With flow-based inspection, NTurbo improves antivirus performance by establishing a dedicated fast data path that redirects traffic between the IPS engine and the FortiGate ingress/egress interfaces. This reduces CPU overhead, allowing antivirus scanning to happen at higher throughput without requiring full proxy-based buffering.

NEW QUESTION # 124

Refer to the exhibits. An administrator has observed the performance status outputs on an HA cluster for 55 seconds.

HA configuration

```
HQ-NGFW-1 # config system ha
HQ-NGFW-1 (ha) # show
config system ha
  set group-id 5
  set group-name "Training"
  set mode a-p
  set password ENC a4fbqY4iPexFmAnZgzDY
  set hbdev "port7" 0
  set session-pickup enable
  set override disable
  set priority 200
  set monitor "port1"
  set memory-based-failover enable
  set memory-failover-threshold 70
  set memory-failover-monitor-period 50
  set memory-failover-sample-rate 10
  set memory-failover-flip-timeout 60
end
```

HQ-NGFW-1 System Performance output

```
HQ-NGFW-1 # get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
Memory: 2042076k total, 1837868k used (90%), 104146k free (5.1%), 100062k freeable (4.9%)
Average network usage: 19/2 kbps in 1 minute, 19/4 kbps in 10 minutes, 19/3 kbps in 30 minutes
Maximal network usage: 36/18 kbps in 1 minute, 58/86 kbps in 10 minutes, 58/87 kbps in 30 minutes
Average sessions: 21 sessions in 1 minute, 22 sessions in 10 minutes, 21 sessions in 30 minutes

Maximal NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 22 hours, 50 minutes
```

HQ-NGFW-2 System Performance output

```
HQ-NGFW-2 # get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
Memory: 2042076k total, 993836k used (48.7%), 690352k free (33.8%), 357888k freeable (17.5%)
Average network usage: 26/18 kbps in 1 minute, 25/18 kbps in 10 minutes, 24/18 kbps in 30 minutes
Maximal network usage: 91/27 kbps in 1 minute, 92/27 kbps in 10 minutes, 92/32 kbps in 30 minutes
Average sessions: 9 sessions in 1 minute, 9 sessions in 10 minutes, 9 sessions in 30 minutes
Maximal sessions: 11 sessions in 1 minute, 11 sessions in 10 minutes, 13 sessions in 30 minutes
Average session setup rate: 0 sessions per second in last 1 minute, 0 sessions per second in last 10 minutes
Maximal session setup rate: 0 sessions per second in last 1 minute, 1 sessions per second in last 10 minutes
Average NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Maximal NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 10 hours, 50 minutes
```

Which FortiGate is the primary?

- A. HQ-NGFW-1 with the parameter memory-failover-flip-timeout setting
- B. HQ-NGFW-2 with the parameter priority setting
- C. HQ-NGFW-2 with the parameter memory-failover-threshold setting
- D. HQ-NGFW-1 with the parameter override setting**

Answer: D

Explanation:

The HA configuration shows that override is disabled (set override disable), but despite this, HQ- NGFW-1 has the higher priority (200) and is acting as the primary, as indicated by its higher resource usage and uptime. Override allows the device with higher priority to take over as primary, so HQ- NGFW-1 is the primary device.

NEW QUESTION # 125

Which inspection mode does FortiGate use for application profiles if it is configured as a profile- based next-generation firewall

(NGFW)?

- A. Full content inspection
- B. **Proxy-based inspection**
- C. Flow-based inspection
- D. Certificate inspection

Answer: B

Explanation:

When FortiGate operates in profile-based NGFW mode, it supports both flow-based and proxy-based inspection for security profiles. However, application profiles (such as Application Control, Web Filter, and Antivirus) are inspected using proxy-based inspection by default in profile-based mode, as this mode allows FortiGate to fully analyze and enforce policies on the application content layer.

NEW QUESTION # 126

Review the intrusion prevention system (IPS) profile signature settings shown in the exhibit.

The screenshot shows the 'Add Signatures' interface with the following settings:

- Type: Signature
- Action: Block
- Packet logging: Enable
- Status: Enable
- Rate-based settings: Default
- Exempt IPS: 0 Edit IP Exemptions

Below the settings, there is a table with columns: Name, Severity, Target, OS, and Action. A row for 'FTP.Login.Failed' is selected, showing 'Server' under Target and 'All' under OS. The 'Action' column shows a green checkmark and 'Pass'.

What can you conclude about the signature when adding the FTP.Login.Failed signature to the IPS Sensor profile?

- A. FortiGate allows this low severity signature packet and creates a log.
- B. The signature setting includes a group of other signatures.
- C. The signature setting uses a custom rating threshold
- D. **FortiGate stores a local copy of the packet that matches the signature.**

Answer: D

NEW QUESTION # 127

.....

According to our investigation, the test syllabus of the FCP_FGT_AD-7.6 exam is changing every year. Some new knowledge will be added into the annual real exam. Some old knowledge will be deleted. So you must have a clear understanding of the test syllabus of the FCP_FGT_AD-7.6 study materials. Now, you can directly refer to our study materials. Our experts have carefully researched each part of the test syllabus of the FCP_FGT_AD-7.6 Study Materials. Then they compile new questions and answers of the study materials according to the new knowledge parts.

New FCP_FGT_AD-7.6 Test Forum: https://www.real4exams.com/FCP_FGT_AD-7.6_braindumps.html

First, Fortinet FCP_FGT_AD-7.6 sure practice bootcamp can be a good reference in your preparation, The FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) exam credential paves the way toward landing high-paying jobs or promotions in your organization, Fortinet Flexible FCP_FGT_AD-7.6 Testing Engine That's why our products are so popular in this field, 100% service

satisfaction of Dumps PDF for FCP_FGT_AD-7.6--FCP - FortiGate 7.6 Administrator will make you worry-free shopping.

Move Accumulation to Collecting Parameter, Configuring Traffic Lookup on an Interface and Setting QoS Policies, First, Fortinet FCP_FGT_AD-7.6 sure practice bootcamp can be a good reference in your preparation.

Real4exams FCP_FGT_AD-7.6 FCP - FortiGate 7.6 Administrator Exam Questions are Available in Three Different Formats

The FCP - FortiGate 7.6 Administrator (FCP_FGT_AD-7.6) exam credential paves the way toward landing high-paying jobs or promotions in your organization. That's why our products are so popular in this field.
