BCS BAPv5유효한 인증공부자료, BAPv5최신시험후기

ExamPassdump의BCS BAPv5 덤프 구매 후 등록된 사용자가 구매일로부터 일년 이내에BCS BAPv5시험에 실패하셨 다면 ExamPassdump메일에 주문번호와 불합격성적표를 보내오셔서 환불신청하실수 있습니다.구매일자 이전에 받

생한 시험불합격은 환불보상의 대상이 아닙니다. 개별 인증사는 불합격성적표를 발급하지 않기에 재시험신청내역을 환불증명으로 제출하시면 됩니다.

최신 Business Analysis BAPv5 무료샘플문제 (Q100-Q105):

질문 # 100

A software development company has been receiving increased customer complaints about the user interface of their new mobile app, leading to a drop in user engagement and app downloads.

Which of the following will enable a business analyst to identify the root causes of the problematic attitudes observed by the company?

- A. Rich pictures
- B. Mind map
- C. Empathy map

정답: A

설명:

The technique that best supports identifying root causes of problematic attitudes is the rich picture. The documentation explains that many problematic business situations have "human and cultural aspects" that traditional structured models (like process or data models) cannot capture well. These aspects include differing viewpoints, misunderstandings, stress, dissatisfaction with management, frustration at inadequate resources, and other "people" factors that can directly affect outcomes. A rich picture explicitly enables the analyst to document these human factors alongside information flows and other issues, because it is intentionally unstructured and allows a "brain dump" of what is happening and how people feel about it.

The guidance also positions rich pictures as particularly useful in messy situations with multiple causes, helping the analyst see connections between issues and progressively enrich understanding as new information emerges. This matters in the scenario: complaints about the UI may reflect deeper causes such as poor navigation, unclear content, inconsistent interaction patterns, internal constraints, or misalignment between user expectations and design choices-plus stakeholder tensions about priorities. A rich picture is designed to surface and connect these causes and perceptions early in investigation.

A mind map can help structure information, but the rich picture is explicitly highlighted as the technique that captures the essence of the whole situation, especially where attitudes and cultural factors are significant.

질문 # 101

How would a business analyst use a Target Operating Model (TOM) in gap analysis?

- A. To identify how the organisation should structure itself to support the desired situation.
- B. To determine which activities in the desired situation are not financially feasible
- C. To establish which stakeholder views will not be reflected in the desired situation
- D. To assess how far the organisation's current activities support the desired situation.

정답: D

설명:

Explanation

A Target Operating Model (TOM) is a high-level description of how an organisation wants to operate in order to achieve its vision and strategy. It defines what an organisation does, how it does it, who does it, where it does it and why it does it. A TOM can be used in gap analysis to compare the desired situation with the existing situation and identify what needs to change to achieve the desired situation. Therefore, option A is the correct answer, as using a TOM in gap analysis would help to assess how far the organisation's current activities support the desired situation. By comparing the current activities with those defined in the TOM, a gap analysis would help to identify what activities are missing, redundant or inefficient in achieving the desired situation. Option B is not a correct answer, as using a TOM in gap analysis would not help to identify how the organisation should structure itself to support the desired situation. The structure of an organisation is one aspect of a TOM, but not its main purpose. A TOM defines what an organisation does more than how it organises itself. Option C is not a correct answer, as using a TOM in gap analysis would not help to determine which activities in the desired situation are not financially feasible. The financial feasibility of an activity is not determined by comparing it with a TOM, but by conducting a cost-benefit analysis or a business case.

Option D is not a correct answer, as using a TOM in gap analysis would not help to establish which stakeholder views will not be reflected in the desired situation. The stakeholder views are not determined by comparing them with a TOM, but by conducting a stakeholder analysis or a CATWOE analysis.

질문 # 102

You have been asked to explain divergent and convergent thinking to a colleague How would you describe the purpose of both divergent and convergent thinking to them Select the BEST TWO answers

- A. Convergent thinking define the solution in detail
- B. Convergent thinking define the action to be taken, broadly
- C. Convergent thinking review ideas for way forward
- D. Divergent thinking generate ideas.
- E. Divergent thinking creatively considering multiple solutions to the problem

정답: C,D

설명:

Explanation

Divergent thinking and convergent thinking are two types of thinking processes that can be used to solve problems creatively and effectively. Therefore, options A and B are correct answers, as they describe the purpose of both divergent and convergent thinking respectively. Option A describes the purpose of divergent thinking, which is to generate ideas. Divergent thinking involves exploring multiple possible solutions to a problem without judging or evaluating them. It helps to stimulate creativity and innovation by expanding the range and diversity of ideas. Option B describes the purpose of convergent thinking, which is to review ideas for way forward. Convergent thinking involves analysing and evaluating multiple possible solutions to a problem and selecting the best one for further development and implementation. It helps to ensure feasibility and suitability by narrowing down the range and diversity of ideas. Option C describes an aspect of divergent thinking, which is creatively considering multiple solutions to the problem, but not its purpose. The purpose of divergent thinking is to generate ideas, not just consider them creatively. Option D describes an aspect of convergent thinking, which is defining the solution in detail, but not its purpose. The purpose of convergent thinking is to review ideas for way forward, not just define them in detail. Option E describes an aspect of convergent thinking, which is defining the action to be taken, broadly, but not its purpose. The purpose of convergent thinking is to review ideas for way forward, not just define the action to be taken, broadly.

질문 # 103

On joining a new company. Sara spent time reviewing the company's organisation chart She was particularly interested in the sponsor of the project she is joining What is Sara LIKELY to have learnt about the sponsor from this? Select the TWO that apply

- A. Their span of control
- B. The culture within their team
- C. Their preferred management style
- D. The scope of their responsibilities
- E. Their position in the company hierarchy

정답: A,E

설명:

Explanation

An organisation chart is a diagram that shows the structure and relationships of an organisation. It helps to identify who are the members, roles, levels and units of an organisation and how they are connected or related.

Therefore, options A and B are correct answers, as they are the information that Sara is likely to have learnt about the sponsor from the organisation chart. Option A is a correct answer, as their position in the company hierarchy is the information that Sara is likely to have learnt about the sponsor from the organisation chart.

Their position in the company hierarchy is the level or rank of the sponsor within the organisation's structure.

It helps to indicate their authority, status and influence within the organisation. Option B is a correct answer, as their span of control is the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their span of control is the number of people or units that report directly to the sponsor within the organisation's structure. It helps to indicate their responsibility, workload and management style within the organisation. Option C is not a correct answer, as their culture within their team is not the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their culture within their team is the shared values, beliefs, norms and behaviours of the sponsor and their team members within the organisation. It helps to indicate their motivation, satisfaction and performance within the organisation. Option D is not a correct answer, as their scope of responsibilities is not the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their scope of responsibilities is the range or extent of tasks or activities that the sponsor has to perform or oversee within the organisation. It helps to indicate their objectives, outcomes and deliverables within the organisation. Option E is not a correct answer, as their preferred management style

is not the information that Sara is likely to have learnt about the sponsor from the organisation chart. Their preferred management style is the way or approach that the sponsor uses to lead or direct their team members within the organisation. It helps to indicate their communication, delegation and feedback skills within the organisation.

질문 # 104

Bluesky Travel is an independent travel agency specialising in luxury bespoke holidays, which is introducing a new booking process. So far, the following key changes have been made:

- 1) The new Commercial Off The Shelf (COTS) software package for making bookings has been installed and is working
- 2) Data is being migrated from the old computer system to the COTS software package
- 3) The IT department has documented the configuration of the COTS system
- 4) The legal department has confirmed that the new COTS system is compliant with company policies.

In taking a holistic approach, which of the following areas of the POPII Model have NOT yet been addressed by the changes identified?

- A. Process and people
- **B. Organisation and process.**
- C. Organisation and information.
- D. People and technology

정답: B

설명:

The elements of the POPII model that have not yet been addressed by the changes identified are organisation and process. This is because there is no mention of how the new booking process will affect the organisational structure, roles, responsibilities, and culture of the company, or how the new COTS software package will integrate with the existing business processes and workflows. These elements are important to consider when introducing a new system or technology, as they may require changes or adaptations to ensure alignment and compatibility. Option A is the correct answer.
