Pass Guaranteed Quiz 2026 APMG-International ISO-IEC-27001-Foundation: First-grade Valid Test ISO/IEC 27001 (2022) Foundation Exam Bootcamp

2026 Latest Real4dumps ISO-IEC-27001-Foundation PDF Dumps and ISO-IEC-27001-Foundation Exam Engine Free Share: https://drive.google.com/open?id=1YLCXv2TMdBGivuAXfFvYk1vEMkCJNhtw

Real4dumps offers accurate and reliable study materials to help you prepare for the APMG-International ISO-IEC-27001-Foundation Exam. They have prepared the best APMG-International ISO-IEC-27001-Foundation Exam Questions that provide authentic and reliable material. With Real4dumps, many candidates have succeeded in passing the APMG-International ISO-IEC-27001-Foundation Exam.

APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Security: Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.

Topic 2	• Framework Design: Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.
Topic 3	• Risk Management: Risk management is the systematic process of identifying, evaluating, and implementing strategies to reduce or control the impact of potential uncertainties on organizational goals.
Topic 4	• Continuous Improvement Process (CI, CIP): A continuous or continual improvement process (CIP or CI) involves ongoing, systematic efforts to enhance products, services, or operational processes to achieve higher efficiency and effectiveness over time.

ISO-IEC-27001-Foundation Brain Dump Free | Review ISO-IEC-27001-Foundation Guide

Provided you get the certificate this time with our ISO-IEC-27001-Foundation practice materials, you may have striving and excellent friends and promising colleagues just like you. It is also as obvious magnifications of your major ability of profession, so ISO-IEC-27001-Foundation practice materials may bring underlying influences with positive effects. The promotion or acceptance will be easy. So it is quite rewarding investment.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q26-Q31):

NEW QUESTION # 26
Which International Standard can be used to implement an integrated management system with ISO/IEC 27001?

- A. ISO/IEC 27003
- B. ISO 9001
- C. ISO/IEC 27013
- D. None of the above

Answer: C

Explanation:
ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

NEW QUESTION # 27
Which item is required to be defined when planning the organization's risk assessment process?

- A. The parts of the ISMS scope which are excluded from the risk assessment
- B. How the effectiveness of the method will be measured
- C. There are NO specific information requirements
- D. The criteria for acceptable levels of risk

Answer: D

Explanation:
Clause 6.1.2 (Information security risk assessment) requires organizations to "define and apply an information security risk assessment process that... establishes and maintains information security risk criteria, including criteria for accepting risk." This means that acceptable levels of risk (risk acceptance criteria) must be explicitly defined. These criteria ensure consistent decision-making when evaluating whether identified risks need further treatment or can be tolerated.

Option A is incorrect because exclusions relate to the ISMS scope (Clause 4.3), not risk assessment planning.
Option B is not a requirement; effectiveness of risk assessment methods is not required to be measured, though methods must be applied consistently. Option D is false-the standard clearly specifies required elements for risk assessment.
Thus, the correct answer isC: The criteria for acceptable levels of risk.

NEW QUESTION # 28

Which information is required to be included in the Statement of Applicability?

- A. The criteria against which risk will be evaluated
- B. The scope and boundaries of the ISMS
- C. The risk assessment approach of the organization
- D. The justification for including each information security control

Answer: D

Explanation:
Clause 6.1.3 (d) requires that the organization"produce a Statement of Applicability that contains the necessary controls (see Annex A), and justification for inclusions, whether they are implemented or not, and the justification for exclusions." This is the defining requirement of the SoA: it documents which Annex A controls are relevant, which are implemented, and the justification for inclusion/exclusion. While the ISMS scope (A) is documented in Clause 4.3, and risk evaluation criteria (C) are defined in Clause 6.1.2, these do not belong in the SoA. The SoA does not describe the full risk assessment approach (B); that is part of the risk assessment methodology.
Therefore, the mandatory requirement for the SoA isjustification for including (or excluding) each information security control.

NEW QUESTION # 29

Identify the missing words in the following sentence.
The organization shall establish, implement, maintain and [?] an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document.

- A. continually improve
- B. report on
- C. enforce standards for
- D. communicate the importance of

Answer: A

Explanation:
Clause 4.4 of ISO/IEC 27001:2022 states:
"The organization shall establish, implement, maintain and continually improve an information security management system, including the processes needed and their interactions, in accordance with the requirements of this document." This requirement highlights that an ISMS is not static; it must evolve continuously to adapt to new risks, technologies, and business changes. Options A, C, and D are not mentioned in the clause. The continual improvement cycle is central to ISO standards, aligning with thePlan-Do-Check-Act (PDCA)model.
Thus, the missing words are"continually improve."

NEW QUESTION # 30

Which statement about the conduct of audits is true?

- A. One of the focus areas for a surveillance audit is the output from internal audits and management reviews
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- C. During Stage 1 of a certification audit, evidence is collected by observing activities
- D. Third party audits are conducted by a customer of the organization

Answer: A

Explanation:
Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and

effectiveness. ISO certification schemes (per ISO/IEC

17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is theresults of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid forthree yearswith annual surveillance. Option D is incorrect - Stage 1 is primarily adocumentation and readiness review, not evidence observation.

Therefore, the verified correct answer isC.

NEW QUESTION # 31

......

While the APMG-International ISO-IEC-27001-Foundation practice questions pdf can help you learn all the relevant answers for the ISO/IEC 27001 (2022) Foundation Exam, Real4dumps also provides an online Sitecore Practice Test engine to enhance your confidence and skills. This practice test engine is an effective tool for both learning and practicing APMG-International ISO-IEC-27001-Foundation Exam.
