AZ-104 Mock Test - AZ-104 Book Pdf

The most amazing part of our AZ-104 exam questions is that your success is 100% guaranteed. As the leader in this career for over ten years, we have enough strenght to make our AZ-104 study materials advanced in every sigle detail. On one hand, we have developed our AZ-104 learning guide to the most accurate for our worthy customers. As a result, more than 98% of them passed the exam. On the second hand, our services are considered the best and the most professional to give guidance for our customers.

Microsoft Azure Administrator Sample Questions (Q60-Q65):

NEW QUESTION # 60
You have an Azure Active Directory (Azure AD) tenant named contoso.com that is synced to an Active Directory domain. The tenant contains the users shown in the following table.
The users have the attribute shown in the following table.
You need to ensure that you can enable Azure Multi-Factor Authentication (MFA) for all four users.
Solution: You add a mobile phone number for User2 and User4.
Does this meet the Goal?

- A. Yes
- B. No

Answer: B

Explanation:
User3 requires a user account in Azure AD.
Note: Your Azure AD password is considered an authentication method. It is the one method that cannot be disabled.
Reference:
https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-authentication-methods

NEW QUESTION # 61
You have an Azure subscription named Subcription1 that contains a resource group named RG1.
In RG1. you create an internal load balancer named LB1 and a public load balancer named 162.
You need to ensure that an administrator named Admin 1 can manage LB1 and LB2. The solution must follow the principle of least privilege.
Which role should you assign to Admin1 for each task? To answer, select the appropriate options in the answer area.
NOTE: Caen correct selection is worth one point.
□

Answer:

Explanation:
□
Explanation
Box 1: Network Contributor on RG1
To add to the backend pool, write permission is required on the Resource Group because it writes deployment information. To add a backend pool, you need network contributor role on the LB and on the VMs that will be part of the backend pool.
For this reason the network contributor role must be assigned to the RG where the LB and the VM resides. So the correct answer is Network Contributor on RG1 .
Box 2: Network Contributor on RG1
For Health Probe also, without having access to RG1, no health probe can be added. If only Network Contributor role is assigned to LB then the user would not be able to access the IP addresses of the member pools.
Owner/Contributor can give the user access for everything. So it will not fit into the the principle of least privilege. Hence Owner and contributor role is incorrect choices for the question.

https://docs.microsoft.com/en-us/azure/role-based-access-control/built-in-roles

NEW QUESTION # 62
You have an Azure subscription named Subscription1. Subscription1 contains two Azure virtual machines named VM1 and VM2.
VM1 and VM2 run Windows Server 2016.
VM1 is backed up daily by Azure Backup without using the Azure Backup agent.
VM1 is affected by ransomware that encrypts data.
You need to restore the latest backup of VM1.
To which location can you restore the backup? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.
□

Answer:

Explanation:
□
Explanation
□
Note: The new VM must be in the same region.

https://docs.microsoft.com/en-us/azure/backup/backup-azure-arm-restore-vms

NEW QUESTION # 63
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an app named App1 that is installed on two Azure virtual machines named VM1 and VM2.
Connections to Appl are managed by using an Azure Load Balancer.
The effective network security configurations for VM2 are shown in the following exhibit.
You discover that connections 10 Appl from 131.107.100.50 over TCP port 443 fail.
You verity that the Load Balancer rules are configured correctly.
You need to ensure that connections to Appl can be established successfully from 131.107.100.50 over TCP port 443.
Solution: You create an inbound security rule that allows any traffic from the Azureload Balancer source and has a priority of 150.
Does this meet the goal?

- A. Yes
- B. No

Answer: A

NEW QUESTION # 64
You need to configure WebApp1 to meet the technical requirements.
Which certificate can you use from Vault1?

- A. Cert3 or Cert4 only
- B. Cert1 only
- C. Cert1 or Cert3 only
- D. Cert1 or Cert2 only
- E. Cert1, Cert2, Cert3, or Cert4

Answer: B

Explanation:
To meet the technical requirement - "Use TLS for WebApp1" - the web app must be configured with a certificate that is compatible with Azure App Service for HTTPS/TLS binding.
According to the Microsoft Azure Administrator documentation on App Service Certificates and Key Vault integration, the following key points determine which certificates can be used:
* Supported Certificate Format:Azure App Service supports importing certificates in PFX (PKCS #12) format, which includes both the public and private keys necessary for TLS/SSL binding.PEM certificates, by contrast, contain only the public key unless separately converted to PFX with an associated private key, which Azure App Service cannot directly use from Key Vault.
* Supported Key Type and Size:App Service supports RSA keys (typically 2048-bit or higher).Elliptic Curve (EC) keys are not supported for binding TLS in App Service as of current documentation.
* Integration with Azure Key Vault:When integrating a Key Vault certificate with an App Service (such as WebApp1), the certificate must be in PKCS #12 (PFX) format, and the App Service must have appropriate permissions via managed identity to read the secret and certificate from the Key Vault.
From the Vault1 data provided in your scenario:
Name
Content type
Key type
Key size
Cert1
PKCS #12
RSA
2048
Cert2
PKCS #12
RSA
4096
Cert3
PEM
RSA
2048
Cert4
PEM
RSA
4096

Analysis:
* Cert1 and Cert2 are PKCS #12 certificates, so both contain the private key required for TLS.
* However, only Cert1 (RSA 2048) is a Microsoft-recommended configuration for Azure Web App SSL /TLS use.
* Cert2 has a 4096-bit RSA key. Although technically valid, Azure's App Service certificate import often rejects 4096-bit keys for TLS binding due to performance and compatibility concerns.
* Cert3 and Cert4 are PEM type certificates, which cannot be directly used for Web App TLS configuration because they lack the private key in the required format.
Therefore, according to the Azure Administrator Exam Study Guide and Microsoft official documentation, the only valid certificate that meets the requirements is:
Cert1 only
Final Verified Answer: # A. Cert1 only

NEW QUESTION # 65
......

We know that you have strong desire for success in your career, now, we recommend you to get the AZ-104 exam certification. DumpsActual will help you and provide you with the high quality Microsoft training material. AZ-104 questions are selected and edited from the original questions pool and verified by the professional experts. Besides, the updated of AZ-104 Pdf Torrent is checked every day by our experts and the new information can be added into the AZ-104 exam dumps immediately.

AZ-104 Mock Test: https://www.dumpsactual.com/AZ-104-actualtests-dumps.html

The high-quality & high hit rate of AZ-104 Mock Test - Microsoft Azure Administrator exam torrent deserve to be relied on, We are sure that our AZ-104 test questions will help most examinees pass exam in the first try, So that our AZ-104 exam simulation materials help hundreds of candidates pass exam and obtain this certification, And you will be content about our considerate service on our AZ-104 training guide.

From the Tools menu, click Accounts, Similarly, a blue print for a house tells AZ-104 you what the house will look like, but you can't move into a blueprint, The high-quality & high hit rate of Microsoft Azure Administrator exam torrent deserve to be relied on.

Professional AZ-104 Valid Dump bring you Realistic AZ-104 Mock Test for Microsoft Microsoft Azure Administrator

We are sure that our AZ-104 Test Questions will help most examinees pass exam in the first try, So that our AZ-104 exam simulation materials help hundreds of candidates pass exam and obtain this certification.

And you will be content about our considerate service on our AZ-104 training guide, And our AZ-104 study materials are warmly praised and welcomed by the customers all over the world.
