近來，隨著IT技術的不斷快速發展，學習IT技術的人越來越多。這也導致在IT行業工作的人越來越多。於是，IT行業的競爭愈發激烈了。同樣在IT行業工作，並且有著IT夢的你，肯定不希望被別人趕上甚至超過吧？那麼，這就需要你不斷提升自己的技能，向別人證明你自己的實力。那麼怎樣才能證明你自己的能力呢？越來越多的人選擇參加IT認定考試取得認證資格來證明自己的實力。你也想获得认证资格吗？首先来参加SalesforceのCRT-450认定考试吧。这是Salesforce的最重要的考试，同时也是被业界广泛认证的资格。

Salesforce CRT-450考試包含60道選擇題，時限為105分鐘。考試涵蓋各種主題，如Apex、Visualforce、Lightning Components、數據管理和集成。為了通過考試，候選人必須獲得至少65%的分數。Salesforce CRT-450考試由Salesforce進行管理，可以親身參與或在線考試。

Salesforce CRT-450考試是一個綜合性的測試，涵蓋了與Salesforce開發相關的廣泛主題。這包括Apex編程語言、Visualforce、Salesforce Object Query Language（SOQL）、Salesforce Object Search Language（SOSL）等主題。該考試還測試候選人排除故障和調試代碼的能力，以及他們對在Salesforce平台上開發和部署應用程序的最佳實踐的理解。

要通過 Salesforce CRT-450 考試，你需要對於 Apex 編程語言、Visualforce 框架和 Salesforce 平台有深刻的理解。你還需要有在 Salesforce 平台上開發自定義應用程序的實踐經驗。

有效的CRT-450 PDF題庫和資格考試中的主要材料供應商和熱門的CRT-450參考資料

不要再猶豫了，如果想體驗一下CRT-450考古題的內容，那麼快點擊Fast2test的網站獲取吧。你可以免費下載考古題的一部分。在購買CRT-450考古題之前，你可以去Fast2test的網站瞭解更多的資訊，更好地瞭解這個網站。另外，關於考試失敗全額退款的政策，你也可以事先瞭解一下。Fast2test绝对是一个全面保障你的利益，设身处地为你考虑的网站。

最新的 Salesforce Developers CRT-450 免費考試真題 (Q32-Q37):

問題 #32

AW Computing (AWC) handles orders in Salesforce and stores its product inventory in a field, `inventory__c`, on a custom object, `Product__c`. When an order for a `Product__c` is placed, the `inventory__c` field is reduced by the quantity of the order using an Apex trigger.

```
public void reduceInventory(Id prodId, Integer qty) {  
    Integer newInventoryAmt = getNewInventoryAmt(prodId, qty);  
    Product__c p = new Product__c(Id = prodId, inventory__c = newInventoryAmt);  
    update p;  
  
    // code goes here  
}
```

AWC wants the real-time inventory reduction for a product to be sent to many of its external systems, including some future systems the company is currently planning.

What should a developer add to the code at the placeholder to meet these requirements?

A)

```
InventoryReductionEvent__e ev = new InventoryReductionEvent__e(ProductId__c =  
    prodId, Reduction__c = qty);  
EventBus.publish(ev);
```

B)

```
InventoryReductionEvent__e ev = new InventoryReductionEvent__e(ProductId__c =  
    prodId, Reduction__c = qty);  
insert ev;
```

C)

```
InventoryReductionEvent__c ev = new InventoryReductionEvent__c(ProductId__c =  
    prodId, Reduction__c = qty);  
EventBus.publish(ev);
```

D)

```
InventoryReductionEvent__c ev = new InventoryReductionEvent__c(ProductId__c =  
    prodId, Reduction__c = qty);  
insert ev;
```

- A. Option
- B. Option
- **C. Option**
- D. Option

答案: C

問題 #33

Which three steps allow a custom SVG to be included in a Lightning web component? (Choose three.)

- A. Import the static resource and provide a getter for it in JavaScript.
- B. Upload the SVG as a static resource.
- C. Reference the getter in the HTML template.
- D. Import the SVG as a content asset file.
- E. Reference the import in the HTML template.

答案： A,B,C

問題 #34

A developer identifies the following triggers on the Expense __c object:

The triggers process before delete, before insert, and before update events respectively.

Which two techniques should the developer implement to ensure trigger best practices are followed?

```
deleteExpense,
applyDefaultExpense,
validateExpenseUpdate
```

Choose 2 answers

- A. Unify the before insert and before update triggers and use Flow for the delete action.
- B. Maintain all three triggers on the Expense __c object, but move the Apex logic out of the trigger definition.
- C. Unify all three triggers in a single trigger on the Expense __c object that includes all events.
- D. Create helper classes to execute the appropriate logic when a record is saved.

答案： B,D

解題說明：

According to the Salesforce Platform Developer I learning objectives and documents, best practices for triggers include modularizing code by using helper classes and ensuring that the trigger only contains logic to determine which records to process. The actual processing should be done in a separate class. This makes the code more organized, reusable, and easier to test. So options A and D are correct.

* Option A suggests creating helper classes to execute the appropriate logic when a record is saved, aligning with best practices of modularizing code.

* Option D suggests maintaining all three triggers but moving the Apex logic out of the trigger definition, which also aligns with best practices.

Option B is incorrect because unifying before insert and before update triggers and using Flow for delete action is not a standard practice mentioned in the learning materials.

Option C is incorrect because although it's often a good practice to have one trigger per object, it's not about including all events but about organizing code execution properly.

問題 #35

A developer creates a new Apex trigger with a helper class, and writes a test class that only exercises 95% coverage of new Apex helper class. Change Set deployment to production fails with the test coverage warning: "Test coverage of selected Apex Trigger is 0%, at least 1% test coverage is required" What should the developer do to successfully deploy the new Apex trigger and helper class?

- A. Run the tests using the 'Run All Tests' method.
- B. Remove the failing test methods from the test class.
- C. Increase the test class coverage on the helper class
- D. Create a test class and methods to cover the Apex trigger

答案： D

問題 #36

What is a valid way of loading external JavaScript files into a Visualforce page? (Choose 2)

- 答案： C,D**
