2026 Updated GDAT Training Pdf | GDAT 100% Free Valid Exam Book

We know that once we sell fake products to customers, we will be knocked out by the market. So we strongly hold the belief that the quality of the GDAT practice materials is our lifeline. When you begin practicing our GDAT study materials, you will find that every detail of our GDAT study questions is wonderful. Because that we have considered every detail on the developing the exam braindumps, not only on the designs of the content but also on the displays.

GIAC Defending Advanced Threats Sample Questions (Q139-Q144):

NEW QUESTION # 139

Your organization has noticed a significant increase in phishing attempts targeting its employees. In one instance, a user unknowingly downloaded a malicious executable file attached to an email, which led to the installation of ransomware.

What immediate steps should your security team take to contain the incident and prevent future payload delivery through email?

Response:

- A. Block all outbound traffic from the organization until the threat is contained

- B. Notify users to reset their passwords and conduct phishing awareness training
- C. Disconnect the infected machine from the network and initiate a ransomware recovery protocol
- D. Develop a backup and recovery plan to prevent future incidents

Answer: C

NEW QUESTION # 140

Which method can be used by attackers to move laterally using native network administration tools?

Response:

- A. FTP
- B. SSH
- C. PowerShell
- D. SMTP

Answer: C

NEW QUESTION # 141

Which of the following should be a focus area when reviewing the effectiveness of controls after adversary emulation?

Response:

- A. Number of emulations that can be performed in a day
- B. Cost analysis of the tools used
- C. Public relations impact
- D. Time it takes to detect and respond to the emulation activities

Answer: D

NEW QUESTION # 142

Your security team has identified unusual outbound traffic from your organization's network to external IP addresses. Upon further analysis, the traffic consists of a high volume of encrypted HTTP POST requests, with some payloads resembling legitimate DNS queries.

What is the most likely method of data exfiltration being used, and how should you proceed?

Response:

- A. DNS tunneling; block external DNS requests and investigate the internal DNS servers
- B. SQL injection; patch the vulnerable web applications and monitor the database for anomalies
- C. Ransomware attack; isolate the affected systems and begin recovery operations
- D. Phishing attack; notify users to change their passwords and monitor account activity

Answer: A

NEW QUESTION # 143

What is the role of PowerShell in the context of payload execution?

Response:

- A. It is used to strengthen firewall rules.
- B. It encrypts data to prevent unauthorized access.
- C. It can be utilized by attackers to run scripts that execute payloads.
- D. It is primarily used for system performance monitoring.

Answer: C

NEW QUESTION # 144

.....
