If you have prepared well, tried all the Oracle Manufacturing Cloud 2025 Implementation Professional Exams, and understood each concept clearly, there is minimal or no chance of failure. Desktop Practice exam software and web-based Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) practice test are available at TrainingQuiz. These Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) practice test questions are customizable and give real Oracle Manufacturing Cloud 2025 Implementation Professional (1z0-1075-25) exam experience. Windows computers support desktop software. The web-based 1z0-1075-25 practice exam is supported by all browsers and operating systems.

We will continue to pursue our passion for better performance and human-centric technology of latest 1z0-1075-25 quiz prep. And we guarantee you to pass the exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the 1z0-1075-25 certification. We treasure time as all customers do. Therefore, fast delivery is another highlight of our laTest 1z0-1075-25 Quiz prep. We are making efforts to save your time and help you obtain our product as quickly as possible. We will send our 1z0-1075-25 exam guide within 10 minutes after your payment. You can check your mailbox ten minutes after payment to see if our 1z0-1075-25 exam guide are in.

Oracle 1z0-1075-25 Certification Exam Infor & New 1z0-1075-25 Cram Materials

TrainingQuiz 1z0-1075-25 exam dumps are audited by our certified subject matter experts and published authors for development. 1z0-1075-25 exam dumps are one of the highest quality 1z0-1075-25 Q&AS in the world. It covers nearly 96% real questions and answers, including the entire testing scope. TrainingQuiz guarantees you Pass 1z0-1075-25 Exam at first attempt.

Oracle Manufacturing Cloud 2025 Implementation Professional Sample Questions (Q43-Q48):

NEW QUESTION # 43

Your client informs you that after running the "Process Item Structure Changes to Work Definitions" scheduled process, they received a workflow notification.

Which statement is NOT a workflow notification that you might get if automation is not performed?

- A. The replacement component has been assigned as an ad hoc Item to the same operation as the original component.
- B. The original component is not assigned to any work definition operation.
- C. The original component has been assigned to more than one work definition operation.
- **D. The manufacturing plant is enabled for ERES, the work definition changes are not expected to go through an approval process.**

Answer: D

Explanation:

After running the "Process Item Structure Changes to Work Definitions" scheduled process, a series of workflow notifications may be triggered if the automation is not performed properly. The following notifications can be expected in scenarios where manual intervention is needed:

* Statement B is incorrect because, in Oracle Manufacturing Cloud, if the manufacturing plant is enabled for ERES (Engineering Release Execution System), it generally implies that any changes in work definitions would still require an approval process for validation and control. The fact that ERES is enabled would not automatically bypass the approval process.

Correct Notifications:

* Statement A : You may receive a notification that a replacement component has been assigned as an ad hoc item to the same operation where the original component was assigned.

* Statement C : A notification may alert you that the original component is not assigned to any work definition operation, signaling a potential issue that requires manual intervention.

* Statement D : It is also possible to receive a notification indicating that the original component has been assigned to more than one work definition operation, which may require review or adjustment.

Oracle Cloud documentation on "Process Item Structure Changes to Work Definitions" explains the notifications and approval steps involved when work definitions are modified without automation.

NEW QUESTION # 44

A Production Supervisor queries a work order, WO-1025, from the Manage Work Orders page. On the Entering Edit Work Order: WO-1025 page, the supervisor finds a General Information, Operations, and History tab, but no Reservations tab.

What are two reasons for the Reservations tab not being displayed for WO-1025?

- A. It is not a Drop-Ship work order.
- **B. It is not a Back-to-Back work order.**
- C. It is not a Plan-to-Produce work order.
- D. It is not a Pick-to-Order work order.
- **E. It is not a Configured Item work order.**

Answer: B,E

Explanation:

In Oracle Manufacturing Cloud, the Reservations tab on the Edit Work Order page is displayed only for specific types of work orders that require reservations of components or materials. The absence of the Reservations tab in work order WO-1025 indicates that the work order is not one of the following types:

* Configured Item Work Order (A) : Configured items are typically built based on specific customer requirements, and reservations of components are often necessary. Since WO-1025 is not a configured item work order, the Reservations tab is not shown.

* Back-to-Back Work Order (E) : Back-to-back work orders are linked to sales orders and require reservations of materials to fulfill the specific demand. Since WO-1025 is not a back-to-back work order, the tab is not displayed.

Incorrect options:

* B, C, D : Drop-Ship, Pick-to-Order, and Plan-to-Produce work orders do not typically require reservations in the same way as configured or back-to-back orders, which is why they are not the reasons for the absence of the Reservations tab.

Oracle Cloud documentation on work order types and the Reservations tab explains the conditions under which reservations are required and when the tab is displayed.

NEW QUESTION # 45

In a Manufacturing Cloud implementation, users are finding it difficult to track information about work orders executed across

various work centers.

Which three information types in the Work Order Traveler can help users in this situation?

- A. Item on-hand quantity
- B. Hard pegging of items
- C. Work definition details
- D. Product serial Information
- E. Reservation against sales orders

Answer: C,D,E

Explanation:

The Work Order Traveler in Oracle Manufacturing Cloud provides detailed information about work orders to help users track and manage work orders across various work centers. The following types of information are especially useful:

* Work definition details (D) : This provides detailed information about the operations and resources required to complete the work order, helping users understand the manufacturing process and requirements.

* Product serial information (E) : Tracking serial numbers for products is critical, especially in industries where traceability and product lifecycle management are important.

* Reservation against sales orders (A) : This information links work orders to specific sales orders, providing clarity on how the work order aligns with customer demand.

Incorrect options:

* Hard pegging of items (B) and Item on-hand quantity (C) are not typically tracked through the Work Order Traveler report, as this report focuses more on the work order 's execution rather than inventory management.

Oracle Manufacturing Cloud documentation on the Work Order Traveler report explains the different types of information provided to help users track work orders and manage production.

NEW QUESTION # 46

In a manufacturing plant, two purchase components, P1 and P2, and a resource, R1, are required to assemble a product. The cost of the assembly is calculated by using the standard costing method. The work definition and resource rates for the assembly have been defined as Required.

A Cost Accountant is estimating cost of the assembly, and analyzing rolled-up costs before finally publishing estimates as frozen standards to Cost Accounting by using a Cost Planning Scenario. While reviewing rolled- up costs, the extended costs of purchase components are not included in a rolled-up scenario.

What is the reason for this?

- A. Create Accounting was not initiated.
- B. Purchase components P1 and P2 are not associated with the material cost plan of the Cost Planning Scenario.
- C. Costs for purchase components P1 and P2 are not defined In Cost Accounting.
- D. Create Accounting Distributions was not initiated.

Answer: B

Explanation:

In Oracle Manufacturing Cloud, when performing a cost analysis using Cost Planning Scenarios , all components and resources involved in the assembly must be associated with the material cost plan to be included in the rolled-up cost estimates. The reason the extended costs of purchase components (P1 and P2) are not included in the rolled-up scenario is that:

* Purchase components P1 and P2 are not associated with the material cost plan of the Cost Planning Scenario . This means that although the components are defined in the system, they haven ' t been linked to the cost planning scenario, so their costs are not included in the rolled-up calculations.

Incorrect options:

* Costs for purchase components P1 and P2 are not defined in Cost Accounting (A) : While defining costs is necessary, the issue here is the components not being associated with the cost plan.

* Create Accounting (C) and Create Accounting Distributions (D) are not relevant to the rolled-up scenario in this context, as they relate to the accounting process, not cost planning.

Oracle Cloud ' s Cost Accounting documentation details the setup required for purchase components to be included in cost roll-ups, emphasizing their association with cost plans.

NEW QUESTION # 47

Your client has asked you to implement the functionality to ensure that the system checks for Qualified Operators when reporting

labor usage.

Which statement is NOT true?

- **A. Quick Complete is allowed for operations that contain resources with associated job profiles.**
- B. Validation of operator qualification is also enforced when reporting operation is completed through the dispatch list.
- C. You will need to report a qualified operator to manually report resource transactions, if the resource has a job profile associated with it.
- D. Qualified labor must be reported at the resource train stop.

Answer: A

Explanation:

When implementing the functionality for checking Qualified Operators during labor usage reporting in Oracle Manufacturing Cloud, it is important to enforce validation for operator qualifications. The following explains why statement C is not true :

* Quick Complete is not allowed for operations that have resources with associated job profiles. This is because operations with specific job profile requirements must go through a more detailed validation process to ensure that the assigned operator has the necessary qualifications before the operation can be completed. Quick Complete bypasses detailed validations, making it unsuitable for operations with strict qualification checks.

Correct statements:

* Statement A : Operator qualification is enforced when reporting operation completion through the dispatch list to ensure compliance.

* Statement B : A qualified operator is required to manually report resource transactions when the resource has an associated job profile.

* Statement D : Labor for qualified operators must be reported at the resource train stop to ensure the resource ' s qualifications are properly validated before continuing with the operation.

Oracle Cloud documentation on labor reporting and operator qualification explains how qualifications are enforced in different stages of the manufacturing process, including manual reporting and dispatch list validation.

NEW QUESTION # 48

.....

Our 1z0-1075-25 study quiz is made from various experts for examination situation in recent years in the field of systematic analysis of finishing, meet the demand of the students as much as possible, at the same time have a professional staff to check and review 1z0-1075-25 practice materials, made the learning of the students enjoy the information of high quality. Due to the variety of examinations, the 1z0-1075-25 Study Materials are also summarized for different kinds of learning materials, so that students can find the information on 1z0-1075-25 guide torrent they need quickly.

1z0-1075-25 Certification Exam Infor: <https://www.trainingquiz.com/1z0-1075-25-practice-quiz.html>

TrainingQuiz experts team has designed the PDF and Practice test software for Oracle 1z0-1075-25 exam to help the candidates for preparing Oracle Manufacturing Cloud 2025 Implementation Professional certification exam without hustle, Every page is carefully arranged by our experts, it has the clear layout of 1z0-1075-25 vce pdf training which leads unbelievable ocular experience with high efficiency and high quality, Oracle 1z0-1075-25 Reliable Braindumps Our test engine and pdf learning materials are very simple and easy to understand.

A client who delivered this morning tells the nurse that she plans to 1z0-1075-25 breastfeed her baby, So, it's likely that you would subclass the `Document` class to implement the different business document classes.

Free PDF Quiz Oracle - 1z0-1075-25 - Oracle Manufacturing Cloud 2025 Implementation Professional Newest Reliable Braindumps

TrainingQuiz experts team has designed the PDF and Practice test software for Oracle 1z0-1075-25 Exam to help the candidates for preparing Oracle Manufacturing Cloud 2025 Implementation Professional certification exam without hustle.

Every page is carefully arranged by our experts, it has the clear layout of 1z0-1075-25 vce pdf training which leads unbelievable ocular experience with high efficiency and high quality.

Our test engine and pdf learning materials are very simple and easy to understand, If you are determined to obtain a certification our 1z0-1075-25 exam resources will be clever option for you.

Dedicated efforts have been made by our colleagues to make the most reliable 1z0-1075-25 dumps torrent for certification

preparation, so you will find it easier to clear exam in a short time.
