Arch-303 Top Exam Dumps & Visual Arch-303 Cert Test

We promise you will pass the Arch-303 exam and obtain the Arch-303 certificate successfully with our help of Arch-303 exam questions. According to recent survey of our previous customers, 99% of them can achieve their goals, so believe that we can be the helping hand to help you achieve your ultimate goal. Bedsides we have high-quality Arch-303 Test Guide for managing the development of new knowledge, thus ensuring you will grasp every study points in a well-rounded way.

Salesforce Certified B2C Commerce Architect Sample Questions (Q63-Q68):

NEW QUESTION # 63
A new version of the Page Show controller is required for implementation of Page Deserter specific look. It requires implementation of a specific, cache period for Page Designer pages, which b not currently available in the base Storefront Reference Architecture (SFRA) cache.js module What two steps should the Architect instruct the developer to implement?
Choose 2 answers

- A. Create new Page.js controller in client s cartridge. Copy code from base and modify the Page-Show route to include the new cache middleware function.
- B. Create new Page,js controller in client's cartridge. Extend the code from base and prepend the new cache middleware

function to Page-Show route.
- C. Create new ceche,js client's cartridge. Copy cache,js from app_storefront_base and add a function for the Page Designer caching.
- D. Create new cache,js in client's cartridge. Extend cache,js from app_storefront_baseand add a function for the Page Designer caching.

Answer: A,D

Explanation:
To implement a specific cache period for Page Designer pages in SFRA:
* Option A involves creating a new Page.js controller in the client's cartridge, where the existing Page- Show route can be modified to include a custom caching logic. This ensures that the specific caching requirements for Page Designer pages are met without altering the base functionality for other pages.
* Option D calls for extending the existing cache.js module in the client's cartridge to include a function specifically for Page Designer caching. This allows for reusing the existing caching logic while adding enhancements specific to the Page Designer pages, thus maintaining efficiency and clarity in the codebase.
Both options provide a clean, maintainable approach to customizing caching for specific requirements in SFRA, avoiding disruptions in other areas of the site functionality.

NEW QUESTION # 64

During a review of the most recent release notes, the Architect finds that Salesforce has deprecated an API that is used throughout the site. After reviewing the deprecated API usage in Business Manager, the Architect narrows down the usage of that API to a particular LINK integration cartridge. The cartridge was integrated when the site was first launched and is heavily customized for the Client.
What is the recommended way for the Architect to remove the deprecated API so the LINK integration continues to work without interruptions, and lowest level of effort'

- A. The Architect does not need to do anything at this time, the API will continue to work with no issues for the foreseeable future.
- B. The Architect should check to see If the LINK cartridge has been updated already, integrate It, apply the customisations, and teat thoroughly.
- C. The Architect should contact the company that created the LINK cartridge to fix the issue and provide the client with updated code.
- D. The Architect should update all the deprecated API cats in the already integrated LINK cartridge and test thoroughly.

Answer: B

Explanation:
When facing a deprecated API that is used in a LINK integration cartridge, the recommended approach is to check for an updated version of the cartridge that may have replaced the deprecated API with a supported one.
If an update is available:
* Integrate the updated cartridge into the site, ensuring compatibility with the current site configuration.
* Re-apply customizations that were made to the original cartridge to maintain functional consistency.
* Thorough testing should be conducted to ensure that the integration works seamlessly without causing disruptions in the site's functionality.
This approach minimizes effort by leveraging updates provided by the cartridge vendor while ensuring the site remains functional and compliant with current API standards.

NEW QUESTION # 65

During a load test the storefront shows steady but slow performance on all the paces being tested. The Architect opens Pipeline Profiler and sorts the data by *total time" column. The following come as the top Ave items:
Which controller should the Architect focus on to further investigate the performance issue?

- A. Home-IncludeHeaderMenu as It has highest average time.
- B. Product-Detail as It has the highest total time and highest maximum time.
- C. Search Show as this Is one of the key controllers that the customer uses
- D. Product-HitTile asit has the highest hits during the load test.

Answer: B

Explanation:
Focusing on the 'Product-Detail' controller is prudent given that it has the highest total time and the highest maximum time (Answer C), suggesting that it significantly contributes to the overall load and potential slowdowns on the site. By analyzing and optimizing this controller, the architect can potentially achieve the most substantial improvement in performance. Efforts might include optimizing database queries, caching frequently requested data, or simplifying complex logic in the Product-Detail page's processing.

NEW QUESTION # 66

The Client is planning to switch to a new Payment Service Provider (PSP). They have approached an Architect to understand the time and effort to Integrate the new PSP The PSP offers a LINK cartridge compatible with SiteGenesisPipelines, but the Client's website is build on Controllers.
Which two options should the Architect take into consideration before starting analysis? Choose 2 answers

- A. Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers.
- B. Produce a proof of concept converting the most essential pipelines into controllers and integrate the cartridge.
- C. Look for a different PSP that supports controllers and would not require conversion efforts.
- D. Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development

Answer: A,D

Explanation:
When integrating a new Payment Service Provider (PSP) LINK cartridge designed for SiteGenesis Pipelines into a site built on Controllers, consider these options:
* Option A (Estimate the effort and risk to convert the LINK cartridge from pipelines to controllers): Assessing the effort involved in converting the cartridge provides insight into the project scope, helping to manage risk and allocate resources effectively.
* Option B (Reach out to the PSP development team and ask if a new cartridge version that supports controllers is under development): This can potentially save significant development time and resources if a compatible version is already planned or in progress.
These approaches help in making an informed decision on integration strategies, balancing between customization efforts and leveraging existing solutions.

NEW QUESTION # 67

An Order Management System (OMS) handles orders from multiple brandspecific sites, as part of the processing, the OMS sends the processing detail to be added at notes to the orders in B2C Commerce. These processing details are captured temporarily in custom objects, and are later processed by a batch Job that:
* Processes the custom object to extract the orderid and note data.
* Tries to load the order.
* If the order is not found, it deletes the custom object and moves on.
* If the order is found, it updates notes In the Order, upon successful update of this order, it deletes the custom object.
There is an Issue reported that the job is constantly failing and custom objects are growing in number. On investigating the production look the message below is being logged on each failure:
What are three solution The Architect can take to fix this issue without losing meaningful data?
Choose 3 answers

- A. Using BM site import/export, softenthe<quota id="object.orderPo.relation,notes"> <custom- action>warn<custom-action> </quots>to make sure that neither order notes are lost and custom object is processed.
- B. Take the backup of the Order as XML and delete the notes from Order to ensure on the next jobrun the custom objects are getting processed.
- C. Take the backup of the Order as XML and delete the Order to ensure on the next job run, the custom objects are getting processed.
- D. Engage B2C Commerce Support Team to soften the quota limit for "object.OrderPO.relation.notes"
- E. Take the backup of the custom object and delete the custom object to ensure on the next job run the custom objects are getting processed.

Answer: B,D,E

Explanation:
When facing an issue with a growing number of custom objects due to the exceeded quota limit for order notes, effective solutions include:
* Option C (Take the backup of the custom object and delete the custom object): This ensures that the data is preserved while

freeing up space for new processes and reducing the load, allowing the job to continue running without the impediment of quota limits.
* Option D (Engage B2C Commerce Support Team to soften the quota limit for 'object.OrderPO.
relation.notes'): Increasing the quota limit can resolve the root cause of the issue by accommodating the actual business needs without compromising the integrity of order processing and note addition.
* Option E (Take the backup of the Order as XML and delete the notes from Order): This allows the job to process the custom objects as intended in subsequent runs by clearing out space while ensuring the order data remains intact for business needs.
These steps address the quota limit issue effectively without losing valuable order or note data, ensuring continuity and integrity of business operations.

NEW QUESTION # 68

......

Salesforce training pdf material is the valid tools which can help you prepare for the Arch-303 actual test. Arch-303 vce demo gives you the prep hints and important tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. With the help of Arch-303 study material, you will master the concepts and techniques that ensure you exam success. What's more, you can receive Arch-303 updated study material within one year after purchase. Besides, you can rest assured to enjoy the secure shopping for Salesforce exam dumps on our site, and your personal information will be protected by our policy.

Arch-303 Top Exam Dumps: https://www.braindumpsqa.com/Arch-303_braindumps.html

We promise you that if you fail to pass your exam after using Arch-303 exam materials, we will give you refund, Once you submit your exercises of the Arch-303 study materials, the calculation system will soon start to work, Braindumpsqa is also providing a 100% money back guarantee on Arch-303 test simulator dumps, It will be easy for you to gain the Salesforce Arch-303 Top Exam Dumps certificate.

All of these distributions are suitable for the Arch-303 objectives that are not distribution-specific, On Microsoft Windows operating systems, it is named tracert, We promise you that if you fail to pass your exam after using Arch-303 Exam Materials, we will give you refund.

100% Pass 2026 Fantastic Salesforce Arch-303 Pass4sure Dumps Pdf

Once you submit your exercises of the Arch-303 study materials, the calculation system will soon start to work, Braindumpsqa is also providing a 100% money back guarantee on Arch-303 test simulator dumps.

It will be easy for you to gain the Salesforce certificate, Don't waste your time and money studying outdated Arch-303 practice test material.
