16	The following query is producing an error. Identify the error and also write the correct query. <code>SELECT * FROM EMP ORDER BY NAME WHERE SALARY>=5000;</code>																					
Ans.	As per MySQL, ORDER BY must be the last clause in SQL QUERY, and in this query ORDER BY is used before WHERE which is wrong, the correct query will be: <code>SELECT * FROM EMP WHERE SALARY>=5000 ORDER BY NAME;</code>																					
17	If Table Sales contains 5 records and Raj executed the following queries; find out the output of both the query. (i) <code>Select 100+200 from dual;</code> (ii) <code>Select 100+200 from Sales;</code>																					
Ans.	(i) 300 (ii) 300 300 300 300 300																					
18	What is the difference between Equi-Join and Natural Join?																					
Ans.	In Equi join we compare value of any column from two tables and it will return matching rows. In Equi-join common column appears twice in output because we fetch using (*) not by specifying column name. for e.g. In Equi-join it is not mandatory to have same name for column to compare of both table In natural join also the matching rows will return. In natural join column will appear only once in output. Then name of column must be same in both table if we are performing natural join using the clause NATURAL JOIN.																					
19	Observe the given Table TEACHER and give the output of question (i) and (ii)																					
	<table border="1" style="width: 100%;"> <tr> <th>TEACHER_CODE</th> <th>TEACHER_NAME</th> <th>DOJ</th> </tr> <tr><td>T001</td><td>ANAND</td><td>2001-01-30</td></tr> <tr><td>T002</td><td>AMIT</td><td>2007-09-05</td></tr> <tr><td>T003</td><td>ANKIT</td><td>2007-09-20</td></tr> <tr><td>T004</td><td>BALBIR</td><td>2010-02-15</td></tr> <tr><td>T005</td><td>JASBIR</td><td>2011-01-20</td></tr> <tr><td>T006</td><td>KULBIR</td><td>2008-07-11</td></tr> </table>	TEACHER_CODE	TEACHER_NAME	DOJ	T001	ANAND	2001-01-30	T002	AMIT	2007-09-05	T003	ANKIT	2007-09-20	T004	BALBIR	2010-02-15	T005	JASBIR	2011-01-20	T006	KULBIR	2008-07-11
TEACHER_CODE	TEACHER_NAME	DOJ																				
T001	ANAND	2001-01-30																				
T002	AMIT	2007-09-05

100% Pass Quiz 2026 SC-100: Microsoft Cybersecurity Architect – High-quality Free Braindumps

ActualVCE regularly updates Microsoft Cybersecurity Architect (SC-100) practice exam material to ensure that it keeps in line with the test. In the same way, ActualVCE provides a free demo before you purchase so that you may know the quality of the SC-100 dumps. Similarly, the Microsoft SC-100 practice test creates an actual exam scenario on each and every test so that you may be

well prepared before your actual SC-100 examination time. Hence, it saves you time and money. ActualVCE provides three months of free updates if you purchase the Microsoft SC-100 questions and the content of the examination changes after that.

Microsoft Cybersecurity Architect Sample Questions (Q145-Q150):

NEW QUESTION # 145

You have an Azure subscription that contains virtual machines, storage accounts, and Azure SQL databases.

All resources are backed up multiple times a day by using Azure Backup. You are developing a strategy to protect against ransomware attacks.

You need to recommend which controls must be enabled to ensure that Azure Backup can be used to restore the resources in the event of a successful ransomware attack.

Which two controls should you include in the recommendation? Each correct answer presents a complete solution. NOTE: Each correct selection is worth one point.

- A. Perform offline backups to Azure Data Box.
- B. Encrypt backups by using customer-managed keys (CMKs).
- C. Enable soft delete for backups.
- D. Use Azure Monitor notifications when backup configurations change.
- E. Require PINs for critical operations.

Answer: D,E

Explanation:

<https://docs.microsoft.com/en-us/azure/security/fundamentals/backup-plan-to-protect-against-ransomware>

'You need to recommend which CONTROLS must be enabled to ENSURE that Azure Backup can be used to RESTORE the resources in the event of a successful ransomware attack.' Whilst helpful for auditing purposes and detection of a malicious attack, monitoring configuration changes and alerting after a change is made does not represent a CONTROL which ENSURES Azure Backup can be used to RESTORE the resources.

NEW QUESTION # 146

You have been hired to help an organization secure their Azure landing zone design. The current design includes implementation plans for both compute and storage services.

You have been asked to suggest an overall approach that will enhance the security of the overall system.

You recommend adding Azure Key Vault to the landing zone to support public key infrastructure (PKI).

Which two security requirements does your recommendation meet? Each correct answer presents part of the solution.

- A. Facilitate recovery of lost data.
- B. Prevent information disclosure.
- C. Prevent data modifications.
- D. Enhance data availability.
- E. Ensure non-repudiation.

Answer: B,E

Explanation:

Your recommendation will ensure non-repudiation and prevent information disclosure. Both of these are benefits provided by Public Key Infrastructure (PKI). PKI provides a framework for creating, managing, and deploying X.509 certificates that can be used to digitally sign data. A digital signature ensures nonrepudiation, meaning that the signer cannot deny, or repudiate, that their signature was used. Certificates are also used on apps and web servers to facilitate encrypted communications, such as with Hypertext Transfer Protocol Secure (HTTPS). Azure Key Vault can be used to create and manage digital certificates.

PKI does not facilitate the recovery of lost data. Azure Backup can be used to provide this benefit.

PKI does not prevent data modifications. However, digital signatures can be used to detect data modifications. If signed data has been modified, the signature will be invalid.

PKI does not enhance data availability. This is typically done using data replication schemes, clustering, and other resiliency approaches. Services like Azure Load Balancer and Azure Application Gateway can be used to enhance data availability.

NEW QUESTION # 147

You need to recommend a solution to meet the compliance requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

To enforce compliance to the regulatory standard, create:

- ☐ An Azure Automation account
- ☐ A blueprint
- ☐ A managed identity
- ☐ Workflow automation

To exclude TestRG from the compliance assessment:

- ☐ Edit an Azure blueprint
- ☐ Modify a Defender for Cloud workflow automation
- ☐ Modify an Azure policy definition
- ☐ Update an Azure policy assignment

Answer:

Explanation:

Answer Area

To enforce compliance to the regulatory standard, create:

- ☐ An Azure Automation account
- ☐ A blueprint
- ☐ A managed identity
- ☐ Workflow automation

To exclude TestRG from the compliance assessment:

- ☐ Edit an Azure blueprint
- ☐ Modify a Defender for Cloud workflow automation
- ☐ Modify an Azure policy definition
- ☐ Update an Azure policy assignment

Explanation

To enforce compliance to the regulatory standard, create:

To exclude TestRG from the compliance assessment:

NEW QUESTION # 148

Your on-premises network contains an e-commerce web app that was developed in Angular and Nodejs. The web app uses a MongoDB database. You plan to migrate the web app to Azure. The solution architecture team proposes the following architecture as an Azure landing zone.

You need to provide recommendations to secure the connection between the web app and the database. The solution must follow the Zero Trust model.

Solution: You recommend implementing Azure Key Vault to store credentials.

- ☐ A. Yes
- ☒ B. No

Answer: B

Explanation:

When using Azure-provided PaaS services (e.g., Azure Storage, Azure Cosmos DB, or Azure Web App, use the PrivateLink connectivity option to ensure all data exchanges are over the private IP space and the traffic never leaves the Microsoft network.

NEW QUESTION # 149

You have a Microsoft 365 subscription that syncs with Active Directory Domain Services (AD DS).

You need to define the recovery steps for a ransomware attack that encrypted data in the subscription. The solution must follow Microsoft Security Best Practices.

What is the first step in the recovery plan?

- **A. Disable Microsoft OneDrive sync and Exchange ActiveSync.**
- B. Contact law enforcement.
- C. From Microsoft Defender for Endpoint, perform a security scan.
- D. Recover files to a cleaned computer or device.

Answer: A

Explanation:

<https://learn.microsoft.com/en-us/microsoft-365/security/office-365-security/recover-from-ransomware?view=o365-worldwide>

NEW QUESTION # 150

.....

Do you often feel that your ability does not match your ambition? Are you dissatisfied with the ordinary and boring position? If your answer is yes, you can try to get the SC-100 certification that you will find there are so many chances wait for you. You can get a better job; you can get more salary. But if you are trouble with the difficult of SC-100 Exam, you can consider choose SC-100 guide question to improve your knowledge to pass SC-100 exam, which is your testimony of competence. We believe our latest SC-100 exam torrent will be the best choice for you.

Latest Braindumps SC-100 Ppt: <https://www.actualvce.com/Microsoft/SC-100-valid-vce-dumps.html>

These probable questions will help you in exploring the different types of question that can come in SC-100 exam and the methods that should be adopted by you for answering them, They pay attention to niceties and accuracy of content of SC-100 pass-sure materials: Microsoft Cybersecurity Architect more than any anything in the world, We are the leading comprehensive provider which is engaged in offering high-quality dumps materials for Latest Braindumps SC-100 Ppt - Microsoft Cybersecurity Architect ten years as like one day.

Internal assessment, testing, and auditing are carried out by personnel SC-100 within the organization, International cyber cooperation should aim to agree on policy around cybercrime, cyberwarfare, and law enforcement.
