These attributes are ratings that indicate an agent's proficiency or preference for handling certain types of interactions or customers. For example:

Language skills indicate an agent's ability to speak or write in different languages.

Additional attribute ratings indicate an agent's knowledge or experience with specific products, services, topics, etc.

ACD skills indicate an agent's capability or willingness to handle different media types or queues.

Genesys Cloud CX ACD uses these attributes to match each interaction with an agent who has the highest ratings for those attributes. Reference: https://help.mypurecloud.com/articles/about-acd-evaluation-methods/
