

Complete SPLK-2002 Exam Dumps & SPLK-2002 Valid Test Tips

SPLK-2002 Exam Dumps - Experts Choice for Exam

SPLK-2002 PDF Dumps to Clear Your Idea

Also, you will actually want to get SPLK-2002 pdf questions answer record that will assist you with clearing your idea. It is difficult to begin concentrating again when you are functioning as an expert. To clear your lost ideas, you should zero in on the SPLK-2002 test questions that will help you in the correct manner. Our Splunk Venture Affirmed Designer specialists have made point by point SPLK-2002 pdf questions answer sheet that will assist you with clearing Splunk Endeavour Ensured Administrator [SPLK-2002 Exam Dumps](#) test on your most memorable endeavour. Ensure that you are utilizing these SPLK-2002 pdf dumps documents and zeroing in on the planning level so you can further develop things for yourself. It is the correct approach so you can clear your Splunk Venture Ensured Administrator test on the main endeavour.

SPLK-2002 Test Dumps With 90 Days Free Customary Updates

On the off chance that you are utilizing our SPLK-2002 braindumps, you will actually want to get let loose updates to 90 days from the date of procurement. Ensure that you are utilizing around date SPLK 2002 practice questions so you can undoubtedly clear Splunk Venture Affirmed Administrator SPLK-2002 test on the main endeavour. It is the correct approach so you can deal with issues without any problem. To turn into a Splunk Endeavour Ensured Administrator guaranteed, then you ought to consider utilizing our SPLK-2002 test questions so you can breeze through SPLK-2002 assessment on the principal endeavour. It is consistently fundamental for you to go through these subtleties so you can oversee things in the ideal manner.

Splunk SPLK-2002 PDF Questions Documents

We are additionally giving Splunk SPLK-2002 PDF records that will assist you with planning for the test. In the event that you are a bustling proficient and you are now working in an association, then, at that point, it will become hard for you to clear Splunk Venture Confirmed Designer test. In any case, in the event that you are utilizing our PDF documents, you will actually want to set aside opportunity to get ready for the Splunk Endeavour Guaranteed Administrator SPLK-2002 test. With the assistance of SPLK 2002 PDF records, you can plan for the test anyplace. Additionally, you can ~~view these documents on all screen tablets and smartphones in the event that you are online~~

100% Pass 2026 Splunk Updated SPLK-2002: Complete Splunk Enterprise Certified Architect Exam Dumps

SPLK-2002 provides actual SPLK-2002 Exam Questions to help candidates pass on the first try, ultimately saving them time and resources. These questions are of the highest quality, ensuring success for those who use them. To achieve success, it's crucial to have access to quality Splunk Enterprise Certified Architect (SPLK-2002) exam dumps and to prepare for the likely questions that will appear on the exam. SPLK-2002 helps candidates overcome any difficulties they may face in exam preparation, with a 24/7 support team ready to assist with any issues that may arise.

The Splunk SPLK-2002 exam tests the candidates' knowledge of Splunk Enterprise architecture, deployment planning, installation, configuration, and optimization. It requires candidates to have a deep understanding of Splunk search processing language (SPL), data onboarding, and data management. SPLK-2002 Exam is designed to assess the candidates' ability to implement best practices

for security, performance, and scalability of Splunk Enterprise environments.

Splunk Enterprise Certified Architect Sample Questions (Q96-Q101):

NEW QUESTION # 96

To optimize the distribution of primary buckets; when does primary rebalancing automatically occur? (Select all that apply.)

- A. Rolling restart completes.
- B. A peer node joins or rejoins the cluster.
- C. Captain joins or rejoins cluster.
- D. Master node rejoins the cluster.

Answer: A,B,D

Explanation:

Explanation

Primary rebalancing automatically occurs when a rolling restart completes, a master node rejoins the cluster, or a peer node joins or rejoins the cluster. These events can cause the distribution of primary buckets to become unbalanced, so the master node will initiate a rebalancing process to ensure that each peer node has roughly the same number of primary buckets. Primary rebalancing does not occur when a captain joins or rejoins the cluster, because the captain is a search head cluster component, not an indexer cluster component. The captain is responsible for search head clustering, not indexer clustering

NEW QUESTION # 97

An index has large text log entries with many unique terms in the raw data. Other than the raw data, which index components will take the most space?

- A. Bloom filters (bloomfilter files).
- B. Index sourcetype metadata (SourceTypes. data files).
- C. Index source metadata (sources.data files).
- D. Index files (*. tsidx files).

Answer: D

Explanation:

Index files (. tsidx files) are the main components of an index that store the raw data and the inverted index of terms. They take the most space in an index, especially if the raw data has many unique terms that increase the size of the inverted index. Bloom filters, source metadata, and sourcetype metadata are much smaller in comparison and do not depend on the number of unique terms in the raw data.

NEW QUESTION # 98

A Splunk instance has the following settings in `SPLUNK_HOME/etc/system/local/server.conf`

[clustering]

mode = master

replication_factor = 2

pass4SymmKey = password123

Which of the following statements describe this Splunk instance? (Select all that apply.)

- A. This Splunk instance needs to be restarted.
- B. This cluster's search factor is 2.
- C. This is a multi-site cluster.
- D. This instance is missing the master_uri attribute.

Answer: A,D

Explanation:

The Splunk instance with the given settings in `SPLUNK_HOME/etc/system/local/server.conf` is missing the master_uri attribute and

needs to be restarted. The `master_uri` attribute is required for the master node to communicate with the peer nodes and the search head cluster. The `master_uri` attribute specifies the host name and port number of the master node. Without this attribute, the master node cannot function properly. The Splunk instance also needs to be restarted for the changes in the `server.conf` file to take effect. The `replication_factor` setting determines how many copies of each bucket are maintained across the peer nodes. The search factor is a separate setting that determines how many searchable copies of each bucket are maintained across the peer nodes. The search factor is not specified in the given settings, so it defaults to the same value as the replication factor, which is 2. This is not a multi-site cluster, because the `site` attribute is not specified in the clustering stanza. A multi-site cluster is a cluster that spans multiple geographic locations, or sites, and has different replication and search factors for each site.

NEW QUESTION # 99

Which of the following is a good practice for a search head cluster deployer?

- A. The deployer must be used to distribute non-replicable configurations to search head cluster members.
- B. The deployer must distribute configurations to search head cluster members to be valid configurations.
- C. The deployer only distributes configurations to search head cluster members when they "phone home".
- D. The deployer only distributes configurations to search head cluster members with splunk apply shcluster-bundle.

Answer: C

NEW QUESTION # 100

Configurations from the deployer are merged into which location on the search head cluster member?

- A. `SPLUNK_HOME/etc/system/local`
- B. `SPLUNK_HOME/etc/apps/APP_HOME/local`
- C. `SPLUNK_HOME/etc/apps/APP_HOME/default`
- D. `SPLUNK_HOME/etc/apps/search/default`

Answer: B

Explanation:

Explanation

Configurations from the deployer are merged into the `SPLUNK_HOME/etc/apps/APP_HOME/local` directory on the search head cluster member. The deployer distributes apps and other configurations to the search head cluster members in the form of a configuration bundle. The configuration bundle contains the contents of the `SPLUNK_HOME/etc/shcluster/apps` directory on the deployer. When a search head cluster member receives the configuration bundle, it merges the contents of the bundle into its own `SPLUNK_HOME/etc/apps` directory. The configurations in the local directory take precedence over the configurations in the default directory. The `SPLUNK_HOME/etc/system/local` directory is used for system-level configurations, not app-level configurations. The `SPLUNK_HOME/etc/apps/search/default` directory is used for the default configurations of the search app, not the configurations from the deployer.

NEW QUESTION # 101

.....

We are so proud that we own the high pass rate of our SPLK-2002 exam braindumps to 99%. This data depend on the real number of our worthy customers who bought our SPLK-2002 exam guide and took part in the real exam. Obviously, their performance is wonderful with the help of our outstanding SPLK-2002 Exam Materials. We have the definite superiority over the other SPLK-2002 exam dumps in the market. If you choose to study with our SPLK-2002 exam guide, your success is 100 guaranteed.
