최신 Certified Threat Intelligence Analyst 312-85 무료샘플문제 (Q38-Q43):

질문 # 38
An analyst wants to disseminate the information effectively so that the consumers can acquire and benefit out of the intelligence. Which of the following criteria must an analyst consider in order to make the intelligence concise, to the point, accurate, and easily understandable and must consist of a right balance between tables, narrative, numbers, graphics, and multimedia?

- A. The right presentation
- B. The right time
- C. The right content
- D. The right order

정답：A

설명：
For intelligence to be effectively disseminated and utilized by consumers, it must be presented in a manner that is concise, accurate, easily understandable, and engaging. This involves a careful balance of narrative, numerical data, tables, graphics, and potentially

multimedia elements to convey the information clearly and compellingly. The right presentation takes into account the preferences and needs of the intelligence consumers, as well as the context andurgency of the information. By focusing on how the intelligence is presented, the analyst ensures that the content is not only consumed but also actionable, facilitating informed decision-making.

질문 # 39
In which of the following forms of bulk data collection are large amounts of data first collected from multiple sources in multiple formats and then processed to achieve threat intelligence?

- A. Production form
- B. Structured form
- C. Unstructured form
- D. Hybrid form

정답： C

질문 # 40
Organizations must choose the right threat intelligence platform to assess and leverage intelligence information, monitor multiple enforcement points, manage intelligence feeds, and select appropriate security for digital assets.
Which of the following key factors ensures that the threat intelligence platform offers a structured way to perform investigations on attacks by processing the threat intelligence and utilizing internal security controls to automate the detection process?

- A. Workflow
- B. Open
- C. Search
- D. Scoring

정답： A

설명：
The key factor that enables a structured and automated process for investigating attacks, processing intelligence, and integrating it with internal controls is Workflow.
In a Threat Intelligence Platform (TIP), the workflow defines a structured sequence of steps or processes that analysts follow to collect, process, analyze, and act on intelligence data. It ensures that:
* Intelligence is processed consistently and efficiently.
* Alerts, investigations, and responses follow predefined automation rules.
* Internal controls are linked with threat feeds for faster detection and mitigation.
A well-designed workflow also supports investigation automation, report generation, and integration with other security systems such as SIEM, SOAR, and EDR tools.
Why the Other Options Are Incorrect:
* A. Scoring: Refers to prioritizing or rating intelligence based on risk or severity but does not automate investigations.
* B. Search: Involves querying the intelligence database for specific data but lacks structured investigation processes.
* D. Open: Indicates an open architecture or API support, not workflow automation or process structuring.
Conclusion:
The correct factor that ensures structured, automated investigations in a Threat Intelligence Platform is Workflow.
Final Answer: C. Workflow
Explanation Reference (Based on CTIA Study Concepts):
CTIA defines workflow as a key element in threat intelligence platforms that organizes and automates intelligence-driven investigations across multiple security controls.

질문 # 41
Alice, an analyst, shared information with security operation managers and network operations center (NOC) staff for protecting the organizational resources against various threats. Information shared by Alice was highly technical and include threat actor TTPs, malware campaigns, tools used by threat actors, and so on.
Which of the following types of threat intelligence was shared by Alice?

- A. Technical threat intelligence
- B. Tactical threat intelligence

- C. Operational threat intelligence
- D. Strategic threat intelligence

정답：B

설명：
The information shared by Alice, which was highly technical and included details such as threat actor tactics, techniques, and procedures (TTPs), malware campaigns, and tools used by threat actors, aligns with the definition of tactical threat intelligence. This type of intelligence focuses on the immediate, technical indicators of threats and is used bysecurity operation managers and network operations center (NOC) staff to protect organizational resources. Tactical threat intelligence is crucial for configuring security solutions and adjusting defense mechanisms to counteract known threats effectively.References:

질문 # 42
Jame, a professional hacker, is trying to hack the confidential information of a target organization. He identified the vulnerabilities in the target system and created a tailored deliverable malicious payload using an exploit and a backdoor to send it to the victim. Which of the following phases of cyber kill chain methodology is Jame executing?

- A. Weaponization
- B. Reconnaissance
- C. Exploitation
- D. Installation

정답：A

설명：
In the cyber kill chain methodology, the phase where Jame is creating a tailored malicious deliverable that includes an exploit and a backdoor is known as 'Weaponization'. During this phase, the attacker prepares by coupling a payload, such as a virus or worm, with an exploit into a deliverable format, intending to compromise the target's system. This step follows the initial 'Reconnaissance' phase, where the attacker gathers information on the target, and precedes the 'Delivery' phase, where the weaponized bundle is transmitted to the target. Weaponization involves the preparation of the malware to exploit the identified vulnerabilities in the target system.References:
