

AIGP인증문제 & AIGP시험대비최신버전자료

2026 DumpTOP 최신 AIGP PDF 버전 시험 문제집과 AIGP 시험 문제 및 답변 무료 공유: https://drive.google.com/open?id=1PEshb5hGiVnYOpYGk1aGoKvECKe70wA_

IAPP AIGP 시험을 보시는 분이 점점 많아지고 있는데 하루빨리 다른 분들보다 IAPP AIGP 시험을 패스하여 자격증을 취득하는 편이 좋지 않을까요? 자격증이 보편화되면 자격증의 가치도 그만큼 떨어지니깐요. IAPP AIGP 덤프는 이미 많은분들의 시험패스로 검증된 믿을만한 최고의 시험자료입니다.

IAPP AIGP 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.
주제 2	<ul style="list-style-type: none"> Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.
주제 3	<ul style="list-style-type: none"> Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

주제 4	<ul style="list-style-type: none"> • Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.

AIGP인증문제 완벽한 덤프샘플문제

퍼펙트한 IAPP AIGP 시험대비 덤프 자료는 DumpTOP가 전문입니다. IAPP AIGP 덤프를 다운받아 가장 쉬운 시험준비를 하여 한방에 패스가 가능합니다. 다같이 IAPP AIGP 덤프로 시험패스에 주문 걸어 보아요. 마술처럼 IAPP AIGP 시험합격이 실현될 것입니다.

최신 Artificial Intelligence Governance AIGP 무료 샘플문제 (Q70-Q75):

질문 # 70

After completing model testing and validation, which of the following is the most important step that an organization takes prior to deploying the model into production?

- A. Document maintenance teams and processes.
- **B. Perform a readiness assessment.**
- C. Define a model-validation methodology.
- D. Identify known edge cases to monitor post-deployment.

정답: B

설명:

After completing model testing and validation, the most important step prior to deploying the model into production is to perform a readiness assessment. This assessment ensures that the model is fully prepared for deployment, addressing any potential issues related to infrastructure, performance, security, and compliance.

It verifies that the model meets all necessary criteria for a successful launch. Other steps, such as defining a model-validation methodology, documenting maintenance teams and processes, and identifying known edge cases, are also important but come secondary to confirming overall readiness. Reference: AIGP Body of Knowledge on Deployment Readiness.

질문 # 71

Training data is best defined as a subset of data that is used to:

- **A. Enable a model to detect and learn patterns.**
- B. Resemble the structure and statistical properties of production data.
- C. Fine-tune a model to improve accuracy and prevent overfitting.
- D. Detect the initial sources of biases to mitigate prior to deployment.

정답: A

설명:

Training data is the dataset used to enable a machine learning model to detect and learn underlying patterns, which forms the basis for its predictive capabilities.

질문 # 72

All of the following issues are unique for proprietary AI model deployments EXCEPT:

- **A. The potential for bias.**

- B. The acquisition of training data.
- C. The necessity of performing conformity assessments.
- D. The cost of AI chips.

정답: A

설명:

The potential for bias is not unique to proprietary AI models; it applies to all AI systems regardless of ownership or deployment type.

질문 # 73

A deployer discovers that a high-risk AI recruiting system has been making widespread errors, resulting in harms to the rights of a considerable number of EU residents who are denied consideration for jobs for improper reasons such as ethnicity, gender and age. According to the EU AI Act, what should the company do first?

- A. Identify any decisions that may have been improperly made and re-open them for human review.
- **B. Notify the provider, the distributor, and finally the relevant market authority of the serious incident.**
- C. Submit an incomplete report to the relevant market authority immediately and follow up with a complete report as soon as possible.
- D. Conduct a thorough investigation of the serious incident within the 15 day timeline and present the completed report to the relevant market authority.

정답: B

설명:

Under the EU AI Act, serious incidents involving high-risk AI systems must be reported. The deployer is required to promptly inform the provider and relevant authorities about the issue.

From the AI Governance in Practice Report 2024:

"Serious incidents involving high-risk systems... must be reported to the provider and relevant market surveillance authority." (p. 35)

"Timely reporting is required when AI systems result in or may result in violations of fundamental rights." (p. 35)

질문 # 74

What is the primary objective of continuous monitoring in the lifecycle of an AI tool?

- A. To restrict the AI tool from accessing external data sources to maintain data privacy.
- B. To ensure that the AI tool's algorithm evolves independently to adapt to new data without human intervention.
- **C. To track and adjust the tool's performance in order to ensure that it meets its goals.**
- D. To periodically upgrade the AI tool's computational resources to maintain processing efficiency.

정답: C

설명:

The correct answer is B because continuous monitoring is a core component of AI governance that ensures systems remain effective, reliable, and aligned with their intended objectives over time. AI systems can degrade due to data drift, model drift, or changing real-world conditions, making ongoing performance tracking essential. Monitoring allows organizations to detect anomalies, biases, or performance issues and take corrective actions such as retraining or recalibration. Governance frameworks emphasize post-deployment oversight to ensure systems continue to operate safely and within acceptable risk thresholds.

Option A incorrectly suggests fully autonomous evolution without oversight, which contradicts governance principles. Options C and D address specific operational concerns but do not capture the primary purpose of continuous monitoring, which is maintaining performance, accountability, and alignment with defined goals.

질문 # 75
