You can analyze the information the website pages provide carefully before you decide to buy our PL-300 exam questions.

Microsoft Power BI Data Analyst Sample Questions (Q267-Q272):

NEW QUESTION # 267

Your company plans to use Power BI for 20 users in the sales department. The users will perform the following tasks:

- * Access a published Power BI app
- * Modify reports in an app workspace
- * Share dashboards created in My Workspace

You need to identify which Power BI licenses are required for the tasks. The solution must use the Power BI (free) licenses, whenever possible.

Which license should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

Graphical user interface, text, application, email Description automatically generated

NEW QUESTION # 268

You have a Power BI workspace named Workspace1 that contains a dataset named DS1 and a report named RPT1.

A user wants to create a report by using the data in DS1 and publish the report to another workspace.

You need to provide the user with the appropriate access. The solution must minimize the number of access permissions granted to the user.

What should you do?

- A. Add the user as a Viewer of Workspace1.
- **B. Add the user as a member of Workspace1.**
- C. Share RPT1 with the user.
- D. Grant the Build permission for DS1 to the user.

Answer: B

Explanation:

Microsoft says: To copy a report to another workspace, and to create a report in another workspace based on a dataset in the current workspace, you need Build permission for the dataset. For datasets in the original workspace, if you have at least the Contributor role, you automatically have Build permission through your workspace role.

NEW QUESTION # 269

You receive annual sales data that must be included in Power BI reports.

From Power Query Editor, you connect to the Microsoft Excel source shown in the following exhibit.

You need to create a report that meets the following requirements:

* Visualizes the Sales value over a period of years and months

* Adds a slicer for the month

* Adds a slicer for the year

Answer:

Explanation:

Explanation:

NEW QUESTION # 270

You are building a dataset from a JSON file that contains an array of documents.

You need to import attributes as columns from all the documents in the JSON file. The solution must ensure that date attributes can be used as date hierarchies in Microsoft Power BI reports.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Convert list to table

2 - Expand Column

3 - Set Date type

NEW QUESTION # 271

You have a Power BI workspace that contains a dataset, a report, and a dashboard. The following groups have access:

- External users can access the dashboard.

- Managers can access the dashboard and a manager-specific report.

- Employees can access the dashboard and a row-level security (RLS)
