AZ 700 Renewal - Azure Networking Exam Test 2024 | Azure Networking AZ700 Renewal Exam 2024-2025 Questions and Correct Answers Rated A+

You have an Azure subscription.
You create a route table named Route1 and add several routes to Route1.

To which Azure resource can you associate Route1?
Select only one answer.

1. Subnet
2. Virtual network
3. Virtual network interface
4. Virtual network gateway

You have an Azure subscription that includes a virtual network named VNet1. A virtual machine named VMI is connected to VNet1.

You plan to deploy an Azure NAT gateway named NAT1 by using an ARM template. VMI must be able to connect to the internet by using NAT1.

What should you do before you can implement NAT1?
Select only one answer.

1. Create a public IP address that is set to the Standard SKU
2. Associate a route table to the subnet of VNet1.
3. Associate an IPv6 address space to the subnet of VNet1.
4. Create a virtual network gateway in VNet1

You have an Azure subscription.
You plan to deploy a basic Azure virtual WAN named WAN1.

What type of configuration is available with WAN1?
Select only one answer.

1. VNet-to-VNet transit through the virtual hub
2. ExpressRoute
3. Site-to-Site VPN
4. Point-to-Site VPN

You plan to provision an ExpressRoute circuit in the city of Boston in the United States.

You need to ensure that you can use the circuit to connect to all Azure public regions. The solution must minimize cost.

We provide you with free update for one year for AZ-700 study guide, that is to say, there no need for you to spend extra money on update version. The update version for AZ-700 exam materials will be sent to your email automatically. In addition, AZ-700 exam dumps are compiled by experienced experts who are quite familiar with the exam center, therefore the quality can be guaranteed. You can use the AZ-700 Exam Materials at ease. We have online and offline service, and if you have any questions for AZ-700 training materials, don't hesitate to consult us.

Microsoft AZ-700 exam is designed for professionals who specialize in designing and implementing networking solutions in the Azure environment. AZ-700 exam is intended for individuals who have a deep understanding of Azure networking services, including virtual networking, load balancing, and network security. Candidates for the AZ-700 exam should also have experience with hybrid networking, network migration, and network automation.

Microsoft AZ-700 Exam is an excellent opportunity for network engineers, architects, and administrators to demonstrate their expertise in designing and implementing Azure networking solutions. By passing AZ-700 exam, you can enhance your career opportunities and stay ahead of the competition in this rapidly growing field. With the right preparation and dedication, you can successfully pass the Microsoft AZ-700 exam and take your career to the next level.

Pass Guaranteed Quiz Microsoft - AZ-700 –Trustable Latest Exam Pass4sure

If you are going to take Microsoft AZ-700 certification exam, it is essential to use AZ-700 training materials. If you are looking for reference materials without a clue, stop! If you don't know what materials you should use, you can try Prep4sureExam Microsoft AZ-700 exam dumps. The hit rate of the dumps is very high, which guarantees you can pass your exam with ease at the first attempt. Prep4sureExam Microsoft AZ-700 Practice Test dumps can determine accurately the scope of the examination compared with other exam materials, which can help you improve efficiency of study and help you well prepare for AZ-700 exam.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q197-Q202):

NEW QUESTION # 197

You have an Azure private DNS zone named contoso.com that is linked to the virtual networks shown in the following table.

Name	IP address
Vnet1	10.1.0.0/16
Vnet2	10.2.0.0/16

The links have auto registration enabled.

You create the virtual machines shown in the following table.

Name	IP address
VM1	10.1.10.10
VM2	10.2.10.10
VM3	10.2.10.11

You manually add the following entry to the contoso.com zone:

* Name: VM1

* IP address: 10.1.10.9

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements

VM2 will resolve vm1.contoso.com to 10.1.10.10

Yes

☐

No

☐

Deleting VM1 will delete the VM1 record automatically

☐
☐

Changing the IP address of VM3 will update the DNS record of VM3 automatically

☐
☐

Answer:

Explanation:

Statements

VM2 will resolve vm1.contoso.com to 10.1.10.10

Yes

☐

No

☒

Deleting VM1 will delete the VM1 record automatically

☐
☒

Changing the IP address of VM3 will update the DNS record of VM3 automatically

☐
☒

Explanation

Graphical user interface, text, application Description automatically generated

Statements

Yes

No

VM2 will resolve vm1.contoso.com to 10.1.10.10

☐☐

Deleting VM1 will delete the VM1 record automatically

☐☐

Changing the IP address of VM3 will update the DNS record of VM3 automatically

☐☐

Box 1: No

The manual DNS record will overwrite the auto-registered DNS record so VM1 will resolve to 10.1.10.9.

Box 2: No

The DNS record for VM1 is now a manually created record rather than an auto-registered record. Only auto-registered DNS records are deleted when a VM is deleted.

Box 3: No

This answer depends on how the IP address is changed. To change the IP address of a VM manually, you would need to select 'Static' as the IP address assignment. In this case, the DNS record will not be updated because only DHCP assigned IP addresses are auto-registered.

NEW QUESTION # 198

You need to prepare Vnet1 for the deployment of an ExpressRoute gateway. The solution must meet the hybrid connectivity requirements and the business requirements.

Which three actions should you perform in sequence for Vnet1? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

- Create a VPN gateway by using the VPNGW1 SKU.
- Assign a user-defined route to GatewaySubnet.
- Set the subnet mask of GatewaySubnet to /27.
- Delete VPNGW1.
- Create a VPN gateway by using the Basic SKU.

Answer Area

1. Set the subnet mask of GatewaySubnet to /27.

2. Assign a user-defined route to GatewaySubnet.

3. Create a VPN gateway by using the basic SKU.

Answer:

Explanation:

Answer Area

Set the subnet mask of GatewaySubnet to /27.

Assign a user defined route to GatewaySubnet.

Create a VPN gateway by using the basic SKU.

- 1 - Set the subnet mask of GatewaySubnet to /27.
- 2 - Assign a user defined route to GatewaySubnet.
- 3 - Create a VPN gateway by using the basic SKU.

NEW QUESTION # 199

You have an Azure subscription that contains an app named Appl. Appl is hosted on the Azure App Service instances shown in the following table.

You need to implement Azure Traffic Manager to meet the following requirements:

- * Appl traffic must be assigned equally to each App Service instance in each Azure region.
- * Appl traffic from North Europe must be routed to the Appl instances in the North Europe region.
- * Appl traffic from North America must be routed to the Appl instances in the East US Azure region.

Answer Area

Minimum number of Traffic Manager profiles required:

2

1

2

3

4

Routing method for the traffic in each region:

Performance

Geographic

Performance

Priority

Weighted

Microsoft

Answer:

Explanation:

Answer Area

Minimum number of Traffic Manager profiles required:

2

1

2

3

4

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

On Firewall1, forced tunneling [answer choice].

On Firewall1, management by Azure Firewall Manager [answer choice].

Answer:

Explanation:

Answer Area

On Firewall1, forced tunneling [answer choice].

On Firewall1, management by Azure Firewall Manager [answer choice].

Explanation:

Answer Area

On Firewall1, forced tunneling [answer choice].

On Firewall1, management by Azure Firewall Manager [answer choice].

NEW QUESTION # 201

Drag and Drop Question

You have 100 on-premises servers with IP addresses from the 10.0.0.0/24 IP address space.

You have an Azure subscription that contains a virtual network named VNet1, an Azure VPN gateway named VGW1, and 100 virtual machines. VNet1 has an IP address space of 10.0.0.0/22. VGW1 uses the VpnGw1 SKU.

You need to ensure that the Azure virtual machines and the on-premises servers can communicate by using VGW1. The solution must minimize administrative effort.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
On VGW1, add NAT rules.	1
Resize VGW1.	2
Configure an Azure extended network.	3
On VGW1, add a connection.	4
Resize VNet1.	
On VGW1, create a local gateway.	

Answer:

Explanation:

Actions

On VGW1, add NAT rules.
Resize VGW1.

Answer Area

1	Resize VNet1.
2	On VGW1, create a local gateway.
3	On VGW1, add a connection.
4	Configure an Azure extended network.

NEW QUESTION # 202

.....

We boost the professional and dedicated online customer service team. They are working for the whole day, weak and year to reply the clients' question about our AZ-700 study question and solve the clients' problem as quickly as possible. If the clients have any problem about the use of our AZ-700 Exam Practice materials and the refund issue they can contact our online customer service at any time, our online customer service personnel will reply them quickly. So you needn't worry about you will encounter the great difficulties when you use our AZ-700 test pdf.
