As you can sense by now, and we really hope that you can be the next beneficiary of our C-BCBTM-2509 Training Materials.

### SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q20-Q25):

#### NEW QUESTION # 20

What are the main value drivers of SAP Business Transformation Management solutions?

(Note: There are 2 correct answers to this question.)

- A. They help generate insights into both processes and applications and their dependencies.
- B. They provide advanced capabilities for blockchain development and cryptocurrency management.
- C. They enable customers to discover, analyze, and scope optimization potential during daily operations.
- D. They manage physical inventory in warehouses and real-time transaction processing for retail environments.

**Answer: A,C**

Explanation:

SAP Business Transformation Management (BTM) solutions deliver value by providing visibility, analytics, and optimization across business processes and IT systems. They integrate SAP Signavio, SAP LeanIX, and WalkMe to enable organizations to understand dependencies, identify inefficiencies, and accelerate transformation initiatives.

"SAP BTM solutions help enterprises gain comprehensive insights into processes, applications, and dependencies, enabling them to discover, analyze, and optimize their operations continuously." Reference:

Generating Insights into Processes and Applications (Answer C):

SAP Signavio and LeanIX together provide a data-driven foundation that helps identify how processes and applications interact, uncovering optimization opportunities and transformation risks.

"By linking process intelligence with enterprise architecture management, SAP BTM solutions generate deep insights into process flows, system dependencies, and business value realization." Discovering and Scoping Optimization Potential (Answer D):

The BTM suite empowers users to continuously monitor performance and identify improvement opportunities during daily operations through analytics and observability.

"SAP BTM enables organizations to discover, analyze, and scope optimization potential within their daily business operations using integrated analytical capabilities." Incorrect Options:

A: Inventory and retail transaction management are handled by SAP S/4HANA and not part of BTM.

B: Blockchain and cryptocurrency management are not components of the BTM solution portfolio.

Therefore, the verified and correct answers as per SAP BTM documentation are:

- C: They help generate insights into both processes and applications and their dependencies.
- D: They enable customers to discover, analyze, and scope optimization potential during daily operations.

### NEW QUESTION # 21

What are the main use cases for SAP Signavio and SAP LeanIX solutions?

- A. Improving financial management and material management.
- **B. Enabling business transformation and continuous excellence.**
- C. Expanding product offerings and portfolio management.
- D. Enhancing customer service and managing digital supply chain.

**Answer: B**

Explanation:

The SAP Signavio and SAP LeanIX solutions are foundational components of SAP Business Transformation Management (BTM). Their main purpose is to enable enterprise-wide transformation, continuous optimization, and operational excellence by connecting business processes and IT architecture.

"The combined use of SAP Signavio and SAP LeanIX empowers organizations to enable business transformation through a comprehensive view of processes, applications, and technology, driving continuous excellence and improvement." Reference: SAP Signavio provides business process intelligence, while SAP LeanIX delivers enterprise architecture transparency. Together, they support organizations in transforming operations, modernizing IT landscapes, and achieving long-term performance improvement.

"SAP Signavio and SAP LeanIX support use cases centered around continuous business transformation, providing insights that align business goals with IT strategies." Incorrect Options:

B: Product portfolio management is managed under SAP PLM, not BTM solutions.

C: Supply chain management is covered by SAP Digital Supply Chain applications, not LeanIX or Signavio.

D: Financial and material management belong to SAP S/4HANA core ERP modules.

Verified Correct answer: A: Enabling business transformation and continuous excellence.

### NEW QUESTION # 22

Which use cases are central to SAP LeanIX solutions?

(Note: There are 2 correct answers to this question.)

- **A. Technology Risk and Compliance**
- B. Blockchain Analytics
- **C. Application Portfolio Management**
- D. Spend Management

**Answer: A,C**

Explanation:

SAP LeanIX is primarily focused on providing Enterprise Architecture Management (EAM) and Technology Risk and Compliance (TRC) capabilities, both essential for enabling data-driven transparency and governance in transformation projects.

"Core SAP LeanIX use cases include Application Portfolio Management (APM) and Technology Risk & Compliance (TRC), which help organizations streamline IT landscapes and mitigate risks." Reference:

Application Portfolio Management (Answer B):

SAP LeanIX enables organizations to document, analyze, and optimize their application landscape to ensure efficiency and alignment with business goals.

"The Application Portfolio Management use case helps enterprises assess application value, cost, and redundancy, improving decision-making and IT governance." Technology Risk and Compliance (Answer C):

This feature supports continuous evaluation of IT technology standards and compliance requirements, helping to manage risk exposure and regulatory alignment during transformation.

"Technology Risk and Compliance offers visibility into technology obsolescence, compliance, and cybersecurity risks to support resilient IT operations." Incorrect Options:

A: Spend management belongs to SAP Ariba and SAP Concur, not LeanIX.

D: Blockchain analytics is not a LeanIX function; LeanIX focuses on architecture and compliance, not blockchain technologies.

Verified Correct Answers:

B: Application Portfolio Management

C: Technology Risk and Compliance

### NEW QUESTION # 23

What are typical challenges SAP customers face in an ERP transformation?

(Note: There are 3 correct answers to this question.)

- A. Significant reduction in product quality
- B. Not knowing how and where to start their transformation journey
- C. Lack of transparency into processes and system landscapes
- D. Inability to generate financial reports due to a lack of data analytics capabilities
- E. Alignment between business and IT

**Answer: B,C,E**

Explanation:

According to SAP's Business Transformation Management (BTMP) and SAP Signavio Transformation Framework, the most common ERP transformation challenges are strategic alignment, starting complexity, and lack of visibility across business and IT landscapes.

"Organizations often face difficulties with aligning business and IT, defining where to start transformation efforts, and gaining transparency across processes and systems." Reference:

A - Alignment between Business and IT:

Misalignment leads to inconsistent objectives between operations and technology strategy.

"Achieving alignment between IT capabilities and business goals remains one of the biggest barriers to transformation." B - Not Knowing Where to Start:

Many organizations lack clarity on prioritization and readiness assessment.

"Determining the starting point and sequencing of transformation steps is a recurring challenge in ERP modernization projects." C - Lack of Transparency:

Without visibility into existing processes, companies struggle to identify inefficiencies or dependencies.

"Insufficient transparency across processes and system landscapes hinders effective transformation planning and execution."

Incorrect Options:

D: Financial reporting challenges are typically ERP operational issues, not transformation barriers.

E: Product quality reduction is not a standard ERP transformation issue.

Verified Correct Answers: A, B, and C.

### NEW QUESTION # 24

How does SAP differentiate itself from competitors in the area of business transformation?

- A. By avoiding collaboration with ecosystem partners and other stakeholders.
- B. By limiting transparency and accessibility of insights and recommendations.
- C. By focusing on traditional methodologies without leveraging data-driven insights.
- D. By providing a comprehensive suite of capabilities across all project phases with high integration.

**Answer: D**

Explanation:

SAP distinguishes itself in the transformation landscape through its comprehensive and fully integrated suite of Business Transformation Management (BTM) solutions. This suite connects business process intelligence (SAP Signavio), enterprise architecture management (SAP LeanIX), and digital adoption (WalkMe) into one end-to-end transformation framework.

"SAP differentiates itself by offering a comprehensive suite of integrated capabilities that cover every phase of business transformation - from discovery and design to implementation and adoption." Reference:

Unlike competitors that provide isolated tools, SAP enables continuous, data-driven transformation through unified visibility across business, IT, and adoption layers.

"SAP's integrated transformation platform supports data-driven insights, ecosystem collaboration, and transparency throughout the transformation journey." Incorrect Options:

A: SAP promotes transparency, not limits it.

B: SAP actively collaborates with partners (e.g., WalkMe, LeanIX, Signavio).

D: SAP uses modern, insight-driven approaches - not traditional static ones.

Verified Correct answer: C: By providing a comprehensive suite of capabilities across all project
