### DP-600 PDF Dumps - Key To Success [Updated-2026]

Certification DP-600 exam on the first attempt. The demand of the Implementing Analytics Solutions Using Microsoft Fabric exam is growing at a rapid pace day by day and almost everyone is planning to pass it so that they can improve themselves for better futures in the PassCollection sector. DP-600 has tried its best to make this learning material the most user-friendly so the applicants don't face excessive issues.

### Microsoft Implementing Analytics Solutions Using Microsoft Fabric Sample Questions (Q61-Q66):

NEW QUESTION # 61

### Hotspot Question

You have a Fabric tenant.

You plan to create a Fabric notebook that will use Spark DataFrames to generate Microsoft Power BI visuals.

You run the following code.

```
from powerbiclient import QuickVisualize, get_dataset_config, Report
PBI_visualize = QuickVisualize(get_dataset_config(df))
PBI_visualize
```

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

#### Answer Area

Statements	Yes	No
The code embeds an existing Power BI report.	<input type="radio"/>	<input type="radio"/>
The code creates a Power BI report.	<input type="radio"/>	<input type="radio"/>
The code displays a summary of the DataFrame.	<input type="radio"/>	<input type="radio"/>

#### Answer:

Explanation:

Statements	Yes	No
The code embeds an existing Power BI report.	<input type="radio"/>	<input checked="" type="radio"/>
The code creates a Power BI report.	<input checked="" type="radio"/>	<input type="radio"/>
The code displays a summary of the DataFrame.	<input type="radio"/>	<input checked="" type="radio"/>

### NEW QUESTION # 62

You have a Fabric tenant that contains a warehouse.

Several times a day, the performance of all warehouse queries degrades. You suspect that Fabric is throttling the compute used by the warehouse.

What should you use to identify whether throttling is occurring?

- A. the Monitoring hub
- B. the Microsoft Fabric Capacity Metrics app
- C. dynamic management views (DMVs)
- D. the Capacity settings

#### Answer: B

### NEW QUESTION # 63

Drag and Drop Question

You have a Fabric tenant that contains a data warehouse named DW1. DW1 contains a table named DimCustomer. DimCustomer contains the fields shown in the following table.

ID	CustomerKey	CustomerAltKey	Title	FirstName	LastName	AddressLine1	City
1	29546	christopher1@contoso.com	Mr.	Christopher	Beck	93-2501, Blackfriars Road	London
2	29587	john12@contoso.com	Mr.	John	Brooks	99-3 Forest Works	London
3	29612	richard2@contoso.com	Mr.	Richard	Byham	Knaves Beech Ind	High Wycombe

You need to identify duplicate email addresses in DimCustomer. The solution must return a maximum of 1,000 records.

Which four T-SQL statements should you run in sequence? To answer, move the appropriate statements from the list of statements

to the answer area and arrange them in the correct order.

**Statements**

- SELECT TOP(1000) CustomerAltKey, COUNT(\*)
- GROUP BY CustomerAltKey
- FROM DimCustomer
- SELECT CustomerAltKey, COUNT(\*)
- LIMIT 1000
- HAVING COUNT(\*) > 1
- WHERE COUNT(\*) > 1

**Answer Area**

- 1
- 2
- 3
- 4

**Answer:**

**Explanation:**

The screenshot shows a SQL query builder interface with two columns: 'Statements' and 'Answer Area'. The 'Statements' column contains the following SQL clauses: 'SELECT CustomerAltKey, COUNT(\*)', 'LIMIT 1000', and 'WHERE COUNT(\*) > 1'. The 'Answer Area' column contains the following clauses in order: 1. 'SELECT TOP(1000) CustomerAltKey, COUNT(\*)', 2. 'FROM DimCustomer', 3. 'GROUP BY CustomerAltKey', and 4. 'HAVING COUNT(\*) > 1'. A watermark 'passcollection.com' and the Microsoft logo are visible over the interface.

**NEW QUESTION # 64**

You have a semantic model named Model 1. Model 1 contains five tables that all use Import mode. Model 1 contains a dynamic row-level security (RLS) role named HR. The HR role filters employee data so that HR managers only see the data of the department to which they are assigned.

You publish Model 1 to a Fabric tenant and configure RLS role membership. You share the model and related reports to users. An HR manager reports that the data they see in a report is incomplete.

What should you do to validate the data seen by the HR Manager?

- A. Select Test as role to view the report as the HR manager,
- B. Select Test as role to view the data as the HR role.
- C. Ask the HR manager to open the report in Microsoft Power BI Desktop.
- D. Filter the data in the report to match the intended logic of the filter for the HR department.

**Answer: A**

Explanation:

To validate the data seen by the HR manager, you should use the 'Test as role' feature in Power BI service.

This allows you to see the data exactly as it would appear for the HR role, considering the dynamic RLS setup. Here is how you would proceed:

- \* Navigate to the Power BI service and locate Modell.
- \* Access the dataset settings for Modell.
- \* Find the security/RLS settings where you configured the roles.
- \* Use the 'Test as role' feature to simulate the report viewing experience as the HR role.
- \* Review the data and the filters applied to ensure that the RLS is functioning correctly.
- \* If discrepancies are found, adjust the RLS expressions or the role membership as needed.

References: The 'Test as role' feature and its use for validating RLS in Power BI is covered in the Power BI documentation available on Microsoft's official documentation.

### NEW QUESTION # 65

You need to ensure the data loading activities in the AnalyticsPOC workspace are executed in the appropriate sequence. The solution must meet the technical requirements.

What should you do?

- A. Create and schedule a Spark job definition.
- B. Create and schedule a Spark notebook.
- C. Create a dataflow that has multiple steps and schedule the dataflow.
- **D. Create a pipeline that has dependencies between activities and schedule the pipeline.**

**Answer: D**

Explanation:

To meet the technical requirement that data loading activities must ensure the raw and cleansed data is updated completely before populating the dimensional model, you would need a mechanism that allows for ordered execution. A pipeline in Microsoft Fabric with dependencies set between activities can ensure that activities are executed in a specific sequence. Once set up, the pipeline can be scheduled to run at the required intervals (hourly or daily depending on the data source).

### NEW QUESTION # 66

.....

Among all marketers who actively compete to win customers, we sincerely offer help for exam candidates like you with our DP-600 exam questions. To cater to the needs of exam candidates, our experts have been assiduously worked for their quality day and night. DP-600 Training Materials can help you achieve personal goals about the DP-600 exam successfully. So of course we received sincere feed-backs from exam candidates which are maximum benefits for us.
