## 最實用的AB-730認證考試的題目與答案

對於AB-730認證是評估職員在公司所具備的能力和知識，而如何獲得Microsoft AB-730認證是大多數考生面臨的挑戰性的問題。現在的考試如AB-730在經常的跟新，準備通過這個考試是一項艱巨的任務，Microsoft AB-730考古題是一個能使您一次性通過該考試的題庫資料。一旦您通過考試，您將獲得不錯的工作機會，所以，選擇AB-730題庫就是選擇成功，我們將保證您百分之百通過考試。

## 最新的 Microsoft Certified AB-730 免費考試真題 (Q69-Q74):

問題 #69

You are a business user who uses Microsoft 365 apps and services, including Microsoft Teams. You have a work account. You want to use Microsoft 365 Copilot to help with meetings. For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
Copilot can answer questions about Teams meetings that you are <b>NOT</b> invited to.	<input type="radio"/>	<input type="radio"/>
Copilot can provide summaries and answer questions about chat messages, channel posts, and Teams meetings.	<input type="radio"/>	<input type="radio"/>
Copilot can provide a summary of all the upcoming Teams meeting details you are invited to next week.	<input type="radio"/>	<input type="radio"/>

答案:

解題說明:

Answer Area

Statements	Yes	No
Copilot can answer questions about Teams meetings that you are <b>NOT</b> invited to.	<input type="radio"/>	<input checked="" type="radio"/>
Copilot can provide summaries and answer questions about chat messages, channel posts, and Teams meetings.	<input checked="" type="radio"/>	<input type="radio"/>
Copilot can provide a summary of all the upcoming Teams meeting details you are invited to next week.	<input checked="" type="radio"/>	<input type="radio"/>

Explanation:

Answer Area

Statements	Yes	No
Copilot can answer questions about Teams meetings that you are <b>NOT</b> invited to.	<input type="radio"/>	<input checked="" type="radio"/>
Copilot can provide summaries and answer questions about chat messages, channel posts, and Teams meetings.	<input checked="" type="radio"/>	<input type="radio"/>
Copilot can provide a summary of all the upcoming Teams meeting details you are invited to next week.	<input checked="" type="radio"/>	<input type="radio"/>

Microsoft 365 Copilot respects Microsoft 365 permissions ("permission trimming"). This means it can only access and summarize content you are authorized to view. Therefore, Copilot cannot answer questions about Teams meetings you are not invited to (and otherwise don't have access to), making statement 1 No.

Copilot can summarize and answer questions about Teams artifacts you do have access to—such as chat messages, channel posts, and meeting content (for example, transcripts, notes, recordings, and meeting recap details when available). That makes statement 2 Yes.

Copilot can also help you prepare for your schedule by summarizing upcoming meetings you're invited to, using calendar and meeting context (subject, time, participants, related emails/files, and available agenda /notes). This supports planning and prioritization for the week ahead, so statement 3 is Yes.

問題 #70

Select the answer that correctly completes the sentence.

Answer Area

\_\_\_\_\_ enables organizations to apply governance policies to conversations generated by using Microsoft 365 Copilot.

- Microsoft Defender for Cloud
- Microsoft Entra ID
- Microsoft Intune
- Microsoft Purview

答案:

解題說明:

Answer Area

enables organizations to apply governance policies to conversations generated by using Microsoft 365 Copilot.

### 問題 #71

You are creating a custom analytics agent in the Microsoft 365 Copilot app. The agent will use Microsoft Excel files that contain sales data as knowledge.

You need to ensure that the agent can create visualizations, perform mathematical operations, create aggregations, and analyze the data in the files.

What should you add to the agent?

- A. code interpreter
- B. a template
- C. a suggested prompt
- D. image generator

答案: C

解題說明:

To get the most out of a custom analytics agent in Microsoft 365 Copilot for Excel sales data, use a structured prompt that defines the goal, context, and specific output format. For the best results, ensure your data is formatted as an Excel Table.

Suggested Comprehensive Prompt

"Analyze the sales data in this file to identify the top 5 performing products by total revenue and regional growth. Perform a mathematical operation to calculate a new column for 'Profit Margin' (Revenue minus Cost), then aggregate the total sales and average profit margin by 'Sales Representative' and 'Region.' Finally, create a professional dashboard on a new sheet featuring a bar chart for product revenue and a line graph showing monthly sales trends over the last 12 months." Breakdown of Prompt Capabilities Visualizations: Ask for specific chart types (e.g., "Visualize this as a bar chart" or "Create a line graph") to help spot trends.

Mathematical Operations: Request new columns based on existing data (e.g., "Create a column for the difference between 'Projected' and 'Actual' sales").

Aggregations: Use natural language to summarize data (e.g., "Calculate the total sales by region") or generate PivotTables for deeper grouping.

### 問題 #72

You are creating a custom agent in the Microsoft 365 Copilot app for the marketing team at your company. The agent will be used to produce marketing collateral, including copy, logos, and artwork.

What should you add to the agent? More than one answer choice may achieve the goal. Select the BEST answer.

- A. code interpreter
- B. a template
- C. image generator
- D. a suggested prompt

答案: C

解題說明:

When building a custom agent in Microsoft 365 Copilot for marketing use cases, the required capabilities must align with the intended outputs. Marketing collateral includes written copy as well as visual assets such as logos and artwork. According to Microsoft AI Business Professional documentation, generative AI solutions that produce visual creative assets require integrated image generation capabilities powered by multimodal AI models.

Option C is correct because an image generator enables the agent to create visual marketing materials such as logos, artwork, and design elements. While templates and suggested prompts can improve usability and consistency, they do not provide the underlying capability to generate images. A code interpreter is designed for data analysis, calculations, or technical scripting tasks and is not relevant to creative marketing asset production.

Therefore, to fulfill the requirement of producing both textual and visual marketing collateral, the most essential addition to the custom agent is an image generator.

### 問題 #73

You are comparing the difference between Microsoft 365 Copilot and Microsoft 365 Copilot Chat.

What is available in both versions?

- A. Copilot Pages
- B. the Researcher agent
- C. Copilot Notebooks

答案：A

### 問題 #74
